The Rabbit in the Moon Ginger Gage,Clo Ann Collette,2023-09-27 The Rabbit in the Moon book Have you not ever looked at the moon and said I see the man in the moon Well many of us see that there is a rabbit in the moon This cute short story is all about how the rabbit got to the moon in the first place The bunnies are sweet but playful and there is always that one who just has to try everything out for himself He lands right in the middle of trouble especially after momma rabbit told him not to do it The setting is on a little family farm in Kansas where lots of rabbits live The sweet old dog named Pooch who lives on the farm doesn t have much get up and go until It seems idyllic enough at the start but the tension grows as the chase is on How could one little rabbit get in so much trouble And how will he get out of it This brings us to the little girl that gets winked at by the rabbit and his request for her permission to jump off the moon and visit her in Grandma s garden Like most little girls faced with such a situation she s not sure what to say But the rabbit knows her Grandma so she lets him come sit

beside her She asks for the story of how such a little rabbit was able to jump so high he could land on the moon This is that story told by the rabbit himself Everyone needs a friend in the night so after you know the rabbit s story you will be able to see the rabbit in the moon and feel like you always have a friend nearby *The Rabbit in the Moon* ,1989-01-01 Rabbit s unselfish deed of offering himself for food to a hungry stranger is rewarded when he is placed in the moon for all to see

Rabbit and the Moon Douglas Wood,2001-06-01 Crane helps Rabbit fulfill his dream of riding across the sky to the moon *Archaeo-Astronometria* Dean Clarke,2008-10-23 There have been many books on the origin of astronomy some good and some very poorly address the issues of ancient man's interests in the stars The ancient Sumer and Egyptian notions of music mostly confirms how ancient this notion is in their chorded progressions of tone This notion is more an Upper Paleolithic celestial idea In a sense man during this time man was beginning to have a concept of north south east and west in spatial terms It involves the curvature of the ribs of Nut the Egyptian Sky Goddess as a ribbed vaulted sky and sometimes in a horizon sense of a bowing arch of a star's path or the curve of a bone in the star's moving path The half way point of this fall for say our Nut Adam and Eve would thus be about 27 000 BC which falls in a significant period Ice Age re emergence and a desert expanding in equator regions These are only a small part of what had to be addressed in origins of night sky studies The point being this piece as fake or not is that the components of the animals man plants and man's artifacts were very early on displayed We might ask in such a condition what was their night sky If we look at all of these constellations they fall below the Celestial Equator in the South Pole region mostly It would seem that all these birds to them being placed in the night sky like the stars and as they watched what directions the birds along with stars as to where they went in order to ascertain their relations to dusk or dawn night sky What caused the South Africa plight of 80 000 BC The Antarctica had been growing ice from 170 000 BC to 80 000 BC towards the north and then around 70 000 BC there seemed to be a melting trend back south In an astronomy sense we can thank him for larger game entering in the pantheon of the constellations or the leaf otter and some constellations lost to time like the mammoths What does this have to do with constellations taboos or the advent of Cro Magnon man well in the depictions of constellation images Slowly from east to west the stars move but then it did not take man not long after 70 000 BC to note that some planets or stars seemed to move retrograde in the night sky This book address what ideas did they show or have before or after these earth changes As ideas such as Maybe it was a lasso constellation for some animals capture as a God of Capture And Somewhere around the time of 50 000 BC in the region of northern England to the region above the Black Sea there occurred a melting phase between the ice ages and cultures began to spread The evidence of this is found by different locations in Europe and Central Europe of the use of rock shadows stars noted by hands in movement and certain hand symbols by star images or dots as stars not just stab marks Ironical again that Man beside Woman on the pole treetop does not have strong reminders of the Adam Eve Tree

and the Serpent as maybe Draco The symbol anciently always shows the snake at the foot of the tree or ascended the tree at the apex of the trunk which if astronomy wise would mean an ascended constellation to the Zenith or the Pole Draco thus deposed Adam and Eve from their own constellation garden and domain by it ascending as an ancient Pole Axis Mundi Thus the smoke screen really is a tied between this local area of France and Late Paleolithic Mans ideas of that region in the night sky of a certain year or month period of hunting Although we have jumped forward in the time of ancient astronomy beginnings in a way really in this sense we have not To the real beginnings of little known ancient astronomy Lucifer,1888
