Middle Ages Geraldine Heng,2018-03-08 In *The Invention of Race in the European Middle Ages* Geraldine Heng questions the common assumption that the concepts of race and racism only began in the modern era Examining Europe's encounters with Jews Muslims Africans Native Americans Mongols and the Romani Gypsies from the 12th through 15th centuries she shows how racial thinking racial law racial practices and racial phenomena existed in medieval Europe before a recognizable vocabulary of race emerged in the West Analysing sources in a variety of media including stories maps statuary illustrations architectural features history saints lives religious commentary laws political and social institutions and literature she argues that religion so much in play again today enabled the positing of fundamental differences among humans that created strategic essentialisms to mark off human groups and populations for racialized treatment Her ground breaking study also shows how race figured in the emergence of homo europaeus and the identity of Western Europe in this time **Islamic**

Law in Action Kristen Stilt,2012-01-12 A dynamic account of the practice of Islamic law this book focuses on the actions of a particular legal official the muhtasib whose vast jurisdiction included all public behavior In the cities of Cairo and neighboring Fustat during the Mamluk period 1250-1517 the men who held the position of muhtasib acted as regulators of markets and public spaces generally They traversed their jurisdictions carrying out the duty to command right and forbid wrong and were as much a part of the legal landscape as the better known figures of judge and mufti Taking directions from the rulers the sultan foremost among them they were also guided by legal doctrine as formulated by the jurists combining these two sources of law in one face of authority The daily workings of the law are illuminated by the reports of the muhtasib in the vivid Mamluk era chronicles which often also captured the responses of the individuals who encountered the official The book is organized around actions taken by the muhtasib in the areas of Muslim devotional and pious practices crimes and offenses the management of Christians and Jews market regulation and consumer protection the specific markets for essential bread currency and taxes and public order The case studies presented show that while legal doctrine was clearly relevant to the muhtasib's actions the policy demands of the sultan were also quite significant and rules from both sources of authority intersected with social political economic and personal factors to create full and vibrant scenarios that reveal the practice of Islamic law *Islamic Empires* Linda Hill,2025-03-20 *Islamic Empires* explores how Islam fostered expansive

empires that profoundly influenced history and culture Delving into political evolution governance and cultural achievements the book reveals the sophisticated systems these empires used One intriguing aspect is how they integrated knowledge from conquered lands blending Greek philosophy and Roman administration into a unique Islamic framework Another is their commitment to using Islamic principles to promote economic prosperity and artistic innovation The book begins with the rise of Islam and early caliphates before analyzing major empires like the Abbasids Ottomans Safavids and Mughals Each section examines political structure economic systems and cultural contributions thereby offering a comprehensive narrative It demonstrates that Islamic civilization wasn't just about conquest but also about fostering advancements in various fields Concluding with an assessment of their lasting impact Islamic Empires offers a nuanced perspective on these diverse empires It highlights their shared commitment to Islamic principles and their collective contribution to global civilization This detailed exploration is especially valuable for those seeking a deeper understanding of world history and Islamic studies
