Race And Childbirth:

"Race" and Childbirth Savita Katbamna, 2000 Race and Childbirth explores the experiences of pregnancy and childbirth from the perspectives of two groups of South Asian women in Britain. The women's personal accounts are examined within the context of the immense diversity which exists within the South Asian communities in terms of socio-economic, cultural, religious, and immigration history. The book highlights the relationship between these factors and women's childbirth experiences. It traces the progress of a group of Gujarati Hindu and Bangladeshi Muslim women from the third trimester of pregnancy to six weeks after birth. The women's moving personal accounts provide an insight into the tension between the medical and traditional approaches to care during pregnancy and childbirth and the strategies they use in negotiating diametrically opposed childbirth practices. The central role of older female relatives in the maintenance of traditional practices and their influence over pregnant women within extended families is explored in depth. Race and Childbirth provides an up-to-date account of this much neglected subject. It explores issues which are beyond the experience of many health professionals and highlights many areas where there is a need for greater sensitivity. The book is recommended reading for general practitioners, obstetricians, midwives, health visitors, and medical social workers. It is also directly relevant to researchers, trainers, and students in these fields. *African American Midwifery in the South* Gertrude Jacinta

commonly seen as biological in the medical world is socially constructed among women dependent on the public healthcare system for prenatal care and childbirth Bridges argues that race carries powerful material consequences for these women even when it is not explicitly named showing how they are marginalized by the practices and assumptions of the clinic staff Deftly weaving ethnographic evidence into broader discussions of Medicaid and racial disparities in infant and maternal mortality Bridges shines new light on the politics of healthcare for the poor demonstrating how the medicalization of social problems reproduces racial stereotypes and governs the bodies of poor women of color 1970 Census of Population, 1975 Estimates of Coverage of Population by Sex, Race, and Age United States.
