Psychological Development And Early Childhood:

Early Education and Psychological Development Barbara Biber, 1987-03-01 Everyone who is concerned about the early years of development in children will find Dr Biber's book *Early Education and Psychological Development* intensely absorbing. It is a fascinating sharing of her experience as a major leader in early education over more than a half century at a time when implications of Dewey's thought and that of Freud, Watson, Piaget were enriching and stimulating the thinking of educators and leaders in the field of child care. The intimate autobiographical context of her historical psychological and philosophical discussion plunges the reader into the very process of discovering new awarenesses of the complexity of child development. This is a unique book; it will be a classic to give perspective to the present generation and those to follow. Lois Barclay Murphy. In this marvelous book we have a record of the evolution of Barbara Biber's thinking on early childhood education and the personal scientific and intellectual forces which shaped her thought. It will be obvious to all who read this book why Biber has long been regarded as the premier worker in the field of early childhood education. Edward Zigler from the Foreword. No other volume in the literature of early education brings together the reflections of an outstanding leader as they have developed over a period that is almost equivalent to the history of the field. A richly detailed and intimate picture of the construction of a knowledge base for the education of young children. Millie Almy. *American Journal of Education*.

Social and Emotional Development in Infancy and Early Childhood Janette B. Benson, Marshall M. Haith, 2010-05-21 Research is increasingly showing the effects of family, school and culture on the social, emotional and personality development of children. Much of this research concentrates on grade school and above but the most profound effects may occur much earlier in the 0-3 age range. This volume consists of focused articles from the authoritative *Encyclopedia of Infant and Early Childhood Development* that specifically address this topic and collates research in this area in a way that isn't readily available in the existent literature covering such areas as adoption, attachment, birth order, effects of day care, discipline and compliance, divorce, emotion regulation, family influences, preschool routines, separation anxiety, shyness, socialization, effects of television etc. This one volume reference provides an essential, affordable reference for researchers, graduate students and clinicians interested in social psychology and personality as well as those involved with cultural psychology and developmental psychology. Presents literature on influences of families, school and culture in one source saving users time searching for relevant related topics in multiple places and literatures in order to fully understand any one area. Focused content on age 0-3 save time searching for and wading through lit on full age range for developmentally relevant info. Concise, understandable and authoritative for immediate applicability in research.
