Air Force (USAF), 2017-10-18 American military professionals especially the US Air Force have had a difficult time understanding their role in this nation's defeat in Vietnam Dr Tilford provides a critical self analysis and questions the underlying assumptions of the Air Force's strategy in Southeast Asia He argues that we must understand what went wrong in Vietnam and why and not manipulate the record and paint failure as victory He explains what led to the setup which not only resulted in a failure for airpower but also contributed to the fall of South Vietnam Laos and Cambodia to Communist forces in 1975 Tilford a retired Air Force officer and a widely respected historian in his own right is not squeamish about demolishing the myths that abound concerning the air war in Southeast Asia He is forthright in challenging both the USAF's strategic tunnel vision and the cherished misconceptions of many civilian historians whose criticisms of the air war in Vietnam are long on politics and short on facts The integrity of Dr Tilford's research his knowledge of air power theory and technology and his expertise as a historian all contribute to a high quality effort that proves among other things that neither the Air Force nor its civilian critics have yet secured a monopoly on truth In his analysis of the air war against North Vietnam Tilford presents one overwhelming lesson that USAF strategic bombing doctrine is ethnocentric and Eurocentric and is conceived utterly without regard to important cultural and political variations among potential adversaries This lesson more than any other is one that today's Air Force must learn if it is to establish any relevance in a post cold war world in which the global superpower war for which it has planned almost exclusively since 1945 becomes an ever more remote possibility Whatever the Air Force's operational role in the twenty first century turns out to be it seems likely that an air technocracy geared toward fighting a general war against a modern industrialized major power will become even less relevant than it proved to be in Korea and Vietnam At the very least the Air Force of the future will do well to heed Dr Tilford's other major conclusion that because war is more than sortie generation and getting ordnance on targets statistics are a poor substitute for strategy Contents FOREWORD PREFACE 1 IN THE TIME OF ATOMIC PLENTY Air Power Fulfilled The Road to a Separate Service The Atomic Bomb and the New Air Force Preludes to Vietnam The New Look and the Air Force Notes 2 SITUATIONS OF A LESSER MAGNITUDE The Kennedy Administration the Cold War and the Air Force The Laotian Factor In at the Beginning At War with the Army Notes 3 ROLLING THUNDER AND THE DIFFUSION OF HEAT The Dark before the Storm The Air Force that Flew Rolling Thunder Rolling Thunder Begins Bombing the North The Bombing Escalates Rushing to Meet Our Thunder Switch in Strategy or in Targets Toward a Bombing Halt Tet and the Bombing Halt Notes 4 HOWEVER FRUSTRATED WE ARE Shifting Gears in 1968 Search for Tomorrow Operation Commando Hunt Productivity as Strategy The Air War in Northern Laos Cambodia Back to Laos Lam Son 719 Fallout Frustrations

The United States Air Force of the 1990s faces perhaps the single greatest challenge to its institutional weltanschauung since it became an independent service in 1947 The specter of a hostile expansionist Soviet Union which for the last 45 years has justified the maintenance of a large strategic air force overwhelmingly oriented to the western European theater is fading fast with no similarly immense threat on the immediate horizon to take its place As a result the USAF perhaps more than any other US military service faces the prospect of losing the foundation upon which it has based its entire institutional identity and even its very existence Strategic bombing is not mere doctrine to the USAF it is its lifeblood and provides its entire raison d'être Strategic bombing is as central to the identity of the Air Force as the New Testament is to the Catholic church Without the Gospels there would be no pope and without strategic bombing there would be no Air Force The theology of strategic bombing has influenced every aspect of the Air Force's development since well before World War II This system of belief too often has led the keepers of the USAF's institutional memory to dismiss as aberrant peripheral and irrelevant anything that fell outside the narrow confines of its strategic concepts The USAF's uncritical approach to its own past has enabled it to declare strategic bombing decisive where it was not Europe 1943%5 to claim victory where there was none Vietnam 1972 and to neglect those air operations that indeed proved indispensable and potentially decisive tactical air campaigns in the European and Pacific theaters during World War II and in Korea during 1950 and 1951 *Crosswinds* Earl H. Tilford, Jr., Earl H. Tilford, 2008-12-19 Tilford exposes the generals' tunnel vision He demolishes the myth that the 1972 Christmas bombing brought Hanoi to its knees His controversial thesis is that the bombing of the North and the interdiction campaign against the Ho Chi Minh Trail were in no way decisive and that USAF leadership obtusely failed to perceive that North Vietnam an agricultural nation was simply not susceptible to strategic bombing Publishers Weekly hard hitting study on the failure of American air power in the Vietnam War The acute intellectual content of the book and the author's engaging writing style make the book easy to recommend Armed Forces Journal International **The Evolution of the US Air Force** Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying

trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general *Concepts for Air Force Leadership* ,1990 Military Aspects of the Vietnam Conflict Walter L. Hixson,2000 The Vietnam War was in the words of a preeminent scholar of the conflict George C Herring America s longest war The Indochina conflict spanned the first generation of the larger Cold War and lasts to this day in American memory and cultural representation Although the war remains a sensitive subject for many a consensus exists that would echo the words of former Secretary of Defense Robert S McNamara in his memoir In Retrospect We were wrong we were terribly wrong The six volumes in this series pull together the best article literature on the History of American Involvement in Vietnam The scholars writing in the first volume explore the roots of U S intervention which followed in the wake of France s failed effort supported and financed in Washington to assert imperial control over Indochina Volume II analyzed military aspects of the Vietnam War s history Volume V focuses on the lessons and legacies of the conflict the source of a particularly sharp debate during the first administration of President Ronald W Reagan The final volume in the series analyzes the Vietnam War s extensive afterlife in memory film literature and popular discourse Available individually by volume Volume 1 The Origins of Intervention 0 8153 3531 8 Volume 2 Military Strategy and Escalation 0 8153 3532 6 Volume 3 Executive Legislative Relations Tracing the Impact of the War on U S Governmental Structures and Policies 0 8153 3533 4 Volume 4 The Diplomacy of War 0 8153 3534 2 Volume 5 The Anti War Movement 0 8153 3535 0 Volume 6 Representation Memories and Legacies 0 8153 3536 9 **The Air Force Way of War** Brian D. Laslie,2015-06-23 Laslie chronicles how the Air Force worked its way from the catastrophe of Vietnam through the triumph of the Gulf War and beyond Robert M Farley author of Grounded The U S Air Force s poor performance in Operation Linebacker II and other missions during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program s new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and

secondary missions instead of superficially training for numerous possible scenarios. In addition to discussing the program's methods, Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada, Panama, Libya, and Iraq. Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of advances in training, but Laslie's unprecedented study of Red Flag addresses this oversight through its examination of the seminal program. A refreshing look at the people and operational practices whose import far exceeds technological advances. *The Strategy Bridge* by John Andreas Olsen, 2010. This one-volume anthology provides a comprehensive analysis of the role that air power has played in military conflicts over the past century. Comprising sixteen essays penned by a global cadre of leading military experts, *A History of Air Warfare* chronologically examines the utility of air power from the First World War to the second Lebanon war campaign by campaign. Each essay lays out the objectives, events, and key players of the conflict in question, reviews the role of air power in the strategic and operational contexts, and explores the interplay between the political framework and military. *To Hanoi And Back: The United States Air Force And North Vietnam 1966-1973 [Illustrated Edition]* by Dr. Wayne Thompson, 2014-08-15. Includes 3 maps and 40 photographs. No experience etched itself more deeply into Air Force thinking than the air campaigns over North Vietnam. Two decades later, in the deserts of Southwest Asia, American airmen were able to avoid the gradualism that cost so many lives and planes in the jungles of Southeast Asia. Readers should come away from this book with a sympathetic understanding of the men who bombed North Vietnam. Those airmen handled tough problems in ways that ultimately reshaped the Air Force into the effective instrument on display in the Gulf War. This book is a sequel to Jacob Van Staaveren's *Gradual Failure: The Air War over North Vietnam 1965-1966*, which we have also declassified and are publishing. Wayne Thompson tells how the Air Force used that failure to build a more capable service, a service which got a better opportunity to demonstrate the potential of air power in 1972. Dr. Thompson began to learn about his subject when he was an Army draftee assigned to an Air Force intelligence station in Taiwan during the Vietnam War. He took time out from writing *To Hanoi and Back* to serve in the Checkmate group that helped plan the Operation Desert Storm air campaign against Iraq. Later, he visited Air Force pilots and commanders in Italy immediately after the Operation Deliberate Force air strikes in Bosnia. During Operation Allied Force over Serbia and its Kosovo province, he returned to Checkmate. Consequently, he is keenly aware of how much the Air Force has changed in some respects, how little in others. Although he pays ample attention to context, his book is about the Air Force. He has written a well-informed account that is both lively and thoughtful.

[America in Vietnam](#) by Herbert Y. Schandler, 2009-08-16. This controversial and timely book about the American experience in Vietnam provides the first full exploration of the perspectives of the North Vietnamese leadership before, during, and after the war. Herbert Y. Schandler offers unique insights into the mindsets of the North Vietnamese and their response to diplomatic and military actions of the Americans, laying out the full scale of the disastrous U.S. political and military

misunderstandings of Vietnamese history and motivations Including frank quotes from Vietnamese leaders the book offers important new knowledge that allows us to learn invaluable lessons from the perspective of a victorious enemy Unlike most military officers who served in Vietnam Schandler is convinced the war was unwinnable no matter how long America stayed the course or how many resources were devoted to it He is remarkably qualified to make these judgments as an infantry commander during the Vietnam War a Pentagon policymaker and a scholar who taught at West Point and National Defense University His extensive personal interviews with North Vietnamese are drawn from his many trips to Hanoi after the war Schandler provides not only a definitive analysis of the American failure in Vietnam but a crucial foundation for exploring the potential for success in the current guerrilla wars the United States is fighting in Iraq and Afghanistan Anti-Aircraft Artillery in Combat, 1950-1972 Mandeep Singh,2020-04-30 An in depth look at the combat performance of ground based air defenses during the Korean War Vietnam War Middle East conflicts and other campaigns Though anti aircraft artillery was extensively used in combat in the First World War it wasn't until World War II that it came into prominence shooting down more aircraft than any other weapon and seriously degrading the conduct of air operations In the battle between the attackers and anti aircraft artillery the latter had the upper hand when the war ended The post war years saw a decline in anti aircraft artillery as peace prevailed and the advent of the jet aircraft seemed to tilt the balance in favor of the aircraft as they flew faster and higher seemingly beyond the reach of anti aircraft artillery It would take all the hi tech equipment and the guile and cunning that anti aircraft artillery could muster to try and reclaim pole position It is that story of the tug of war between the aircraft and artillery that forms the narrative of this book as it traces the history of combat employment of anti aircraft artillery from the Korean War in effect the first Jet Age war to the War of Attrition between Arab states and Israel when the missiles came of age sending the aircraft scurrying for cover Mandeep Singh's book is the first attempt to look at the performance of anti aircraft artillery incorporating the views analyses and experiences of Soviet Arab and South Asian Armies through the major wars between 1950 and 1972 Afterburner John Darrell Sherwood,2004-05-31 Military history looking at aviators during the second half of Vietnam The stories are told through interviews and journal excerpts of the pilots and aircrew themselves Great tradey title Military History United States. Night Hunters William Pace Head,2014-03-18 In Night Hunters air power historian William P Head provides the first detailed study of the development and deployment of the AC 130 gunship While other airframes and other types of close air support CAS and interdiction weapon systems preceded or flew with the AC 130s this four engine cargo airframe proved to be not only the longest serving fixed wing gunship but also the most effective by far During the Vietnam War the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features the difficult climate and the shifting diplomatic context One of the most important was the development of the AC 130 Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam era fixed wing gunship and the only one that continues to fly missions in the twenty first century In addition it employed many of the most advanced weapons sensors targeting devices and fire control systems of the 1970s or of any era By recounting both the technical development and the combat operations of the plane and by looking at the proposed alternatives for its use in the War on Terror Night Hunters offers a clear view of the role of gunships and of close air support in US wars In today s never ending brushfire wars the AC 130s continue to uphold their reputation for excellence
