False Summit Julie Rak, 2021-04-14 The race to climb Everest catapulted mountain climbing with its accompanying images of conquest and sport into the public sphere on a global scale But as a

metaphor for the pinnacle of human achievement mountaineering remains the preserve of traditional white male heroism False Summit unpacks gender politics in the expedition narratives and memoirs of mountaineers in the Himalayas and the Karakoram Why are women still a minority in the world's highest places Julie Rak proposes that the genre has itself reached a false summit a peak that proves not to be the pinnacle and that mountaineering is not ready to welcome other ways of climbing or other kinds of climbers For more than two centuries mountaineering as an activity and as an ideal has helped shape how the self is understood within the context of conquest adventure and proximity to risk As climbing shows signs of becoming more diverse Rak asks why change is so hard to achieve and why gender bias and other inequities exist in climbing at all Exploring classic and lesser known expedition accounts from Everest K2 and Annapurna False Summit helps us understand why mountaineering remains one of the most important ways to articulate gender identities and politics

persons to date to complete an unsupported trip to the North Pole from land The ice sheet that used to link the Pole to land in Canada once so thick and sturdy has so degraded over the last few decades that explorers have had to abandon any attempts to cross it While reaching the North Pole was monumental for Waters it also was the final piece needed to complete a project that he had been persistently working on for over a decade the True Adventurers Grand Slam standing atop the Seven Summits and skiing full length unsupported and unassisted expeditions to both the North and South Poles His accomplishment that day made him just the 9th person and first American to gain entry into this exclusive club Never one to embrace the easy path Waters seemed to thrive in battling through whatever the fates threw at him sometimes even deliberately seeking out struggles Despite having little experience cross country skiing he decided to go to the South Pole Eschewing the more typical route he and partner Cecilie Skog completed the first traverse of Antarctica without the use of resupplies or kites Skiing from Berkner Island in the Weddell Sea via the South Pole to the Ross Ice Shelf the pair skied for 70 days and covered 1200 miles 9 years prior to the much publicized 2019 race across Antarctica To this day the two hold the record for the longest unsupported crossing of the continent without the use of kites How Waters ended up standing atop the North Pole on that fateful day is a story of hope perseverance faith and a fair share of dumb luck From his youth traipsing around the Georgia hills to his time leading expeditions around the Himalayas including five summits of Everest Waters has always seemed to stumble into the next fortuitous step of his journey often ending up in the most unlikely places This is tempered by the fact that early in Waters outdoor career he learned to live by a simple credo you have to make things happen for yourself At the beginning of his climbing career he was consumed by passion for the mountains every decision was leading to the next mountaineering challenge Eventually giving up a stable career as a geologist he had a self described mid 20 s crisis left his 401K and comfortable salary for living out of his truck and 40 dollars a day as a part time climbing instructor Following his dream of a life of adventure in exchange for a life of obeying societal norms he set out to build a mountain resume that would enable him to circle the Earth and work as a mountain guide in the Himalayas and beyond After almost two decades of hard expeditions around the planet his experiences include being on a hijacked airplane in Russia rescue of injured climbers in the Karakoram Himalaya of Pakistan the Everest Base Camp earthquake disaster narrowly missing out on the K2 2008 tragedy near misses with avalanches the deaths of close climbing partners close encounters with Polar Bears on the Arctic Ocean relationships with fellow adventurers and much more
