Jenkins,2023-07-10 As Southern California recovered from the collapse of the cattle industry in the 1860s the arrival of railroads attacked by newspapers as the greedy octopus and the expansion of citrus agriculture transformed the struggling region into a vast idealized and prosperous garden New groves of the latest citrus varieties and new towns like Riverside quickly grew directly along the tracks of transcontinental railroads The influx of capital industrial technology and workers especially people of color energized Southern California and tied it more closely to the economy and culture of the United States than ever before Benjamin Jenkins s Octopus s Garden argues that citrus agriculture and railroads together shaped the economy landscape labor systems and popular image of Southern California Orange and lemon growing boomed in the 1870s and 1880s while railroads linked the region to markets across North America and ended centuries of geographic isolation for the West Coast Railroads competed over the shipment of citrus fruits from multiple counties engulfed by the orange empire resulting in an extensive rail network that generated lucrative returns for grove owners and railroad businessmen in Southern California from the 1890s to the 1950s While investment from white Americans particularly wealthy New Englanders formed the financial backbone of the Octopus s Garden citrus and railroads would not have thrived in Southern California without the labor of people of color Many workers of color took advantage of the commercial developments offered by railroads and citrus to economically advance their families and communities however these people also suffered greatly under the constant realities of bodily harm low wages and political and social exclusion Promoters of the railroads and citrus cooperatives touted California as paradise for white Americans and minimized the roles of non white laborers by stereotyping them in advertisements and publications These practices fostered conceptions of California s racial hierarchy by praising privileged whites and maligning the workers who made them prosper The Octopus s Garden continues to shape Southern Californians understanding of their past In bringing together multiple storylines Jenkins provides a complex and fresh perspective on the impact of citrus agriculturalists and railroad companies in Southern Californian history **The Battle of Manila** Nicholas Evan Sarantakes,2025 Douglas MacArthur had a special relationship with the city of Manila Many years before when he had decided to make a career in the U S Army like his father and had bounced around the globe he kept coming back to the city He received his first promotion in Manila and contracted malaria so severe the Army had to send him back to the United States The city was a constant in a life without many others He was by any measure an exceptional soldier At the U S Military Academy he earned an athletic letter in baseball became the First Captain of the Corps of Cadets and finished first in a class

of ninety three Commissioned in the Corps of Engineers he had first assignment in the Philippines **Dixie Dharma** Jeff Wilson,2012-04-16 Buddhism in the United States is often viewed in connection with practitioners in the Northeast and on the West Coast but in fact it has been spreading and evolving throughout the United States since the mid nineteenth century In Dixie Dharma Jeff Wilson argues that region is crucial to understanding American Buddhism Through the lens of a multidenominational Buddhist temple in Richmond Virginia Wilson explores how Buddhists are adapting to life in the conservative evangelical Christian culture of the South and how traditional Southerners are adjusting to these newer members on the religious landscape Introducing a host of overlooked characters including Buddhist circuit riders modernist Pure Land priests and pluralistic Buddhists Wilson shows how regional specificity manifests itself through such practices as meditation vigils to heal the wounds of the slave trade He argues that southern Buddhists at once use bodily practices iconography and meditation tools to enact distinct sectarian identities even as they enjoy a creative hybridity
