Services Marketing Managing The Service Value Chain:

Services Marketing Manfred Bruhn, 2005-11-10 *Services Marketing Managing the Service Value Chain* 1st edition argues that all service management efforts are aimed to enhance value in order to improve the bottom line. Written from a European perspective, the book demonstrates that through strategic orientation and innovation, the firm and shareholder will reap the benefits. Geared towards final year marketing students, the book is also useful for postgraduate students and for practitioners who work or wish to specialise in the area of services management and marketing. Managing Organizational Ecologies

Keith Alexander, Ilfryn Price, 2013-05-02 The term Facilities Management has become global but fraught with confusion as to what the term signifies. For some, notably in the USA, Facilities Management remains a discipline of human ecology. Elsewhere, the term has become conflated with an alternative meaning: providing or outsourcing the provision of various services essential to the operation of particular buildings. This volume redresses that imbalance to remind Facilities Management of its roots, presenting evidence of Facilities Management success stories that engage the wider objectives of the organizations they serve and engaging students, scholars, and critical practitioners of general management with an appreciation of the power and influence of physical space and its place in the theory and practice of organizations. This book includes management perspectives from outside the field to ensure that the issues raised are seen in an organizational and management context, informing debate within the Facilities Management fraternity. It draws on human ecology and the perspective of the firm as itself an intra-organizational ecology of social constructs. The ecology of a firm is not restricted to the firm's boundaries; it extends to wider relationships between the firm and its stakeholders, including in an age of outsourced building services, the Facilities Management supply chain. This volume offers arguments and evidence that managing such constructs is a key role for Facilities Management and an important participant in the provision of truly usable spaces. **Services Marketing and Management**
