**Faith and Science at Notre Dame** John P. Slattery, 2019-08-31 The Reverend John Augustine Zahm CSC 1851 1921 was a Holy Cross priest an author a South American explorer and a science professor and vice president at the University of Notre Dame the latter at the age of twenty five Through his scientific writings Zahm argued that Roman Catholicism was fully compatible with an evolutionary view of biological systems Ultimately Zahm s ideas were not accepted in his lifetime and he was prohibited from discussing evolution and Catholicism although he remained an active priest for more than two decades after his censure In *Faith and Science at Notre Dame* John Zahm Evolution and the Catholic Church John Slattery charts the rise and fall of Zahm examining his ascension to international fame in bridging evolution and Catholicism and shedding new light on his ultimate downfall via censure by the Congregation of the Index of Prohibited Books Slattery presents previously unknown archival letters and reports that allow Zahm s censure to be fully understood in the light of broader scientific theological and philosophical movements within the Catholic Church and around the world *Faith and Science at Notre Dame* weaves together a vast array of threads to tell a compelling new story of the late nineteenth century The result is a complex and thrilling tale of Neo Scholasticism Notre Dame empirical science and the simple faith of an Indiana priest The book which includes a new translation of the 1864 Syllabus of Errors will appeal to those interested in Notre Dame and Catholic history scholars of science and religion and general readers seeking to understand the relationship between faith and science

**Notre Dame's John Zahm** Ralph E. Weber, 1961-01-01 *Notre Dame's John Zahm* Ralph Edward Weber, 1961 *The University of Notre Dame* Thomas E. Blantz C.S.C., 2020-08-31 Thomas Blantz s monumental *The University of Notre Dame A History* tells the story of the renowned Catholic university s growth and development from a primitive grade school and high school founded in 1842 by the Congregation of Holy Cross in the wilds of northern Indiana to the acclaimed undergraduate and research institution it became by the early twenty first century Its growth was not always smooth slowed at times by wars financial challenges fires and illnesses It is the story both of a successful institution and of the men and women who made it so Father Edward Sorin the twenty eight year old French priest and visionary founder Father William Corby later two term Notre Dame president who gave absolution to the soldiers of the Irish Brigade at the Battle of Gettysburg the hundreds of Holy Cross brothers sisters and priests whose faithful service in classrooms student residence halls and across campus kept the university progressing through difficult years a dedicated lay faculty teaching too many classes for too few dollars to assure the university would survive Knute Rockne a successful chemistry teacher but an even more successful football coach elevating Notre Dame to national athletic prominence Father Theodore M Hesburgh president for thirty five years the 325 undergraduate young women who were the first to enroll at Notre Dame in 1972 and thousands of others Blantz captures the strong connections that exist between Notre Dame s founding and early life and today s university Alumni faculty students friends of the university and fans of the Fighting Irish will want to own this

indispensable definitive history of one of America's leading universities Simultaneously detailed and documented yet lively and interesting The University of Notre Dame A History is the most complete and up to date history of the university available Huntington Co, In ,1993 Take a journey back in time as we recount the history of Huntington County Indiana from 1834 1993 This comprehensive history makes the past come alive with hundreds of never before published photographs and nearly 1 000 family biographies This will be a treasured volume for anyone with a link to this county Evolution and Dogma John Zahm,2017-12-06 In this book John Augustine Zahm C S C makes a concerted effort to reconcile the biological theory of evolution with the Catholic dogma of Creation Fr Zahm threads the findings of science into an interpretation of the works of St Gregory of Nyssa St Augustine of Hippo and St Thomas Aquinas all the while defending the indisputable existence of God the Creator of all things The twist Only the primordial matter was created out of nothing and from it through the laws with which God has endowed nature all creatures were created secondarily Fr Zahm acknowledges that the six day account of Creation in Genesis need not be read literally so as to accommodate the evidence from geology regarding the age of the earth and from paleontology of that of plants and animals He allows for a two origins theory of the creation of man as follows Man's body was subject to evolution but that at a certain point in its development God created and infused a soul into Adam the first man and into Eve his wife Adam and Eve are the ancestors common to all mankind And God created and will create a soul for every conception since the children of our first parents This book earned Fr Zahm harsh criticisms from many fronts including the Jesuits in Europe who delayed it to the Sacred Congregation of the Index A decree of prohibition against it was written but through the efforts of influential clergy it was never published Thereafter a cloud hung over Catholic scholarship on evolution It was only lifted in 1950 by the Encyclical Humani generis of Pope Pius XII In it the Pontiff allowed Catholic scholars to treat and teach evolution as a hypothesis In 1996 Pope St John Paul II indicated his acceptance of the two origins theory writing if the human body takes its origin from pre-existent living matter the spiritual soul is immediately created by God Disseminating Darwinism Ronald L. Numbers,John Stenhouse,1999-12-28 This innovative collection of original essays focuses on the ways in which geography gender race and religion influenced the reception of Darwinism in the English speaking world of the late nineteenth and early twentieth centuries The contributions to this volume collectively illustrate the importance of local social physical and religious arrangements while revealing that neither distance from Darwin's home at Down nor size of community greatly influenced how various regions responded to Darwinism Essays spanning the world from Great Britain and North America to Australia and New Zealand explore the various meanings for Darwinism in these widely separated locales while other chapters focus on the difference it made in the debates over evolution *Notre Dame vs. The Klan* Todd Tucker,2018-08-15 In 1924 two uniquely American institutions clashed in northern Indiana the University of Notre Dame and the Ku Klux Klan Todd Tucker's book published for the first time in paperback Notre Dame vs The Klan tells the shocking story of the three day confrontation in the streets of South

Bend Indiana that would change both institutions forever When the Ku Klux Klan announced plans to stage a parade and rally in South Bend hoping to target college campuses for recruitment starting with Notre Dame a large group of students defied their leaders pleas to ignore the Klan and remain on campus Tucker dramatically recounts the events as only a proficient storyteller can Readers will find themselves drawn into the fray of these tumultuous times Tucker structures this compelling tale around three individuals D C Stephenson the leader of the KKK in Indiana the state with the largest Klan membership in America Fr Matthew Walsh the young and charismatic president of the University of Notre Dame and a composite of a Notre Dame student at the time represented by Bill Foohey who was an actual participant in the clash This book will appeal not only to Notre Dame fans but to those interested in South Bend and Indiana history and the history of the Klu Klux Klan including modern day Klan violence

**The Craft of Innovative Theology** John Allan Knight, Ian S. My Last Chance to Be a Boy Joseph R. Ornig, 1998-04-01 **The Origins of Catholic Evolutionism, 1831-1950** Kenneth W. Kemp, 2025 The history of the Catholic Church s response to evolutionary biology has often been badly misrepresented as antagonistic In fact its response is better characterized as a long process of accommodation This work is a comprehensive introduction to the work of the Catholic scientists and theologians who worked out the details of that accommodation Few Catholics found the evolutionary origin of plant and

animal species theologically objectionable None thought that evolutionary processes provided a sufficient account of the origin of the first human beings Catholics differed over whether those processes played a role in the origin of the first human body Catholic evolutionism began with the work of four nineteenth century scientists who might be called the pioneers of Catholic evolutionism Belgian geologist Jean Baptiste d Omalius d Halloy English anatomist George Mivart Italian anatomist Filippo De Filippi and French paleontologist Albert Gaudry The next generations of Catholic evolutionists writing in the period from about 1890 1940 included scientists Jesuit entomologists Erich Wasmann and Felix R schkamp as well as priests who focused more exclusively on the question of compatibility Dalmace Leroy John Zahm Henry de Dorlodot and Ernest Messenger Among the scientists might also be included French paleontologist Pierre Teilhard de Chardin who made some contributions to the general idea of the compatibility of evolutionary biology and Catholic theology but who eventually veered off in the direction of a comprehensive evolutionary theology of nature the details of which are beyond the scope of this book Catholic anti evolutionists made efforts to have the Church prohibit works of Catholic evolutionism that in their judgment gave evolutionary processes too great a r le in the formation of the human body or that relied on problematic principles of hermeneutics Efforts on the former front were eventually blocked by Pope Pius XI The first magisterial statement on the question came however only in 1950 with Pope Pius XII s encyclical Humani generis which provisionally declared the orthodoxy of evolutionary accounts of the origin of the human body In addition to providing details about Catholic evolutionists and the magisterium the book also reviews the treatment of the new ideas in Catholic encyclopedias periodicals and textbooks Although written in the first instance as a work of scholarship the book was also written with attention to the needs of scientists priests and members of the general public who are interested in the question     Between Science and Religion Phillip M. Thompson,2009-08-15 In exploring the role of Catholic intellectuals in engaging science and technology in the twentieth century this book initially provides a background context for this evolution by examining the Modernism crisis in the first chapter In order to unpack the subsequent evolution Thompson then concentrates in separate chapters on the distinctive contributions of four specific Catholic intellectuals Jacques Maritain 1882 1973 Pierre Teilhard de Chardin 1881 1955 Bernard Lonergan 1904 1984 and Thomas Merton 1915 1968 All of these intellectuals experienced some degree of official restraint in their efforts but through their distinctive intellectual trajectories they contributed to a different engagement of the Church with science and technology In the final chapters the book first reviews the changes within the institutional Church in the twentieth century toward science and technology Finally it then applies some key ideals of the four intellectuals to anneal and extend John Paul II s approach of critical openness to suggest how the Church can now engage science and technology     An Archbishop for the People Richard Gribble,2006 The definitive biography of San Francisco s celebrated archbishop Edward J Hanna who was Archbishop of the Bay from 1912 1935 replete with photos bibliography index and endnotes     **Augustine and Time** John Doody,Sean Hannan,Kim Paffenroth,2021-05-25 This

collection examines the topic of time in the life and works of Augustine of Hippo Adopting a global perspective on time as a philosophical and theological problem the volume includes reflections on the meaning of history the mortality of human bodies and the relationship between temporal experience and linguistic expression As Augustine himself once observed time is both familiar and surprisingly strange Everyone's days are structured by temporal rhythms and routines from watching the clock to whiling away the hours at work Few of us however take the time to sit down and figure out whether time is real or not or how it is we are able to hold our past present and future thoughts together in a straight line so that we can recite a prayer or sing a song Divided into five sections the essays collected here highlight the ongoing relevance of Augustine's work even in settings quite distinct from his own era and context The first three sections organized around the themes of interpretation language and gendered embodiment engage directly with Augustine's own writings from the Confessions to the City of God and beyond The final two sections meanwhile explore the afterlife of the Augustinian approach in conversation with medieval Islamic and Christian thinkers like Avicenna and Aquinas as well as a broad range of Buddhist figures like Dharmakirti and Vasubandhu What binds all of these diverse chapters together is the underlying sense that regardless of the century or the tradition in which we find ourselves there is something about the puzzle of temporality that refuses to go away Time as Augustine knew demands our attention This was true for him in late ancient North Africa It was also true for Buddhist thinkers in South and East Asia And it remains just as true for humankind in the twenty first century as people around the globe continue to grapple with the reality of time and the challenges of living in a world that always seems to be speeding up rather than slowing down **Library Journal** Melvil Dewey, Richard Rogers Bowker, L.

Dosen, 2009-10-01 Catholic Higher Education in the 1960s is a series of cases that describes and analyzes the transitions made by representative Catholic institutions in their attempts to update their governance structures and maintain their Catholic identity in the midst of the post Vatican II era This book will be of interest to historians of education and Catholic education to administrators and faculty in Catholic schools and in other religious based institutions that seek to understand the dynamic of balancing their religious identity with their attempts at reading the signs of the times **Science, Religion, and the Human Experience**

James D. Proctor, 2005-04-21 The relationship between science and religion is generally depicted in one of two ways In one view they are locked in an inevitable eternal conflict in which one must choose a side In the other they are separate spheres in which the truth claims of one have little bearing on the other This collection of provocative essays by leading thinkers offers a new way of looking at this problematic relationship The authors begin from the premise that both science and religion operate in yet seek to reach beyond specific historical political ideological and psychological contexts How may we

understand science and religion as arising from yet somehow transcending human experience Among the scholars who explore this question are Bruno Latour Hilary Putnam Jeffrey Burton Russell Daniel Matt Michael Ruse Ronald Numbers Pascal Boyer and Alan Wallace The volume is divided into four sections The first takes a fresh look at the relationship between science and religion in broad terms as spheres of knowledge or belief realms of experience and sources of authority The other three sections take on topics that have been focal points of conflict between science and religion the nature of the cosmos the origin of life and the workings of the mind Ultimately the authors argue by seeing science and religion as irrevocably tied to human experience we can move beyond simple either/or definitions of reality and arrive at a more rich and complex view of both science and religion

**Flight Not Improbable** Simone Short, 2023-05-21 This book is a must read for all those interested in the evolution of airplanes Its protagonist Octave Chanute is best known for his scientific and collaborative approach to the engineering problems related to the development of flight and for the support he gave to the many aeronautical pioneers including the Wright Brothers But as the author clearly demonstrates this engineer's contributions in the aeronautical field have frequently been underestimated even though almost every famous and not so famous aeronautical enthusiast contacted him and used the readily available drawings of his glider to build and then learn to fly in their own design Chanute's biplane glider design developed and flown first in 1896 in the Indiana Dunes along Lake Michigan proved to be a key step in the evolution of the flying machine By freely sharing not only drawings of the general design of this aircraft but also the lessons learned the biplane became the starting point or prototype for many experimenters and can be considered the foundation for the modern airplane This book focuses on Chanute's work in aeronautics Not having the internet of today he became the post box of early aeronautics not only because of his landmark book *Progress in Flying Machines* but also because of his strong connections to anyone and everyone who worked in the aeronautical field He made a point of continuing to learn throughout his own life and strongly believed in sharing knowledge while fostering and mentoring all those who were willing to learn
