Neanderthals in the Classroom Elizabeth Watts, 2019-10-08 Neanderthals in the Classroom examines the ongoing battle surrounding evolution from a cultural and historical perspective and then puts Theodosius Dobzhansky's claim that nothing in biology makes sense except in the light of evolution to the ultimate test by exploring the potential evolutionary roots of this societal and educational clash over human origins In examining the biological roots of the conflict Watts demonstrates how understanding our inner Neanderthal allows us to consciously choose more highly evolved forms of communication as a means of alleviating societal division and creating space for more effective science education

Key Features Introduces readers to the multifaceted world of evolution education Describes the complex interplay between religious beliefs and science as well as the clash of false information and formal education Offers an overview of the transformation of public opinion of evolution and science over time in the United States due to the perceived conflict between science and religion Examines students' misconceptions about the theory of evolution and the general nature of scientific discovery due to the contradictory messages that they receive in popular culture Offers potential means to amend misconceptions so that students and other individuals can integrate evolutionary theory into their worldviews regardless of their religious background

Evolution, Creationism, and the Battle to Control America's Classrooms Michael Berkman, Eric Plutzer, 2010-09-20 Who should decide what children are taught in school This question lies at the heart of the evolution creation wars that have become a regular feature of the US political landscape Ever since the 1925 Scopes monkey trial many have argued that the people should decide by majority rule and

through political institutions others variously point to the federal courts educational experts or scientists as the ideal arbiter Berkman and Plutzer illuminate who really controls the nation s classrooms Based on their innovative survey of 926 high school biology teachers they show that the real power lies with individual educators who make critical decisions in their own classrooms Broad teacher discretion sometimes leads to excellent instruction in evolution But the authors also find evidence of strong creationist tendencies in America s public high schools More generally they find evidence of a systematic undermining of science and the scientific method in many classrooms

The Last Pillars of Darwinian Evolution Falsified Jerry Bergman Ph.D.,2022-05-12 Documents the fact that the peer reviewed scientific evidence has falsified Darwinian evolution Challenges the common beliefs about the evidence for evolution by logic and research The first book titled *The Three Major Pillars of Darwinism Demolished* has falsified abiogenesis the origin of life itself from non life mutations as the ultimate source of all genetic variety and natural selection which culls that variety to produce all life on Earth This volume evaluated other major evidences for Darwinian evolution which have also been refuted by empirical science These minor pillars are convergent evolution homology endosymbiosis and the antibiotic resistance claim for evolution It also shows the attempts to refute the irreducible complexity problem have failed and likewise co option cannot explain the evolution of complex features seen in the natural world In short an objective review of the published peer reviewed evidence in secular scientific journals has falsified Darwinian evolution

The Three Pillars of Evolution Demolished Jerry Bergman Ph.D.,2022-03-29 The three pillars of evolution defined as progression from simple molecules to humans are the origin of life and genetic damage called mutations selected by natural selection Dr Bergman documents that the peer reviewed scientific literature has demolished these central pillars of evolution specifically the origin of life from non life and the source of genetic variety called mutations honed by natural selection As genetic research of life has been shown to be increasingly more complex life from nonlife by natural means is now no longer feasible Furthermore most all mutations are partly or wholly deleterious and natural selection serves primarily to reduce the deterioration of life not evolve life to greater levels of complexity as evolution postulates In short the naturalistic evolutionary theory first expounded by Charles Darwin has been falsified by scientific research

Cohen, Paul S. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his Origins of Species in 1859 he initiated a debate about the origin of human life and the role of God in human affairs scarcely equalled in world

history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology
