Congress. Senate. Committee on Appropriations. Subcommittee on Energy and Water Development, 2002. **Uncertain Futures** Jens Beckert, Richard Bronk, 2018-07-05. *Uncertain Futures* considers how economic actors visualize the future and decide how to act in conditions of radical uncertainty. It starts from the premise that dynamic capitalist economies are characterized by relentless innovation and novelty and hence exhibit an indeterminacy that cannot be reduced to measurable risk. The organizing question then becomes how economic actors form expectations and make decisions despite the uncertainty they face. This edited volume lays the foundations for a new model of economic reasoning by showing how in conditions of uncertainty economic actors combine calculation with imaginaries and narratives to form fictional expectations that coordinate action and provide the confidence to act. It draws on groundbreaking research in economic sociology, economics, anthropology, and psychology to present theoretically grounded empirical case studies. These demonstrate how grand narratives, central bank forward guidance, economic forecasts, finance models, business plans, visions of technological futures, and new era stories influence behaviour and become instruments of power in markets and societies. The market impact of shared calculative devices, social narratives, and contingent imaginaries underlines the rationale for a new form of narrative economics. **Proceedings of the 4th Congrès International de Géotechnique - Ouvrages - Structures** Hoang-Hung Tran-Nguyen, Henry Wong, Frederic Ragueneau, Cuong Ha-Minh, 2017-10-20. This proceedings volume for the 4th international conference CIGOS 2017 Congrès International de Géotechnique Ouvrages Structures presents novel technologies, solutions, and research advances, making it an excellent guide in civil engineering for researchers, students, and professional engineers alike. Since 2010, CIGOS has become a vital forum for international scientific exchange on civil engineering. It aims to promote beneficial economic partnerships and technology exchanges between enterprises, worldwide institutions, and universities. Following the success of the last three CIGOS conferences (2010, 2013, and 2015), the 4th conference was held at Ho Chi Minh City University of Technology, Ho Chi Minh City, Saigon, Vietnam, on 26 to 27 October 2017. The main scientific themes of CIGOS 2017 were focused on New Challenges in Civil Engineering. **Energy Abstracts for Policy Analysis**, 1986. **Energy** National Academy of Engineering, 1990-01-01. *Energy* provides a fresh multidisciplinary approach to energy analysis. Leading experts from diverse fields examine the evolving structure of our energy system from several perspectives. They explore the changing patterns of supply and demand, offer insights into the forces that are driving the changes, and discuss energy planning strategies that take advantage of such insights. The book addresses several major issues, including the growing vulnerabilities in the U.S. energy system, the influence of technological change, and the role of electricity in meeting social objectives. The strongest of the book's themes is the growing influence of environmental concerns on the global energy system. **Molecules**
