Sex, Gender and Identity Patricia J. Turner,1995 Discusses gender differences in infancy and childhood including play behaviour beliefs about gender and stereotypes and theories of gender role development from biology social learning theory and cognitive developmental psychology This open learning text includes self assessment Developmental Psychology C.-A. Hauert,1990-01-19 Since the end of the sixties Piagetian general theory with its inherent power of unification has gradually given way to a multitude of more specific models which is in evidence today In this volume the authors concentrate on three perspectives namely cognitive perceptuo motor and neuropsychological development and attempt to coordinate these traditionally separated views Good illustrations of these theoretical connections can be found in different chapters although the persistent isolation of these three domains still remains However the authors believe efforts in developmental psychology must continue in the direction of domain interaction for theoretical concepts as well as methodological tools
