Radar Engineer's Sourcebook William C. Morchin, 1993-01-01 *Radar Engineer's Sourcebook* William C. Morchin, 1993
A distillation of technical material culled from key radar publications and conferences that have occurred over the past five years this book provides access to the answers to common design problems with designer crib sheets William Morchin has also written *Airborne Early Warning Radar* *Signal And Image Processing Sourcebook* Robert Libbey, 1994-03-31 The technological background established in these early chapters especially in the production and processing of television images vividly illuminates the development of the sophisticated image processing employed in contemporary radar space exploration and medical radiological imaging Continuing this integrated approach the author links the fundamentals of analog telephony to the development of modern digital signal processing in telecommunications and networking A detailed account of microprocessor technology further integrates the overall picture of the field of contemporary signal and image processing Logically the discussion is extended to the aspects of signal processing involved in artificial intelligence and neural networks

Target Detection by Marine Radar John N. Briggs, 2004-12-03 Radar is a legal necessity for the safe navigation of merchant ships and within vessel traffic services is indispensable to the operation of major ports and harbours *Target Detection by Marine Radar* concentrates solely on civil marine operations and explains how marine surveillance radars detect their targets The book is fully illustrated and contains worked examples to help the reader understand the principles underlying radar operation and to quantify the importance of factors such as the technical features of specific equipment the weather target reflection properties and the ability of the operator The precision with which targets are positioned on the radar screen and with which their progress is tracked or predicted depends on how definitely they have been detected therefore a whole chapter has been devoted to the issue of accuracy The various international regulations governing marine radar are examined a brief historical background is given to modern day practice and the book does with a discussion of the ways in which marine radar may develop to meet future challenges *Handbook of Radar Signal Analysis* Bassem R. Mahafza, Scott C. Winton, Atef Z. Elsherbeni, 2021-08-16 This new handbook on radar signal analysis adopts a deliberate and systematic approach It uses a clear and consistent level of delivery while maintaining strong and easy to follow mathematical details The emphasis of this book is on radar signal types and their relevant signal processing and not on radar systems hardware or components This handbook serves as a valuable reference to a wide range of audience More specifically college level students practicing radar engineers as well as casual readers of the subject are the intended target audience of the first few chapters of this book As the book chapters progress these grow in complexity and specificity Accordingly later chapters are intended for practicing engineers graduate college students and advanced readers Finally the last few chapters contain several special topics on radar systems that are both educational and scientifically entertaining to all readers The presentation of topics in this handbook takes the reader on a scientific journey whose major landmarks comprise the different

radar subsystems and components In this context the chapters follow the radar signal along this journey from its birth to the end of its life Along the way the different relevant radar subsystems are analyzed and discussed in great detail The chapter contributors of this new handbook comprise experienced academia members and practicing radar engineers Their combined years of academic and real world experiences are in excess of 175 Together they bring a unique easy to follow mix of mathematical and practical presentations of the topics discussed in this book See the Chapter Contributors section to learn more about these individuals
