(In)Security and the Production of International Relations Jonas Hagmann, 2014-11-27 This book provides a framework for analysing the interplay between securitisation and foreign affairs reconnecting critical security studies with traditional IR concerns about interstate relations What happens to foreign policymaking when actors things or processes are presented as threats This book explains state behaviour on the basis of a reflexive framework of insecurity politics and argues that governments act on the knowledge of international danger available in their societies but that such knowledge is organised by markedly varying ideas of who threatens whom and how The book develops this argument and illustrates it by means of various European case studies Moving across European history and space these case studies show how securitisation has projected evolving and

often contested local ideas of the organisation of international insecurity and how such knowledges of world politics have then conditioned foreign policymaking on their own terms With its focus on insecurity politics the book provides new perspectives for the study of international security Moving the discipline from systemic theorising to a theory of international systematisation it shows how world politics is in practice often conceived in a different way than that assumed by IR theory By the same token by depicting national insecurity as a matter of political construction the book also raises the challenging question of whether certain projections of insecurity may be considered more warranted than others This book will be of much interest to students of critical security studies European politics foreign policy and IR in general Reconstructing China's Participation in the Global Order SHAO Binhong, 2018-07-17 How does China reconstruct its participation in the global order What is the theoretical framework of global governance What are the new challenges for China What is China's diplomatic strategy in the transformation of the international structure How will China and the US evolve under Two Orders How does China deal with the South China Sea and North Korea nuclear issues What is the reform of RMB exchange rate regime Will the Asian Infrastructure Investment Bank be a watershed of power transition between China and the United States in the Asia Pacific This volume gathers a collection of translations of influential essays speeches and papers on Chinese foreign policy national security and foreign economic relations written by Chinese scholars Many papers have also served as propositions for policy prescriptions to China's leaders the vast majority of which have to date only been available in Chinese **Encyclopedia of Violence, Peace, and Conflict** , 1999-08-16 The Encyclopedia of Violence Peace and Conflict a three volume set written by more than 200 eminent contributors from around the world takes advantage of increasing worldwide awareness in the public private commercial and academic sectors about manifestations of violence in all segments of society While the contributors do not use these volumes to make specific arguments they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace Our reviewers consistently note that while many in depth studies of war peace and aggression exist the attendant specialization keeps scholars from learning about related fields No publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world **On Nuclear Weapons: Denuclearization, Demilitarization and Disarmament** Richard A. Neutral Europe and the Creation of the Nonproliferation Regime Pascal Lottaz, Yoko Iwama, 2023-11-03 Lottaz, Iwama, and their contributors investigate the role of neutral and nonaligned European states during the negotiations for the Treaty on the Nonproliferation of Nuclear Weapons (NPT). Focusing on the years from the Irish Resolution of 1958 until the treaty's opening for signatures ten years later, the nine chapters, written by area experts, highlight the processes and reasons for the political and diplomatic actions the neutrals took and how those impacted the multilateral treaty negotiations. The book reveals new aspects of the dynamics that lead to this most consequential multilateral breakthrough of the Cold War. In part one, three chapters analyze the international system from a bird's-eye perspective, discussing neutrality, nonalignment, and the nuclear order. The second part features six detailed case studies on the politics and diplomacy of Ireland, Sweden, Finland, Switzerland, Austria, and Yugoslavia. Overall, this study suggests that despite the volatile and dangerous nature of the early Cold War, the balance of the strategic environment enabled actors that were not part of one or the other alliance system to play a role in the interlocking global politics that finally created the nuclear regime that defines international relations until today. A valuable resource for scholars of nonproliferation, the Cold War, neutrality, nonalignment, and area studies. Drones and Global Order Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28 This book explores the implications of drone warfare for the legitimacy of global order. The literature on drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal, moral, and ethical impacts. These three waves of scholarship do not, however, address the implications of drone warfare for global order. This book fills the gap by contributing to a fourth wave of literature concerned with the trade-offs imposed by drone warfare for global order. The book draws on the English School of International Relations Theory, which is premised on the existence of a society of states bounded by common norms, values, and institutions, to argue that drone warfare imposes contradictions on the structural and normative

pillars of global order. These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict. The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order. This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously: drone warfare can sometimes strengthen global order. The volume concludes by proposing a research agenda to reconcile the complex and often counterintuitive impacts of drone warfare for global order. This book will be of considerable interest to students of security studies, global governance, and International Relations.
