Collapse of Development Planning Peter J. Boettke, 1994-07-01 Addresses one of the most pressing issues of international political economy Conventional wisdom has it that government management of the economy is the means to transform a backward economy into a dynamic modern one Yet after decades of international aid programs development planning is today largely perceived as a failure paralyzed by its own bureaucracy and inefficiency Despite billions of dollars of investment development successes are few and far between and waste and mismanagement abounds This book showcases a diverse range of development experiences in order to ascertain the reasons for this quagmire Case studies of development planning in China India post WWII Japan South Korea Africa and Eastern Europe and of foreign aid programs including the Marshall Plan illustrate the insights an Austrian approach provides toward an understanding of the failure of government development planning While economists working within the Austrian tradition have previously addressed development issues this volume represents the first full length treatment of the subject from a modern market process perspective Exploding the hegemony of the traditional development paradigm The Collapse of Development Planning addresses one of the most pressing issues of international political economy Contributing to the volume are George Ayittey American University Wayne T Brough Citizens for a Sound Economy Washington DC Young Back Choi St John s University Steven Hanke Johns Hopkins University Steve Horwitz St Lawrence University Shyam J Kamath California State University Hayward Shigeto Naka Hiroshima City University David Osterfeld St Joseph s College Manisha Perera University of Northern Colorado Jan S Prybyla Pennsylvania State University Ralph Raico State University College Buffalo Parth Shah University of Michigan Dearborn Kurt Schuller Johns Hopkins University Kiyokazu Tanaka Sophia University Tokyo and Mark Thorton Auburn University

Corruption in Africa John Mukum Mbaku, 2007-02-15 Corruption in Africa makes a significant contribution to the study of the impacts and eradication of corruption in African societies John Mukum Mbaku offers a comprehensive analysis of the causes of public malfeasance in African countries and provides a number of practical and effective policy options for change This book demonstrates the destructive relationship between corruption and the abrogation of economic freedoms and entrepreneurship a system that has clearly left Africa as one of the most deprived regions in the world Utilizing the tools of public choice theory Mbaku emphasizes the important role that institutions have in corruption control and he recommends reconstructive democratic constitutions as the most effective means of development Until African states provide their people with institutional arrangements that adequately constrain the state and enhance wealth production the living standards in the continent will continue to deteriorate Corruption in Africa is

a fascinating and informative text that will appeal to those interested in African studies and developmental policies

African Renaissance in the Millennium Emmanuel Ike Udogu, 2007-01-01 The book brings into sharp focus some of the major political social and economic issues that might impede Africa's development project in the 21st century. The Classical Liberal Case for Israel Walter E. Block, Alan G. Futerman, 2021-11-02 This book offers a unique perspective on the State of Israel based on classical liberalism both on a historical and theoretical level. Specifically, it makes a classical liberal and libertarian analysis based upon homesteading and private property rights to defend the State of Israel. As such, this work explores the history of the Jewish State both to provide a positive case for its right to exist and to clarify the myths surrounding its origin and development. At the same time, it deals with other relevant related subjects such as the complex situation between Israel and the Palestinian Arabs, the military campaigns against the Jewish State, the connection between anti-Zionism and anti-Semitism, and Israel's economic miracle. The thorough analysis presented in this work intends to show not only why the voices and movements against Israel are wrong, including the Boycott, Divestment, and Sanctions movement (BDS), but more importantly, why Israel is an example of human flourishing and freedom that every advocate for liberty should celebrate. The Classical Liberal Case for Israel makes the practical and moral case for Israel. It is based on truths and facts that need to be repeated over and over. Block and Futerman understand that the only way to defeat a big lie is with a big truth. Benjamin Netanyahu, Prime Minister of the State of Israel, Jerusalem, Israel. Classical Liberalism, often associated with the spread West from Northern Europe in creating free nations, is argued here as applying to Israel with ancient roots in the principles of human freedom. Vernon L. Smith, Ph.D., Nobel Prize in Economic Sciences, 2002, and Professor George L. Argyros, Endowed Chair in Finance and Economics, Professor of Economics and Law, Smith Institute for Political Economy and Philosophy at Chapman University.

Development in Nigeria Edlyne Eze Anugwom, 2020-04-13 This book unravels the trajectories and dilemmas of development in Nigeria since its independence in 1960. Despite enormous human and material resources, development progress in Nigeria has not met expectations. By delving into the various factors that have influenced development efforts and initiatives, *Development in Nigeria: Promise on Hold* aims to draw out lessons to help the country to achieve its potential. In many ways, Nigeria typifies the African puzzle of near misses: a never-ending drive towards development with enormous promise but no real practical output. As in many states within Africa, these failures can be traced to structural inadequacies and the perennial weakness of public institutions. Problems which collectively undermine sustainable development and growth include political corruption, ethnicity, failure of public institutions, distributional injustice, fiscal centralism in a purported federal state, faulty democratic traditions, malevolent elite class, religious and social conflicts, among others. By taking a comprehensive panoramic overview of the country's historical experience as both a military dictatorship and democracy, Edlyne Eze Anugwom presents a nuanced, comprehensive, and

contemporary interrogation of the ever dynamic forces and factors in Nigeria's development project. This book's incisive examination of Nigeria's development aspirations over time will be of interest to students of Development and African Studies as well as to practitioners and multilateral agencies involved in development planning and intervention in Nigeria who are looking for strategies for overcoming the challenges facing the country.

Blockchain in the Global South Nir Kshetri, 2023-07-14. This book discusses the unique and unusual characteristics of the blockchain and the industries and markets affected by this technology in the Global South. Its main objectives are to: 1. provide a comprehensive review of economic, health, social, political, entrepreneurial, and environmental impacts of blockchain; 2. present evidence from countries, industries, and firms to broaden the understanding of the contexts, mechanisms, and outcomes associated with blockchain projects; and 3. analyze the enablers and opportunities that can be tapped and barriers that may impede the implementation of blockchain projects in these economies. Given that in many ways blockchain has a much higher value proposition for economies in the Global South than for their counterparts in the more developed Global North, it has the potential to make up for the lack of effective formal institutions, rules, laws, regulations, and their enforcement, as well as improve administrative aspects such as maintenance of standards, monitoring, and compliance. This work fills a gap in scholarly research and will appeal to researchers interested in the potential of blockchain to boost entrepreneurship, reshape governance, improve supply chain efficiency, and curb corruption in emerging economies.

Protecting Human Security in Africa Ademola Abass, 2010-09-23. *Protecting Human Security in Africa* discusses some of the most potent threats to human security in Africa. It deals especially with those threats to the security of African people which are least understood or explored. In themes varying from corruption, the proliferation of small arms and light weapons, food security, the devastation of internal displacement in Africa, the link between natural resources and human security, to the problems of forced labour, threats to women's security, and environmental security, the book examines the legal and policy challenges of protecting human security in Africa. This work also analyses the role of NGOs and the civil society in advocating human security issues in Africa. It considers the role of regional human rights mechanisms and judicial bodies such as the African Commission for Human Rights and the African Court of Human and Peoples Rights in seeking to guarantee human security in Africa. Finally, with particular reference to the Somalia, Zimbabwe, Kenya, and Darfur crises, the book studies the role of African regional organizations, especially the African Union, in protecting the human security of Africans. Written by leading experts on its

various themes this is an indispensable book for all those seeking to learn more about the real challenges facing Africans and African organizations **The Revolution in Development Economics** James A. Dorn, Steve H. Hanke, Alan A.

Foundations of Economics Shawn Ritenour, 2010-01-01 Foundations of Economics A Christian View is an introduction to economics from an explicitly Christian perspective It maintains that there is no conflict between Christian doctrine and economic science properly understood Therefore Foundations of Economics has three goals to demonstrate that the foundations of economic laws are derived from a Christian understanding of nature and humanity to explain basic economic principles of the market economy and apply them to various economic problems such as poverty and economic development and to show the relationship between Christian ethics and economic policy Foundations of Economics A Christian View accomplishes these goals by rooting the fundamental principles of human action in the Christian doctrines of creation and humanity and integrating them with the Christian ethic of private property This volume explains the relevance of economics for fulfilling the cultural mandate set forth in the first two chapters of Genesis by demonstrating how economics can help us in our task to be fruitful and multiply and have dominion over the earth without spoiling creation starving to death or descending into a barbaric struggle for survival

The Labors of Sisyphus Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People's Republic of China In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China In that time too the PRC's most powerful ally and mentor the Soviet Union has dismantled and announced that communism had failed Today China fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism It is a country precariously suspended between past and future Maria Hsia Chang's The Labors of Sisyphus is a long overdue reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also explains China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone
