**Growth with Equity** Martin Neil Baily, Gary Burtless, Robert E. Litan, 2010-12-01 For nearly two decades the U S economy has been plagued by two disturbing economic trends the slowdown in the growth rates of productivity and average real wages and the increase in wage and income inequality The federal budget is in chronic deficit Imports have far exceeded exports for more than a decade American competitiveness has been a source of concern for even longer Many Americans worry that foreigners are buying up U S companies that the economy is losing its manufacturing base and that the gap between rich and poor is widening In this book three of the nation s most noted economists look at the primary reasons for these trends and assess which of the many suggestions for change in policy whether for increased tax incentives for investment education reform or accelerated research and development are likely to work and which may not work and could even hinder economic development The author s discuss a variety of issues connected with deindustrialization and diminished competitiveness distinguishing between problems that would be of real concern and those that should not They evaluate explanations for slow growth in aggregate productivity in the United States and its relation to slower growth in other industrialized countries They discuss the performance of the various sectors of the U S economy and systematically examine the evidence for and against the major proposals for correcting the adverse trends in productivity and

inequity Growth With Equity clearly explains how the country can accomplish the challenge of accelerating growth and narrowing the gap that separates the rich from the poor While recognizing that some of their recommendations may be politically painful the authors stress the importance of adopting a purposeful long range policy to encourage growth ensure equity and reduce the government s equity

**Making Schools Work** Eric A. Hanushek,2010-12-01 Educational reform is a big business in the United States Parents educators and policymakers generally agree that something must be done to improve schools but the consensus ends there The myriad of reform documents and policy discussions that have appeared over the past decade have not helped to pinpoint exactly what should be done The case for investment in education is an economic one schooling improves the productivity and earnings of individuals and promotes stronger economic growth and better functioning of society Recent trends in schooling have however lessened the value of society s investments as costs have risen dramatically while student performance has stayed flat or even fallen The task is to improve performance while controlling costs This book is the culmination of extensive discussions among a panel of economists led by Eric Hanushek They conclude that economic considerations have been entirely absent from the development of educational policies and that economic reality is sorely needed in discussions of new policies The book outlines an improvement plan that emphasizes changing incentives in schools and gathering information about effective approaches Available research and analysis demonstrates that current central decisionmaking has worked poorly Concentrating on inputs such as pupil teacher ratios or teacher graduate degrees appears quite inferior to systems that directly reward performance Nonetheless since experience with such alternatives is very limited a program of extensive evaluation appears to be in order Attempts to institute radical change on the basis of currently available information involve substantial risks of failure Many people today find proposals such as charter schools expanded use of merit pay or educational vouchers to be appealing Yet there is little evidence of their effectiveness and widespread adoption of these proposals is sure to run into substantial problems of im *Homelessness in New York City* Thomas J. Main,2016-07-28 Can American cities respond effectively to pressing social problems Or as many scholars have claimed are urban politics so mired in stasis gridlock and bureaucratic paralysis that dramatic policy change is impossible Homelessness in New York City tells the remarkable story of how America s largest city has struggled for more than thirty years to meet the crisis of modern homelessness through the landmark development since the initiation of the Callahan v Carey litigation in 1979 of a municipal shelter system based on a court enforced right to shelter New York City now shelters more than 50 000 otherwise homeless people at an annual cost of more than 1 billion in the largest and most complex shelter system in the

world Establishing the right to shelter was a dramatic break with long established practice Developing and managing the shelter system required the city to repeatedly overcome daunting challenges from dealing with mentally ill street dwellers to confronting community opposition to shelter placement In the course of these efforts many classic dilemmas in social policy and public administration arose Does adequate provision for the poor create perverse incentives Can courts manage recalcitrant bureaucracies Is poverty rooted in economic structures or personal behavior The tale of how five mayors Koch Dinkins Giuliani Bloomberg and de Blasio have wrestled with these problems is one of caution and hope the task is difficult and success is never unqualified but positive change is possible Homelessness in New York City tells the remarkable story of what happened for good and sometimes less good when New York established the right to shelter
