Nuclear Weapons Free Zones:

Nuclear Weapons-Free Zones Ramesh Thakur, 2016-07-27 Almost the entire southern hemisphere is now covered by nuclear weapon free zones. The ones in Latin America and the South Pacific were established during the Cold War; those in Southeast Asia and Africa after its ending. Zones have also been proposed so far without success for the Middle East, South Asia, and Northeast Asia. In this book, analysts from within the respective regions explore the reasons for success and failure in the establishment of the zone and their utility and limitations as stepping stones to a nuclear weapon free world.

Nuclear Weapons Free Zones Exequiel Lacovsky, 2021-03-09 This book explores the conditions under which Nuclear Weapons Free Zones (NWFZs) can be established. It analyzes four hypotheses that explain the factors contributing to the formation of NWFZs, building upon realist, constructivist, and liberal theories from international relations. Through structured, focused comparison, the book presents and compares the emergence of NWFZs in Latin America, the South Pacific, Southeast Asia, Africa, Central Asia, and the Middle East, which is a prospect for a NWFZ. The book argues that NWFZ projects depend on the following conditions: the security interest of regional states in avoiding nuclear threats; preexisting regional institutions and regional economic cooperation; leadership by a core of regional powers and shared interest in spreading non-proliferation norms. Democracy is not a necessary condition, but democratization can help overcome barriers presented by hesitant or opposed regional governments. As too many of the mentioned necessary conditions are lacking in the Middle East, a NWFZ project thus will be possible only after major political changes. This book will be of much interest to students of nuclear proliferation, arms control, security studies, and International Relations.

Nuclear-Free Zones David Pitt, Gordon Thompson, 2020-11-19 There is growing interest world wide in nuclear free zones. Originally published in 1987, this book explores the question of what constitutes a nuclear free zone and charts the progress of the movement to establish them. The book shows how definitions of nuclear free zones vary from those intended to exclude everything nuclear, including nuclear power installations and the dumping of nuclear waste, to those aiming to exclude nuclear weapons in a limited way. Special attention is paid to the three treaties which have established major international nuclear free zones: Latin America, South Pacific, Antarctica, examining their strengths and weaknesses as well as areas where the idea has been proposed. Balkans, Africa. The book concludes with a review of problems and prospects for the future.

Nuclear-weapon-free Zones in the 21st Century G. Alves, Daiana Cipollone, 1997 *The Alternate Route* Thomas Graham, 2017 Eventual achievement of nuclear disarmament has been an objective and a dream of the world community since the dawn of the Nuclear Age. Considerable progress has been made over the decades, but this has always required close US-Russian cooperation. At present, further progress is likely blocked by the return of Vladimir Putin to the Russian presidency and the toxic US-Russia relationship. The classic road toward nuclear disarmament appears to be closed for the foreseeable future, but there may be another route. In the last fifty years, well conceived regional treaties have been developed in Latin America, the South Pacific,

Africa Southeast Asia and Central Asia These arrangements have developed for many and varied political and security reasons but now virtually all of the Southern Hemisphere and important parts of the Northern Hemisphere are legally nuclear weapon free These regional nuclear weapon disarmament treaties are formally respected by the five states recognized under the Non Proliferation Treaty NPT as nuclear weapon states the United States the United Kingdom Russia France and China often referred to collectively as the P 5 states Variations of these regional treaties might eventually be negotiated in the Middle East Northeast Asia and South Asia setting aside the P 5 states until the very end of the process With regional agreements in place around the globe negotiation among the P 5 states would be all that stands between the world community and the banishment of nuclear weapons verifiably and effectively worldwide By the time this point is reached Russia and the United States might be able to cooperate Essential reading for policy advisors foreign service professionals and scholars in political science The Alternate Route examines the possibilities of nuclear weapon free zones as a pathway to worldwide nuclear disarmament Nuclear Weapon-free Zones (NWFZs) Canadian Institute for International Peace and Security,1989 This document discusses a number of definitions of nuclear weapon free zones NWFZ their benefits criticism of NWFZ and Canada and NWFZ It includes a list of papers for further reading **Regional Initiatives on Nuclear- and WMD-free Zones** Michael Hamel-Green,2005 The initial years of the new millennium have seen little substantive progress in nucleararms control Recent challenges for nuclear non proliferationinclude the non entry into force of the Comprehensive Test Ban Treaty CTBT the 1998India and Pakistan nuclear weapon tests the withdrawal of North Korea from the NonproliferationTreaty NPT the ambiguous status of Iran s nuclear energy developmentprogramme and past Iraqi NPT violations under Saddam Hussein The strategy of establishing regional NWFZs is generally seen as both a non proliferation and security enhancing measure for the regions themselves and as a partial step towards the eventual global elimination of nuclear weapons Currently some 107 countries and the larger part of the globe are part of regional NWFZs while NWFZs for such conflict prone areas such as the Middle East South Asia Northeast Asia and Central and Eastern Europe are in various stages of consideration *International Law and the Arctic* Michael Byers,James Baker (Arctic scholar),2013 Sets out the international law relevant to the Arctic from Indigenous peoples to environmental protection to oil and gas exploration **Congressional Delegates at the 1979 United Nations General Assembly** United States. International Cooperation on WMD Nonproliferation Jeffrey W. Knopf,2016-02-15 International efforts to prevent

the spread of weapons of mass destruction WMD including nuclear biological and chemical weapons rest upon foundations provided by global treaties such as the Nuclear Non Proliferation Treaty NPT and the Chemical Weapons Convention CWC Over time however states have created a number of other mechanisms for organizing international cooperation to promote nonproliferation Examples range from regional efforts to various worldwide export control regimes and nuclear security summit meetings initiated by U S president Barack Obama Many of these additional nonproliferation arrangements are less formal and have fewer members than the global treaties International Cooperation on WMD Nonproliferation calls attention to the emergence of international cooperation beyond the core global nonproliferation treaties The contributors examine why these other cooperative nonproliferation mechanisms have emerged assess their effectiveness and ask how well the different pieces of the global nonproliferation regime complex fit together Collectively the essayists show that states have added new forms of international cooperation to combat WMD proliferation for multiple reasons including the need to address new problems and the entrepreneurial activities of key state leaders Despite the complications created by the existence of so many different cooperative arrangements this collection shows the world is witnessing a process of building cooperation that is leading to greater levels of activity in support of norms against WMD and terrorism
