Nuclearfree Defence:

Security with Nuclear Weapons? Regina Cowen Karp, 1991 SIPRI Stockholm International Peace Research Institute is an independent institute for scientific research which aims to further an understanding of the conditions for peaceful solutions to international conflicts and for a stable peace Over the past twenty years SIPRI has concentrated on problems of armaments disarmament and arms regulation SIPRI is financed mainly by the Swedish Parliament Its staff the Governing Board and the Scientific Council are international The prospect of large reductions of nuclear weapons poses fundamental questions about the purpose of nuclear weapons Why have some states chosen to acquire nuclear weapons How and why have these decisions been maintained over time Why have some states elected to approach but not cross the nuclear threshold This book examines the commonalities and differences in political approaches to nuclear weapons both within and among three groups of states nuclear non nuclear and threshold The chapters explore the evolution of thinking about nuclear weapons and the role these weapons play in national security planning The book transcends traditional East West approaches to analysis of nuclear issues by giving equal prominence to the issues of nuclear proliferation and non nuclearism The book also provides a comprehensive analysis of how current approaches to nuclear weapons have evolved both within and among the countries under study

Nuclear Weapons and International Security Ramesh Thakur, 2015-02-11 This volume brings together more than three decades of research and writings by Professor Ramesh Thakur on the challenges posed by nuclear weapons Following an introduction to the current nuclear state of play the book addresses the challenge of nuclear weapons in three parts Part I describes the scholar practitioner interface in trying to come to grips with this challenge the main policy impact on security strategy and the various future nuclear scenarios Part II addresses regional nuclear challenges from the South Pacific to East South and West Asia and thereby highlights serious deficiencies in the normative architecture of the nuclear arms control and disarmament regime In the third and final part the chapters discuss regional nuclear weapon free zones NPT anomalies and their implications for the future of the nuclear arms control regime and finally assess the global governance architecture of nuclear security in light of the three Nuclear Security Summits between 2010 and 2014 The concluding chapter argues for moving towards a world of progressively reduced nuclear weapons in numbers reduced salience of nuclear weapons in national security doctrines and deployments and ultimately a denuclearized world This book will be of much interest to students of nuclear proliferation global governance international organisations diplomacy and security studies

Objections to Nuclear Defence Nigel Blake, Kay Pole, 2020-11-19 Moral and political questions are vitally relevant to the issue of survival in the nuclear age Ethics has much to teach us about the meaning of national defence and civic responsibility in the nuclear state For instance those in NATO who argue for increased spending on such weapons do so with the intention of defending the values of the West They must therefore be absolutely sure that they are not as the contributors to this volume originally published in 1984 powerfully suggest undermining or

destroying those values by the very means they adopt to preserve them With the continued success of nuclear deterrence itself in question responsible citizens feel an urgent need to assess the clash between personal doubts cherished principles and their governments loudly voiced moral certainties In *Objections to Nuclear Defence* professional philosophers of widely varying persuasions provide new analyses of these problems They spell out clearly and vividly the moral and political objections objections to the concrete nuclear policies of the Western governments today Often impassioned but always rational the book will be of special interest to students of international affairs peace studies and applied philosophy as well as to the general reader who is trying to choose between political parties in Europe or North America Security Without Nuclear Weapons? Stockholm International Peace Research Institute,1992 This book examines the question Is the elimination of nuclear weapons feasible Individual chapters address the major conceptual technical and economic issues in the design of a non nuclear security regime Other chapters explore more specialized issues as they relate to the feasibility of the elimination of nuclear weapons elite perceptions and the decision making process verification nuclear proliferation fissile materials and warheads alliance and regional hegemonies and deterrence *Nuclear Defence* Gurmeet Kanwal,2001 This book suggests a comprehensive national security strategy for the nuclear environment recommends a counter value targeting philosophy for a retaliatory Indian nuclear strike and examines whether tactical nuclear weapons would serve any useful purpose Nuclear Weapons And Security Jonathan Medalia,2019-03-07 This book presents the debate on the test ban issue Its first goal is agreement on effective verification measures to make it possible to ratify the Threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty Nuclear-free Defence Louis Mackay,David Fernbach,1983 **Tactical Nuclear Weapons and Euro-Atlantic Security** Paolo Foradori,2013-07-18 This book offers a comprehensive examination of the important security issue of tactical nuclear weapons in Europe Nuclear nonproliferation and disarmament have returned to the top of the international political agenda The issue assumes particular importance in regard to NATO given that some 150 200 US tactical nuclear weapons TNWs are still present in five countries belonging to the Alliance Belgium Germany Italy the Netherlands and Turkey The past few years have seen animated debate in the United States and Europe on the role of such weapons in the current scenario of international security and whether they can be further reduced or completely removed from Europe Bringing together leading scholars and analysts of TNW with country specific competences this volume improves our understanding of this debate by providing in depth analysis of the presence role perceived value and destiny of TNWs in Europe The book addresses the issue in a systematic manner taking into account the perspectives of all main actors directly or indirectly involved in the debate This approach provides new and important insights that can inform both theoretical and policy work on a very critical and timely international issue especially during the ongoing review of NATO s deterrence and defence posture This book will be of much interest to students of European politics European security nuclear proliferation and IR in general **Parliamentary Debates. Legislative Council and House of Representatives** New

Zealand. Parliament,1986 **Development, Use, and Control of Nuclear Energy for the Common Defense and Security and for Peaceful Purposes: First Annual Report to the United States Congress by ... Pursuant to Section 202(b) of the Atomic Energy Act, as Amended** United States. Congress. Atomic Energy Joint Committee,1975 **The Case for U.S. Nuclear Weapons in the 21st Century** Brad Roberts,2023-05-25 An excellent contribution to the debate on the future role of nuclear weapons and nuclear deterrence in American foreign policy Contemporary Security Policy This book is a counter to the conventional wisdom that the United States can and should do more to reduce both the role of nuclear weapons in its security strategies and the number of weapons in its arsenal The case against nuclear weapons has been made on many grounds including historical political and moral But Brad Roberts argues it has not so far been informed by the experience of the United States since the Cold War in trying to adapt deterrence to a changed world and to create the conditions that would allow further significant changes to U S nuclear policy and posture Drawing on the author s experience in the making and implementation of U S policy in the Obama administration this book examines that real world experience and finds important lessons for the disarmament enterprise Central conclusions of the work are that other nuclear armed states are not prepared to join the United States in making reductions and that unilateral steps by the United States to disarm further would be harmful to its interests and those of its allies The book ultimately argues in favor of patience and persistence in the implementation of a balanced approach to nuclear strategy that encompasses political efforts to reduce nuclear dangers along with military efforts to deter them Well researched and carefully argued Foreign Affairs British Nuclear Mobilisation Since 1945 Jonathan Hogg,Kate Brown,2021-05-18 This book explores aspects of the social and cultural history of nuclear Britain in the Cold War era 1945 1991 and contributes to a more multivalent exploration of the consequences of nuclear choices which are too often left unacknowledged by historians of post war Britain In the years after 1945 the British government mobilised money scientific knowledge people and military industrial capacity to create both an independent nuclear deterrent and the generation of electricity through nuclear reactors This expensive and vast technopolitical project mostly top secret and run by small sub committees within government was central to broader Cold War strategy and policy Recent attempts to map the resulting social and cultural history of these military industrial policy decisions suggest that nuclear mobilisation had far reaching consequences for British life The chapters in this book were originally published as a special issue of Contemporary British History **Australia and Nuclear War** Michael Denborough,2020-11-19 I pray that words spoken at this conference may carry beyond walls and reach thousands of ears hitherto deaf to warnings of the final catastrophe So said Patrick White in June 1983 at an important symposium organised by the Australian National University to examine the whole issue of nuclear war and its implications for Australia Many prominent Australians including H C Coombs Senator Susan Ryan leading academics and medics attended the conference along with distinguished experts from overseas and mingled and talked with many representatives of Australian peace

movements In two intense and emotional days they discussed many different aspects of the crisis that threatens the world from the latest scientific thinking on possible effects on the atmosphere to the increasingly important role of the women s peace movement and the efforts of ordinary people around the world to stop the nuclear arms race Originally published in 1983 this book presents the upshot of these deliberations including unforgettable illustrations of some of the consequences of nuclear war The book does not pretend to provide the answers nor does it take any political viewpoint It does present the authoritative opinions of some of the world s leading minds on the extent of the threat that faces Australia alongside powerful statements from committed men and women from around the world opinions that will inform and disturb all thinking

Australians **Pakistan's Nuclear Policy** Zafar Khan,2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region s changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan s nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence The book not only highlights Pakistan deterrent force building but also analyzes closely Pakistan s doctrinal posture of first use option Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan s post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research *The Politics of Nuclear Weapons*

Andrew Futter,2015-02-18 This book provides an introduction to political and strategic aspects of nuclear weaponry It offers an accessible overview of the concept of nuclear weapons outlines how thinking about these weapons has developed and considers how nuclear threats can continue to be managed in the future It includes Coverage of nuclear testing proliferation strategy global actors and disarmament Analysis of contemporary topics such as nuclear terrorism A timeline of key nuclear events Annotated further reading lists helping you to locate sources for essays and assignments Summaries study questions

and a glossary of key terms Free SAGE journal articles available on the Resources tab The author will be providing regular updates to his suggested web resources so be sure to check the Resources tab for the most up to date The Politics of Nuclear Weapons is essential reading for both undergraduate and postgraduate students taking courses in Nuclear Politics
