Learning to Pray in a Dead Language: Education and Invocation in Ancient Sumerian
Joshua Bowen, 2020-10-23

The connection between prayer and schools has been a hot button issue in the United States since their official separation in 1962. Many are in favor of restoring prayer in schools; others, however, find the idea inappropriate. In the ancient world, there was no such distinction between the secular and the sacred, between the schoolhouse and the sanctuary. In ancient Iraq in the early second millennium BCE, a time known as the Old Babylonian period, we see that schools were not only places of learning about things like writing, grammar, and mathematics but also about a wide variety of religious concepts. This book, compiled from Dr. Bowen's 2017 Ph.D. thesis, explores the profound effect education had upon the practice of prayer in second millennium Mesopotamia, shaping traditions and perceptions that resonate through history to our understanding of Judeo-Christian religion today. This book will provide a detailed overview of schooling in second millennium BCE Mesopotamia and how the school curriculum differed from city to city. Discuss the importance of the prayers of priests who were responsible for averting disaster through calming the hearts of angry gods. Show how a standardized scribal curriculum impacted religious tradition, which in turn influenced the writers of the Old Testament and ultimately western civilization.

Traveler Response to Transportation System Changes, 2003

The third edition, *Traveler Response to Transportation System Changes Handbook*, provides comprehensive information on travel demand, effects of alternative urban transportation policies, operating approaches and systems, and built environment options by building upon, expanding, and selectively replacing the earlier editions to provide a contemporary assessment of the experience and insights gained from the application and analysis of various system changes and alternatives. The focus is on aiding transportation transit and land use planners in their conduct of travel demand and related analyses and to inform elected officials, administrators, operators, designers, and the general public as well. The *Traveler Response to Transportation System Changes Handbook* consists of the Chapter 1 introductory materials and 15 stand-alone published topic area chapters. Each topic area chapter provides traveler response findings, including supportive information and interpretation, and also includes case studies and a bibliography consisting of the references utilized as sources. Please note that Chapters 4, 7, and 8 have been deferred for a future TCRP project effort. The Handbook findings derive primarily from reported results and analyses of real-world transportation system and policy applications and trials. Experimental or quasi-experimental empirical data have been the information source of choice. Other empirical data derivations and simple accounts of outcomes have been employed as necessary. Forecasts and

other estimates derived from travel demand model applications and similar techniques have been used but on a very selective basis mostly for augmenting the empirical data where gaps exist and for providing additional insights and context
