Race Political Strategy:

Strategy, Money and Technology in the 2008 Presidential Election Costas Panagopoulos, 2014-06-11 The 2008 presidential election perhaps more so than the typical quadrennial race will undoubtedly spawn an abundance of scholarly inquiry The confluence of historic and peculiar features associated with the 2008 contest distinguishes it from modern campaign cycles in significant ways that provide researchers a rare opportunity to reflect on a plethora of topics These studies are certain to provide detailed knowledge about the 2008 election in particular and more generally to inform our understanding of contemporary electoral politics The selections in this volume probe specific facets of the 2008 contest to provide in depth analyses of key developments with respect to strategy money and technology in the election cycle The contributors are keen analysts of American elections and campaigns The insights they provide grapple with key questions about the 2008 election and help to demystify aspects of the historic race This book was published as a special issue of the Journal of Political Marketing

Race and the Decline of Class in American Politics R. Robert Huckfeldt, C. W. Kohfeld, 1989

Race, Campaign Politics, and the Realignment in the South James M. Glaser, 1998-09-10 Since the Voting Rights Act of 1965 while Republican candidates have carried the South in presidential elections the Democratic Party has persisted in winning southern congressional elections Drawing on a wide variety of sources this text examines this political phenomenon

The Race Card Tali Mendelberg, 2001-04-09 In the age of equality politicians cannot prime race with impunity due to a norm of racial equality that prohibits racist speech Yet incentives to appeal to white voters remain strong As a result politicians often resort to more subtle uses of race to win elections Mendelberg documents the development of this implicit communication across time and measures its impact on society Drawing on a wide variety of research including simulated television news experiments national surveys a comprehensive content analysis of campaign coverage and historical inquiry she analyzes the causes dynamics and consequences of racially loaded political communication She also identifies similarities and differences among communication about race gender and sexual orientation in the United States and between communication about race in the United States and ethnicity in Europe thereby contributing to a more general theory of politics

Is Racial Equality Unconstitutional? Mark Golub, 2018 For some the idea of a color blind constitution signals a commonsense ideal of equality and a new post racial American era For others it supplies a narrow constitutional vision which serves to disqualify many of the tools needed to combat persistent racial inequality in the United States Rather than taking a position either for or against color blindness Mark Golub takes issue with the blindness consciousness dichotomy itself This book demonstrates how color blind constitutionalism conceals its own race conscious political commitments in defense of existing racial hierarchy and renders the pursuit of racial justice as a constitutionally impermissible goal

The Obama Presidency and the Politics of Change Edward Ashbee, John Dumbrell, 2016-11-09 This edited volume considers the extent to which the Obama presidency matched the promises of hope

and change that were held out in the 2008 election Contributors assess the character of change and within this context survey the extent to which there was enduring change within particular policy areas both domestic and foreign The authors combine empirical detail with more speculative assessment of the limits and possibilities of change amidst a very dense institutional landscape and in an era of intense political polarization Some see significant changes the full consequences of which may only be evident in later years Other authors in the collection present a markedly different picture and suggest that processes of change were not only limited and partial but at times leading the US in directions far removed from the promises of 2008 The book will make an important contribution to the debates about the Obama legacy

The Long Southern Strategy Angie Maxwell,Todd Shields,2019-06-24 The Southern Strategy was but one in a series of decisions the GOP made not just on race but on feminism and religion as well in what Angie Maxwell and Todd Shields call the Long Southern Strategy The Southern Strategy is traditionally understood as a Goldwater and Nixon era effort by the Republican Party to win over disaffected white voters in the Democratic stronghold of the American South To realign these voters with the GOP the party abandoned its past support for civil rights and used racially coded language to capitalize on southern white racial angst However that decision was but one in a series of decisions the GOP made not just on race but on feminism and religion as well in what Angie Maxwell and Todd Shields call the Long Southern Strategy In the wake of Second Wave Feminism the GOP dropped the Equal Rights Amendment from its platform and promoted traditional gender roles in an effort to appeal to anti feminist white southerners particularly women And when the leadership of the Southern Baptist Convention became increasingly fundamentalist and politically active the GOP tied its fate to the Christian Right With original extensive data on national and regional opinions and voting behavior Maxwell and Shields show why all three of those decisions were necessary for the South to turn from blue to red To make inroads in the South however GOP politicians not only had to take these positions but they also had to sell them with a southern accent Republicans embodied southern white culture by emphasizing an us vs them outlook preaching absolutes accusing the media of bias prioritizing identity over the economy encouraging defensiveness and championing a politics of retribution In doing so the GOP nationalized southern white identity rebranded itself to the country at large and fundamentally altered the vision and tone of American politics

Ideas and Politics in Social Science Research Daniel Beland,Robert Henry Cox,2010-12-10 Writing about ideas John Maynard Keynes noted that they are more powerful than is commonly understood Indeed the world is ruled by little else One would expect therefore that political science a discipline that focuses specifically on the nature of power would have a healthy respect for the role of ideas However for a variety of reasons not least of which is the influence of rational choice theory which presumes that individuals are self maximizing rational actors this is not the case and the literature on the topic is fairly thin As the stellar cast of contributors to this volume show ideas are in fact powerful shapers of political and social life In *Ideas and Politics* in

Social Science Research Daniel B land and Robert Henry Cox have gathered leading scholars from a variety of subdisciplines in political science and sociology to provide a general overview of the theoretical empirical and methodological issues raised by social science research on ideas and politics Throughout they hone in on three central questions What is the theoretical basis for studying ideas in politics What are the best methods What sort of empirical puzzles can be solved by examining ideas and related phenomena such as discourse policy paradigms and framing processes In sum this is a state of the art academic work on both the role of ideas in politics and the analytical utility that derives from studying them **Whose Black Politics?** Andra Gillespie,2010-01-29 Using multiple case studies this title probes the implications of the emergence of a vanguard of leaders of African American politics It establishes a theoretical framework based on the interaction of three factors black leaders crossover appeal their political ambition and connections to the black establishment **White Out** Ashley W. Rich,1990-08-16 This book discusses British thought on race and racial differences in the latter phases of empire from the 1890s to the early 1960s It focuses on the role of racial ideas in British society and politics and looks at the decline in Victorian ideas of white Anglo Saxon racial solidarity The impact of anthropology is shown to have had

a major role in shifting the focus on race in British ruling class circles from a classical and humanistic imperialism towards a more objective study of ethnic and cultural groups by the 1930s and 1940s As the empire turned into a commonwealth liberal ideas on race relations helped shape the post war rise of race relations sociology Drawing on extensive government documents private papers newspapers magazines and interviews this book breaks new ground in the analysis of racial discourse in twentieth century British politics and the changing conception of race amongst anthropologists sociologists and the professional intelligentsia **The African American Experience** Arvarh E. state and city aid to their schools others tried to change the way the schools themselves operated Some coalitions sought accommodation with administrators and legislators others did not The events Su describes began with a series of stabbings in Bronx high schools during the 2003 2004 school year After this rash of violence several grassroots groups cited the need for additional safety patrols Mothers from one school spoke of how they had previously protested until they got extra officers a fairly scarce resource in New York public schools at their local elementary school Others asserted that not all the safety patrol officers already in place were treating students humanely Parent organizations and school officials battled over who was to blame for the school violence Did a police presence solve the problem or did it exacerbate the schools violence prone conditions Members of different groups proposed and mobilized behind a range of remedies These divergent responses shed light on the ways in which the choices made by each organization mattered By learning from Su s close observation of four activist groups in the Bronx including Mothers on the Move and Sistas and Brothas United we can better understand strategies that may ultimately lead to better and safer schools everywhere and help to revitalize American democracy

Somebody Should Do Something Michael Brownstein,Alex Madva,Daniel Kelly,2025-09-16 A novel and scientific approach to creating transformative social change and the surprising ways that each of us can help make a real difference Changing the world is difficult One reason is that the most important problems like climate change racism and poverty are structural They emerge from our collective practices laws economies history culture norms and built environments The dilemma is that there is no way to make structural change without individual people making different more structure facing decisions In Somebody Should Do Something Michael Brownstein Alex Madva and Daniel Kelly show us how we can connect our personal choices to structural change and why individual choices matter though not in the way people usually think The authors paint a new picture of how social change happens arguing that our most powerful personal choices are those that springboard us into working together with others warehouse worker Chris Smalls s unionization at Amazon is one powerful example Taking inspiration from the writer Bill McKibben they stress how one important thing an individual can do is be somewhat less of an individual Organized into three main parts the book first diagnoses the problem of either or thinking about social change which stems from the false choice of making better personal choices or changing the system Then it offers a different way to think about social change anchored in a new picture of human nature emerging across the social sciences Finally the authors explore ways of putting this picture into practice Neither a how to manual nor an activist s guide Somebody Should Do Something pairs stories with science plus some jokes to help readers recognize their own power turning resignation about climate change and racial injustice into actions that transform the world [The Myth of Equality](#) Ken Wytsma,2019-07-23 Is privilege real or imagined Ken Wytsma founder of the Justice Conference unpacks what we need to know to be grounded in conversations about today s race related issues And he helps us come to a deeper understanding of both the origins of these issues and the reconciling role we are called to play as witnesses of the gospel
