Gay Men Pursuing Parenthood through Surrogacy Dean A. Murphy, 2015-07-01 Dean Murphy analyses how relatedness is enacted in the context of gay men pursuing parenthood and a child of one's own through both domestic and transnational surrogacy arrangements Drawing on data collected from in depth interviews with gay men living in Australia and the United States and news media the book explores how gay men enact parenthood and family life in ways that both challenge and reinforce dominant notions of kinship and masculinity These men represent an important first generation to access assisted reproductive technologies for this purpose and are part of an increasing proportion of gay men becoming parents outside a previous heterosexual relationship The findings demonstrate that men come to experience parenthood desire largely because of the new narratives and opportunities being made available to them today

Dads, Kids, and Fitness William Marsiglio, 2016-10-31 Now more than ever American dads act as hands on caregivers who are devoted to keeping themselves and their families healthy Yet men are also disproportionately likely to neglect their own health care diets and exercise routines bad habits that they risk passing on to their children In Dads Kids and Fitness William Marsiglio challenges dads to become more health conscious in how they live and raise their children His conclusions are drawn not only from his revealing interviews with a diverse sample of dads and pediatric healthcare professionals but also from his own unique personal experiences as a teenage father who thirty one years later became a later life dad to a second son Marsiglio's research highlights the value of treating dads as central players in what he calls the social health matrix which can serve both healthy children and those

with special needs He also outlines how schools healthcare facilities religious groups and other organizations can help dads make a positive imprint on their families health fitness and well being Anchored in compelling life stories of joy tragedy and resilience Dads Kids and Fitness extends and deepens public conversation about health at a pivotal historical moment Its progressive message breathes new life into discussions about fathering manhood and health *Handbook of Studies on Men and Masculinities* Michael S. Young adults have delayed marriage and cohabitation before marriage has become commonplace. One in three women giving birth is unmarried and the proportion of children under 18 living in single parent families rose from 23 to 31 percent between 1980 and 2000 reflecting increased rates of both nonmarital childbearing and divorce. This authoritative volume offers a blueprint for addressing some of the most important measurement issues in family research and it points out potential pitfalls for researchers and students who may not be familiar with data quality issues. The Handbook of Measurement Issues in Family Research will appeal to scholars in the departments of psychology, sociology and population studies as well as researchers working in governmental agencies.

Fatherhood in Contemporary Discourse Anna Pilińska, 2017-05-11 This volume offers a variety of perspectives on contemporary fatherhood from analyses of literature, film, drama and popular culture to issues tackled by psychology, gender studies and social sciences. Arranged into thematic sections, the chapters cover a wide range of approaches to fatherhood including studies and analyses based on fieldwork and interviews with participants. Each chapter discusses various culture-dependent models of masculinity in relation to the topic of fatherhood depicted in works of literary and film art, emphasizing the crucial factors and features which make all these models different from one another and using examples of such cultural contexts as Australia, China, Indonesia, Brazil and Iran. With the use of methodological tools provided by literature studies, film studies, culture studies, psychology, gender and queer studies and sociology, the book is a comprehensive insight into current research on both real life and fictional realizations of fatherhood.

Mayes, 2013-02-15 Historically there has been little integration of theoretical or applied research on addiction treatment and parenting intervention development Rather the fields of addiction and developmental research have progressed on largely separate trajectories even though their focus powerfully and often tragically intersects each time a parent is diagnosed with a substance use disorder Parenting and Substance Abuse is the first book to report on pioneering efforts to move the treatment of substance abusing parents forward by embracing their roles and experiences as mothers and fathers directly and continually across the course of treatment The chapters in this volume represent important new strides among researchers and clinicians to address and close the increasingly recognizable gap between addiction and developmental science Chapters focus on current state of the art treatment models for parents primarily pregnant and parenting women including descriptions of innovative treatments currently being developed and evaluated that focus on parental addiction and the parent child relationship within a developmental framework Part I covers the theoretical understandings of how addiction impacts the developmental processes of parenting Part II discusses risk assessment evaluation and a variety of interventions and therapies This unique volume will be of importance to clinicians researchers students and trainees in the health professions who develop implement and evaluate interventions for parental addiction including in well baby clinics primary care settings pediatric clinics and residential and outpatient drug treatment programs Gay and Lesbian Parenting Fiona Tasker, Jerry J. Fatherhood in Late Modernity
Mechtild Oechsle, Ursula Müller, Sabine Hess, 2012-08-09 Changes in Fatherhood How do structural changes in the welfare state in gender relations and work affect concepts and realities of fatherhood The authors analyse cultural images and representations of fatherhood varieties of fatherhood in relation to social backgrounds organisational influences as well as the impact of political and legal interventions on configurations of fatherhood With an interdisciplinary approach this book's contributions investigate the sometimes contradictory relationship between cultural representations and social practices of fatherhood They contextualise diverse fatherhoods in various social backgrounds ethnicities ages and different national contexts Reflecting methodological challenges is crucial to the volume's approach Which parameters are used to quantify change Which links and interactions between cultural individual organizational and societal dimensions do exist regarding

the development of new social configurations of fatherhood How can the complex interaction between structural constraints and agency be analysed Can certain agents of change be identified How can social change be conceptualized This volume links to international comparative research and shows how fruitful it can be to break disciplinary boundaries Birthing Fathers Richard K. Reed, 2005 In this unique study Richard Reed draws on the feminist critique of professionalized medical birthing to argue that the clinical nature of medical intervention distances fathers from child delivery He explores men's roles in childbirth and the ways in which birth transforms a man's identity and his relations with his partner his new baby and society In other societies birth is recognized as an important rite of passage for fathers Yet in American culture despite the fact that fathers are admitted into delivery rooms little attention is given to their transition to fatherhood

Conceptualizing and Measuring Father Involvement Randal D. Day, Michael E. Lamb, 2003-10-03 This comprehensive study focuses on ways of measuring the efficacy of father involvement in different scenarios using different methods of assessment and different populations It stems from a series of workshops and publications sponsored by the Family and Child Well Being Network Battleground: The Family Kimberly Brackett, 2008-12-30 Everyone is part of a family but what constitutes a family is one of the most hotly debated issues in the United States today Battleground The Family provides extensive coverage of those critical issues in U S culture concerning current and future family life such as dating marriage parenting work and family abuse and divorce The scholarly contributors to this set provide unbiased coverage on these often incendiary topics allowing students to assess the role of these controversies in their own lives Entries thoroughly introduce the topic of concern describe the problem as it currently exists provide context for the controversies surrounding it synthesize the current knowledge on the topic and guide the reader to additional areas for consideration Battleground The Family serves as a starting point for those advanced high school and beginning undergraduate students who wish to pursue a more detailed study of family controversies and cultural concerns for classroom assignments Non specialist readers will also find this a useful resource in critically assessing current trends and conflicts in constituent groups' conceptions of family Proposing Prosperity? Jennifer M. Randles, 2016-12-27 Fragile families unmarried parents who struggle emotionally and financially are one of the primary targets of the Healthy Marriage Initiative a federal policy that has funded marriage education programs in nearly every state These programs which encourage marriage by teaching relationship skills are predicated on the hope that married couples can provide a more emotionally and financially stable home for their children Healthy marriage policy promotes a pro marriage culture in which two parent married families are considered the healthiest It also assumes that marriage can be a socioeconomic survival mechanism for low income families and an engine of upward mobility Through interviews with couples and her own observations and participation in marriage education courses Jennifer M Randles challenges these assumptions and critically examines the effects of such classes on participants She takes the reader inside healthy marriage classrooms to reveal how

their curricula are reflections of broader issues of culture gender governance and social inequality In analyzing the implementation of healthy marriage policy Randles questions whether it should target individual behavior or the social and economic context of that behavior The most valuable approach she concludes will not be grounded in notions of middle class marriage culture Instead it will reflect the fundamental premise that love and commitment thrive most within the context of social and economic opportunity
