Congress. House. Committee on Energy and Commerce. Subcommittee on Energy and Power, 1989 *The Moscow Summit* Ronald Reagan, United States. President (1981-1989 : Reagan), 1988 Primarily remarks made by President Reagan on his May 25 June 30 1988 trip to Helsinki Moscow and London Also includes remarks by Soviet President Mikhail Gorbachev *Controversies in Globalization: Contending Approaches to International Relations, 2nd Edition* Peter M. Haas, John A. Hird, 2013 Debate style readers can be powerful teaching tools but only if the readings really speak to one another otherwise the crux of the debate is lost on students Peter M Haas and John M Hird's *Controversies in Globalization* solves this issue by inviting 17 pairs of scholars and practitioners to write specifically for the volume directly addressing key questions in international relations through concise yes and no pieces on topics related to security political economy the environment public health democracy demography and social issues At the request of reviewers new to this edition are three chapters covering the financial crisis maritime security and international conflict Chapter headnotes written by the editors effectively frame each debate and make clear what is at stake from both theoretical and practical perspectives Concluding discussion questions in each chapter encourage critical thinking and analysis *Global Forecast 2014* Craig Cohen, Kathleen Hicks, Josiane Gabel, 2013-11-18 After a dozen years of war the 2008 financial crisis budgetary contraction inside government and growing political polarization U S security policy stands at a crossroads as America finds itself lacking a durable political consensus on the nation's role in the world In *Global Forecast 2014* CSIS scholars answer the questions that will determine the future trajectory of American power in 2014 and beyond The report looks overseas at America's ability to sustain its rebalance to Asia and adapt to the changing order in the Middle East At the same time the authors examine America's ability to get its own house in order to develop a sustainable resource strategy for defense and to rebuild a national security consensus to meet the challenges the United States will face in the years ahead **Power Plays** Christopher Hubbard, 2016-03-23 A comprehensive exploration of how national and state security policy is effected by the production storage transportation safeguarding export and use of enriched uranium and by extension plutonium A wide range of geopolitical security and technical issues are examined as are the challenges presented to national and global governance This book contributes to a

new understanding of one of the most serious security implications inherent in the current rapid growth in nuclear power generation. It assesses attempts made to deal with the latent dangers to Homeland Security posed by potential misuse of enriched uranium and plutonium considering both the chances for success and the costs of failure. **Security and Safety in the Era of Global Risks** Radomir Compel, Rosalie Arcala-Hall, 2021-07-28. The concept of risk in global life has not been fully understood and explored and this book attempts to examine what it entails in the fast changing interconnected and complex world. As a foundational component of safety systems, risk has been considered relatively simple, predictable and therefore assessable and manageable phenomenon. Social and political sciences prefer the terminology of security to capture the dimension of risk which is more complex and more consequential to survival. Risk has become more human made and intentional today and this book explores innovative approaches and engages in theoretical and policy debates to capture its political and security dimensions. **100% Clean, Renewable Energy and Storage for Everything** Mark Z.

Jacobson, 2020-10. Textbook on the science and methods behind a global transition to 100% clean renewable energy for science engineering and social science students. *America Coming to Terms: The Vietnam Legacy* Nguyen Anh Tuan, 2008-12-23. Douglas Pike, an eminent authority on Southeast Asia and particularly on Vietnam, wrote Dr. Nguyen Anh Tuan is a highly respected economist and political thinker. Even perhaps for our purpose here, he is a man of great breadth of view, a philosopher in the true meaning of the word. In *America Coming to Terms*, Dr. Nguyen Anh Tuan addresses himself to the central issue of the Vietnam War. This ambitious study seeks to place the U.S. involvement in Vietnam into the broader context of American and world history. The legacy of the Vietnam War remains a critical topic, particularly with the war in Iraq generating the specter of conflicting partisan politics in a deeply divided country. America's involvement in Vietnam was misunderstood at the time and is still misrepresented now. As the Iraq War often invites comparisons with the Vietnam War, a full understanding of the U.S. experience in Vietnam is essential. More importantly, lessons learned from Vietnam can be applied to Iraq at present as well as to any U.S. conflict in the future. *America Coming to Terms* will help the American public to better understand the real legacy of the Vietnam War. It will provide Americans, liberal as well as conservative Democrat as well as Republican, with substantive reasons to be united and to be proud of America. Most importantly, it will meaningfully impact the writing of American history for future generations and change for the better the world's perception of the American people and of America. Steven Hayward, a most distinguished scholar, wrote: Revisionist historians two or three generations from now are likely to begin making the argument that the United States won the ultimate victory in the Vietnam War and that it should be seen as the turning point in the Cold War. In *America Coming to Terms*, Dr. Tuan sets the record straight that notwithstanding a number of mistakes that were committed, not only America won the Cold War but ultimately also won the Vietnam War. **New Global Dangers** Michael Edward Brown, 2004. Command of the commons: the military foundation of U.S. Hegemony. Barry R. Posen. Why do states build nuclear weapons? Three models in search of a bomb. Scott D.

Improving Metrics for the Department of Defense Cooperative Threat Reduction Program National Academy of Sciences, Committee on International Security and Arms Control, Cooperative Threat Reduction Program, Committee on Improving Metrics for the Department of Defense, 2012-02-20 The Cooperative Threat Reduction CTR Program was created in 1991 as a set of support activities assisting the Former Soviet Union states in securing and eliminating strategic nuclear weapons and the materials used to create them The Program evolved as needs and opportunities changed Efforts to address biological and chemical threats were added as was a program aimed at preventing cross border smuggling of weapons of mass destruction CTR has traveled through uncharted territory since its inception and both the United States and its partners have taken bold steps resulting in progress unimagined in initial years Over the years much of the debate about CTR on Capitol Hill has concerned the effective use of funds when the partners would take full responsibility for the efforts and how progress impact and effectiveness should be measured Directed by Congress the Secretary of Defense completed a report describing DoD's metrics for the CTR Program here called the DoD Metrics Report in September 2010 and as required in the same law contracted with the National Academy of Sciences to review the metrics DoD developed and identify possible additional or alternative metrics if necessary Improving Metrics for the DoD Cooperative

Threat Reduction Program provides that review and advice Improving Metrics for the DoD Cooperative Threat Reduction Program identifies shortcomings in the DoD Metrics Report and provides recommendations to enhance DoD s development and use of metrics for the CTR Program The committee wrote this report with two main audiences in mind Those who are mostly concerned with the overall assessment and advice and those readers directly involved in the CTR Program who need the details of the DoD report assessment and of how to implement the approach that the committee recommends Future Survey Annual 1986 Michael Marien,1987-01-01 **Risk Assessment in Setting National Priorities** James J. Bonin,Donald E. Stevenson,2013-03-08 The growing perception of the public and politicians that life is extremely risky has led to a dramatic and increasing interest in risk analysis The risks may be very diverse as demonstrated by the range of subjects covered at the annual meetings of the Society for Risk Analysis There is a need to pause and see how well the present approaches are serving the nation The theme Setting National Priorities which was chosen for the 1987 SRA Annual Meeting reflects the concern that in dealing with individual kinds of risks society may be more concerned with the trees than the forest It is surprising how little attention is being given to the holistic aspects of risk Who for instance is responsible for a national strategy to manage the reduction of health or other risks Individual agencies have the responsibility for specific patterns of exposure but these are not integrated and balanced to determine how the nation as a whole can obtain the greatest benefit for the very large investment which is made in risk related research and analysis *Public Papers of the Presidents of the United States* United States.
