Nuclear Spent Fuel Management Experience And Options:

Nuclear Spent Fuel Management OECD Nuclear Energy Agency. Working Group on Spent Fuel Management, 1986

Research Reactor Spent Fuel Management: Options and Support to Decision Making IAEA, 2021-12-14 This publication resulting from an IAEA coordinated research project CRP provides information about available strategies for research reactor spent fuel management and presents a decision methodology to assist those selecting among several options to identify the preferred approach for their specific situation The decision support tools were developed to consider not only the cost of the possible research reactor spent fuel management strategies but also the non economic factors that might influence their selection Examples of the technologies that are currently used by some IAEA Member States are provided Additionally this publication provides information about the Excel based decision support tools developed as part of this CRP along with case studies and tutorials to assist users

Options, Experience and Trends in Spent Nuclear Fuel Management International Atomic Energy Agency, 1995 Spent fuel management encompasses all the activities associated with the handling transport storage processing and eventual disposal of spent nuclear fuel following its discharge from the reactor The time scale for commitment to the safe management of spent fuel is expected to be several decades until such time as the eventual disposal arrangements have been engineered The purpose of this document is to assist Member States to establish policies and national arrangements for spent fuel management in a structured and timely manner

Practices for Interim Storage of Research Reactor Spent Nuclear Fuel IAEA, 2022-09-28 This publication provides an introduction to the management of research reactor spent nuclear fuel RRSNF Five key areas are discussed types of RRSNF characterization data wet storage considerations dry storage considerations and lessons learned and current practices Information on internationally accepted standards as well as information on aspects such as drying treatment and surveillance programmes are presented as well as suggestions for further optimization of effective and safe storage of RRSNF through the application of new approaches The intended users of this publication include industry professionals at operating research reactors and at RRSNF storage facilities who need to identify the most suitable approach for interim storage of spent fuel

Energy Research Abstracts, 1995 *Nuclear Reactor Technology Assessment for Near Term Deployment* IAEA, 2022-08-08 This publication explains how a reactor technology assessment is performed and how the process and its results enable decision making for nuclear power planning and implementation at each of its phases The methodology has been revised to incorporate developments since the first edition in 2013 and includes feedback from comprehensive training workshops offered for the last six years to Member States introducing nuclear power programmes The aim of this publication is to help newcomer Member States to understand the complexity involved in the selection of the most suitable reactor technology as well as obligations and responsibilities integral to an unbiased assessment The publication can also be used by countries that already have nuclear power programmes to assist in their selection of the next nuclear power plant

Spent Nuclear Fuel

Management ,2000 Radioactive Waste Management ,1981 **NUCLEAR SPENT FUEL MANAGEMENT - EXPERIENCE AND OPTIONS - A REPORT BY AN EXPERT GROUP.** Organisation for Economic Co-operation and Development,1986 *Plutonium and Security* Dr. Frank Barnaby,1992-06-18 The contributors to this text discuss the cases for and against the reprocessing of spent reactor fuel elements to remove the plutonium from them Global Problems and Common Security Josef Rotblat,Vitalii I. Goldanskii,2012-12-06 After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips an agreement to abolish completely two categories of nuclear weapons the INF Treaty was signed and is now being implemented This historical event the first actual destruction of deployed nuclear missiles although not of their warheads became possible largely because of the radical changes in the policies of the Soviet Union the new way of thinking advanced by its leader Mikhail Gorbachev The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty Another no less important factor was the acceptance by the Soviet Union of on site inspections as a basic element of a verification system essential to ensure compliance with the Treaty This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty which in turn contributed to the further lessening of tension between East and West But perhaps the most important factor one which carries much promise for the future was the changed approach to security problems **The OECD Observer** Organisation for Economic Co-operation and Development,1989 Bulletin of the Atomic Scientists ,1990-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Proliferation and Arms Control** United States. Congress. House. Committee on Foreign Affairs,1991 **Bulletin of the Atomic Scientists** ,1990-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Guidebook on Spent Fuel Storage Options and Systems** IAEA,2024-01-31 This publication is a new edition of Technical Reports Series No 240 Guidebook on Spent Fuel Storage 1991 It aims to provide guidance on spent fuel storage options describing the history and observed trends of spent fuel storage technologies gathering operational experiences and lessons learned The evolving aspects related to higher burnup and mixed oxide MOX spent fuel and the extension of storage timeframes are detailed It also includes information on the distribution of the current global inventory of spent fuel by storage systems a description of and terminology relating to available spent fuel storage technologies and different storage facility locations Management and Disposition of Excess Weapons Plutonium National Academy of Sciences,Committee on International Security and Arms Control,Panel on Reactor-Related Options for the

Disposition of Excess Weapons Plutonium,1995-08-06 Within the next decade many thousands of U S and Russian nuclear weapons are slated to be retired as a result of nuclear arms reduction treaties and unilateral pledges Hundreds of tons of plutonium and highly enriched uranium will no longer be needed for weapons purposes and will pose urgent challenges to international security This is the supporting volume to a study by the Committee on International Security and Arms Control which dealt with all phases of the management and disposition of these materials This technical study concentrates on the option for the disposition of plutonium looking in detail at the different types of reactors in which weapons plutonium could be burned and at the vitrification of plutonium and comparing them using economic security and environmental criteria
