Service-Oriented Computing - ICSOC 2007 Bernd Krämer, Kwei-Jay Lin, Priya Narasimhan, 2007-08-30 This book constitutes the refereed proceedings of the Fifth International Conference on Service Oriented Computing ICSOC 2007 The 30 revised full papers and 14 short papers are organized in topical sections on service deployment business process design service discovery quality of service support testing and validation service assembly service properties service modeling SOA composition experience runtime governance and QoS and composite service support

Holonic and Multi-Agent Systems for Manufacturing Thomas Strasser, 2009-08-17 This book constitutes the refereed

proceedings of the 4th International Conference on Industrial Applications of Holonic and Multi Agent Systems HoloMAS 2009 held in Linz Austria August 31 September 2 2009 The 31 revised full papers presented were carefully reviewed and selected from 47 submissions The papers are organized in topical sections on introduction motivation knowledge centered approaches selected theoretical aspects MAS scheduling simulation holonic systems for manufacturing and MAS holonic applications

Service Orientation in Holonic and Multi-Agent Manufacturing Control Theodor Borangiu, André Thomas, Damien Trentesaux, 2012-03-28 Service orientation is emerging nowadays at multiple organizational levels in enterprise business and it leverages technology in response to the growing need for greater business integration flexibility and agility of manufacturing enterprises The Service Oriented Architecture SOA analysed throughout the book represents a technical architecture a business modelling concept a type of infrastructure an integration source and a new way of viewing units of automation within the enterprise The primary goal of SOA is to align the business world with the world of information technology in a way that makes both more effective The service value creation model at enterprise level consists of using a Service Component Architecture for business process applications based on entities which handle services In this view a service is a piece of software encapsulating the business control logic or resource functionality of an enterprise entity that exhibits an individual competence and responds to a specific request to fulfil a local operation or global objective batch production The value creation model is based on a 2 stage approach Agentification complex manufacturing processes are split in services provided by informational agents which are discovered accessed and executed This leads to a modular reusable agile and easy integrate integration Holonification holons link the material flow and physical entities of the manufacturing processes with the informational part IT services realized by distributed intelligence facilitating thus traceability the developing of flexible control systems This book gathers contributions from scientists researchers and industrialists on concepts methods frameworks and implementing issues addressing trends in the service orientation of control technology and management applied to manufacturing enterprise This book gathers contributions from scientists researchers and industrialists on concepts methods frameworks and implementing issues addressing trends in the service orientation of control technology and management applied to manufacturing enterprise

Agent-Based Technologies and Applications for Enterprise Interoperability Klaus Fischer, Jörg Müller, Renato Levy, 2012-03-09 The ATOP Agent Based Technologies and Applications for Enterprise Interoperability workshop series focuses on technologies that support interoperability in networked organizations on successful applications of these technologies and on lessons learned In particular ATOP brings together research combining ideas from MDA and SOA with agent technologies The ATOP 2009 and 2010 workshops were held at the AAMAS conferences in Budapest Hungary in May 2009 and in Toronto Canada in May 2010 The 11 papers presented here were carefully reviewed by three members of the international Program Committee and selected out of 25 contributions to the workshops The topics covered are modeling interoperable systems semantic

approaches to enterprise interoperability and interoperable business processes and business interactions These papers are completed by an invited contribution reporting on OMG agent standardization The main goal was to collect approaches for the application of agent technologies in these areas Current trends in the development of agent technologies are compared with recent developments in service oriented and model driven system design with respect to their ability to solve interoperability problems

Electronic Business Interoperability: Concepts, Opportunities and Challenges Kajan, Ejub, 2011-03-31 Interoperability is a topic of considerable interest for business entities as the exchange and use of data is important to their success and sustainability Electronic Business Interoperability Concepts Opportunities and Challenges analyzes obstacles provides critical assessment of existing approaches and reviews recent research efforts to overcome interoperability problems in electronic business It serves as a source of knowledge for researchers educators students and industry practitioners to share and exchange their most current research findings ideas practices challenges and opportunities concerning electronic business interoperability

Coordination, Organizations, Institutions, and Norms in Agent Systems III Jaime Simão Sichman, Julian Padget, Sascha Ossowski, Pablo Noriega, 2008-03-21 This book constitutes the refereed post workshop proceedings of the International Workshop on Coordination Organization Institutions and Norms in Agent Systems COIN 2007 The 23 papers in this volume were carefully selected from 38 initial submissions

Computing Handbook Teofilo Gonzalez, Jorge Diaz-Herrera, Allen Tucker, 2014-05-07 The first volume of this popular handbook mirrors the modern taxonomy of computer science and software engineering as described by the Association for Computing Machinery ACM and the IEEE Computer Society IEEE CS Written by established leading experts and influential young researchers it examines the elements involved in designing and implementing software new areas in which computers are being used and ways to solve computing problems The book also explores our current understanding of software engineering and its effect on the practice of software development and the education of software professionals

Enterprise Architecture and Integration: Methods, Implementation and Technologies Lam, Wing, Shankararaman, Venky, 2007-05-31 This book provides a detailed analysis of the important strategies for integrating IT systems into fields such as e business and customer relationship management It supplies readers with a comprehensive survey of existing enterprise architecture and integration approaches and presents case studies that illustrate best practices describing innovative methods tools and architectures with which organizations can systematically achieve enterprise integration
