Sex Equality Policy In Western Europe:

Sex Equality Policy in Western Europe Frances Gardiner, 2005-07-25 This book presents a wide ranging comparative analysis of the development of sex equality policies within Europe The contributors comprising both European and US based scholars address a very current political issue This is an area of policy that has reached the decision making stage in much of Europe and it is thus possible to assess the outcome of policy making and to account for cross national variations of sex equality policy measures The contributors discuss the similarities and differences in levels of awareness commitment to equality of opportunity and readiness to turn rhetoric into reality in a number of west European countries including Spain the Netherlands Britain Norway and Ireland

Gender Equality Policy in the European Union Ingrid Bego, 2015-07-14 One of the solutions proposed by the European Union to remedy the effects of the 2008 economic crisis is to increase female labour participation This book explores the policy changes in four new member states that may reduce the gender employment gap and improve women s equal participation in the labour force

European States and their Muslim Citizens John R. Bowen, John Richard Bowen, Christophe Bertossi, Jan Willem Duyvendak, Mona Lena Krook, 2014 This book responds to debates about the place of Muslims in Western Europe by considering the way people draw on practical schemas

Gender and Justice Sally Jane Kenney, 2013 Intended for use in courses on law and society as well as courses in women s and gender studies women and politics and women and the law this book explores different questions in different North American and European geographical jurisdictions and courts demonstrating the value of a gender analysis of courts judges law institutions organizations and ultimately politics Gender and Justice argues empirically for both more women and more feminists on the bench while demonstrating that achieving these two aims are independent projects

The Contextual Challenges of Occupational Sex Segregation Stephanie Steinmetz, 2011-12-15 This study untangles the complex interplay of individual and contextual factors shaping cross national differences in horizontal and vertical occupational sex segregation It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society Following this approach Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross national differences in occupational sex segregation She offers insights into the positioning of 21 EU Members States particularly of former CEE countries Based on advanced multi level models the study shows that institutional factors such as the organization of educational systems post industrial developments social policies and the national gender culture play a crucial role in shaping sex segregation processes apart from individual factors The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions some reduce horizontal segregation while at the same time aggravating the vertical aspect Finally the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market

EU Non-Discrimination Law in the Courts

Jule Mulder, 2017-01-12 Since the year 2000 the material and personal scope of EU non discrimination law has been significantly broadened and has challenged national courts to introduce a comprehensive equality framework into their national law to correspond with the European standard The book provides a multi layered culturally informed comparison of juridical approaches to EU in direct sex and sexualities discrimination and its implementation in Germany and the Netherlands It examines how and why national courts apply national non discrimination law with a European origin differently although the legislation derives from the same set of EU law and the national courts have to respect the interpretive competence of the CJEU The book provides valuable insights into the national and European context which shape the dialogue and influences of the courts inter se the national application of EU law and the harmonisation process within the area of gender equality law and beyond A Dutch and German comparison is of special interest here because both countries approaches towards non discrimination law are quite different despite the similarities in the respective legal systems they are founding members of the EU they are neighbours they are civil law countries and their legal systems are relatively similar at least compared to Scandinavian and common law jurisdictions Therefore the different reception EU non discrimination law cannot simply be explained by obvious differences between the legal systems Their comparison thus provides an interesting case study to uncover legal and non legal cultural and historic factors which influence the application of EU non discrimination law in both countries The book is of interest for EU comparative and equality lawyers

International Organizations and Implementation Jutta Joachim, Bob Reinalda, Bertjan Verbeek, 2007-11-19

International organizations have once more become subjects of investigation for a whole range of scholars political scientists international relations specialists organization theorists and policy experts alike The end of the Cold War increased globalization and the intensification of regional and functional cooperation all have produced a greater interest in the role of international organizations and rightly so since they increasingly take part in global governance as over burdened governments become more and more willing to transfer responsibility to them or need to work through them International Organizations and Policy Implementation determines the extent to which international intergovernmental organizations are involved in the national implementation of internationally formulated policies In particular it specifies the conditions under which they can be more or less successful in influencing the course and content of implementation or imprint their perspective on domestic policies This edited volume helps to fill a gap in the existing literature in two respects contrary to many implementation studies the chapters are comparative in nature contrasting the role of international organizations across time different levels or different issue areas and second they are theoretically grounded Industrial Relations Trevor Colling, Mike Terry, 2010-09-07 This revised edition of Industrial Relations Theory and Practice follows the approach established successfully in preceding volumes edited by Paul Edwards The focus is on Britain after a decade of public policy which has once again altered the terrain on which employment relations develop Government has attempted to balance

flexibility with fairness preserving light touch regulation whilst introducing rights to minimum wages and to employee representation in the workplace Yet this is an open economy conditioned significantly by developing patterns of international trade and by European Union policy initiatives This interaction of domestic and cross national influences in analysis of changes in employment relations runs throughout the volume

Gendering Spanish Democracy Mónica Threlfall, Christine Cousins, Celia Valiente Fernández, 2005 Addressing aspects of women's experience such as the public spheres of elective politics public policy making the labour market this book offers an up to date critical assessment of gender in Spain

The Limits of Gendered Citizenship Elżbieta H. Oleksy, Jeff Hearn, Dorota Golańska, 2011-02-01 The underlying theme of this edited collection is gendered citizenship as well as the challenges and limits that confront the gendering of citizenship It critiques the notion of the genderless nation state citizen in both analytical and policy terms and contexts and necessarily engages with at least three major sets of contradictions or tensions limitations on achieving gender equal or gender equitable citizenship relations and differences between gender equality policy diversity policy and gender mainstreaming and interplays of academic analyses of and practical interventions on gendered citizenship Contributors from diverse scientific disciplines and academic backgrounds aim to provide a better understanding of the challenges that societies within Europe and elsewhere face vis vis diversity regionalism transnationalism and migration

Gendered Policies in Europe L. Hantrais, 1999-12-06 Gendered Policies in Europe examines the policy process focusing on the shifts in equal opportunities legislation towards measures to help parents combine employment and family life The authors track the inputs of members states and pressure groups to European policy formation and analyse outputs and outcomes at national levels as they impact on gender issues in law and practice They draw on examples of the implementation of reconciliation policies to illustrate how the policy process operates in different national contexts

Parliamentary Party Groups in European Democracies Knut Heidar, Ruud Koole, 2003-08-29 The partisan groups in parliament form the link between mass suffrage parties and parliaments and are generally accepted today as necessary instruments of parliamentary business Parliamentary party groups are central actors in most European democracies This volume analyses the manifestations and operations of these actors across thirteen different countries and in the European parliament

Quotas for Women in Politics : Gender and Candidate Selection Reform Worldwide Gender and Sexuality Studies Washington University in St. Louis Mona Lena Krook Assistant Professor of Political Science and Women, 2009-03-02 In recent years political parties and national legislatures in more than one hundred countries have adopted quotas for the selection of female candidates to political office Despite the rapid international diffusion of these measures most research has focused on single countries or at most the presence of quotas within one world region Consequently explanations for the adoption and impact of gender quotas derived from one study often contradict with findings from other cases Quotas for Women in Politics is the first book to address quotas as a global phenomenon to explain their spread and impact in diverse contexts around the world It is organized

around two sets of questions First why are quotas adopted Which actors are involved in quota campaigns and why do they support or oppose quota measures Second what effects do quotas have on existing patterns of political representation Are these provisions sufficient for bringing more women into politics Or does their impact depend on other features of the broader political context Synthesizing literature on quota policies this book develops a framework for analyzing the spread of quota provisions and the reasons for variations in their effects It then applies this framework to examine and compare campaigns for reserved seats in Pakistan and India party quotas in Sweden and the United Kingdom and legislative quotas in Argentina and France Dynamics of Regulatory Change David Vogel,Robert A. Kagan,2004-12-31 Critics of globalization

claim that economic liberalization leads to a lowering of regulatory standards As capital and corporations move more freely across national boundaries a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business The essays in this volume argue that on the contrary under certain circumstances global economic integration can actually lead to the strengthening of consumer and environmental standards This volume extends the argument of David Vogel s book *Trading Up* which discussed environmental standards by focusing on the impact of globalization on labor rights women s rights and capital market regulations **Political Theory**

and the European Union Michael Nentwich,Albert Weale,2003-09-02 The contributors to this book examine the issues of constitutional choice that face the governments and citizens of today s Europe Divided into three sections this study addresses questions of political legitimacy and the meaning of democratic deficit in the EU the reality of what institutional reforms and decision making processes are possible and the rights of citizenship and values that should be protected

Changing Government Relations in Europe Michael J. Goldsmith,Edward C. Page,2010-04-05 The past quarter of a century has seen extensive change throughout Europe There have been significant changes in local government and the European Union has come to play an increasing role in relation to municipal government This book offers a comparative analysis of recent developments in intergovernmental relations in twelve countries across Europe Using the framework for analysis from Page and Goldsmith s 1987 *Central and Local Government Relations* each chapter examines changes in central local relations in their respective country over the past 20 years This book extends the coverage to include for the first time both federal systems and Eastern European countries Offering detailed empirical studies it assesses how far there have been changes in the functions access and discretion of local government The book will be of great interest to students and scholars of local government urban politics EU studies and public administration *Feminist Policymaking in Chile* Liesl

Haas,2011-02-28 Investigates the efforts of feminists in Chile to win policy reforms on a broad range of gender equity issues from labor and marriage laws to educational opportunities to health and reproductive rights Provided by publisher *The*

True American Manifesto Richard W. Fredericks,2010-06-22 There is no available information at this time **Legal**

Mobilization for Migrant Rights Virginia Passalacqua,2025-05-07 The European Court of Justice plays a key role in the

interpretation and enforcement of EU law Yet we still know little about the conditions under which cases arrive at the Court via preliminary reference and why they are so unevenly distributed across the EU Member States Previous studies have shown how the legal elites played a central role in feeding the Court with cases to increase their power and influence Legal Mobilization for Migrant Rights tells a different story Focusing on the migration domain this book shows that EU litigation can also be used to defend powerless groups To explore the conditions under which EU legal mobilization for migrants emerges the author compares three countries where EU migration law was mobilized before the European Court of Justice Italy the UK and the Netherlands and one where it was not Greece Combining empirical and doctrinal methods this volume draws on interviews with key stakeholders and an original database of 505 migration preliminary references Rather than focusing only on courts Legal Mobilization for Migrant Rights sheds light on the role of lawyers academics and civil society in activating EU justice to oppose restrictive national migration policies Crucially the book ultimately reveals that EU legal mobilization struggles to emerge in some contexts due to a lack of resources and limited awareness of EU legal opportunities which stand as significant obstacles to justice and migrant rights enforcement

Public Policy to Reduce Inequalities Across Europe Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities
