Nouveaux Documents Pour Letude Du Bronze:

Mortuary Ritual and Society in Bronze Age Cyprus Priscilla Keswani, 2004 A ground breaking investigation of burial practices and social transformations in the era when Cypriot agricultural communities moved from village to urban life and became major players in the eastern Mediterranean copper trade The author develops an innovative theoretical and methodological approach that enables her to define and elucidate the shifting spatial relationships between tombs and habitation areas the elaboration of rituals involving secondary treatment and collective burial and changing patterns of mortuary expenditure and symbolism throughout the Bronze Age Keswani proposes that during the Early Middle Bronze periods the growing elaboration of mortuary festivities and their crucial importance in negotiating status hierarchies contributed to the intensification of Cypriot copper production and the expansion of interregional exchange relations Subsequent changes in mortuary practice suggest that the importance of collective burial rites and traditional modes of ritual display diminished over the course of the Late Bronze Age as urban institutions multiplied and the bases of social prestige were transformed

The Topography of Ancient Idalion and its Territory Stephan G. Schmid, Will M. Kennedy, 2024-06-18 The question of how to define the territories of the ancient polities city kingdoms of Iron Age Cyprus is a fascinating but also a very difficult one While this topic has already been widely explored by

previous scholarship recent investigations that include both modern approaches such as the application of landscape archaeological methodologies as well as a re evaluation of the available archaeological evidence from a new perspective now offers a fresh take on such questions A workshop organized in Berlin in 2018 aimed at discussing additional information on the topography of the ancient city of Idalion and its hinterland This volume therefore includes unique contributions that deal with a wide array of relevant aspects They provide new information on the location chronology and character of settlements necropoleis and sanctuaries from the wider area of Idalion and discuss important issues such as the continuity or discontinuity of settlement activities from the Late Bronze Age to the Iron Age and how this is reflected by material culture They address questions concerned with the physical control of territories and communication networks by considering Idalion s resource availability and the overall development of its rural settlement pattern in contrast to that of its neighbouring polities

Archaeology Under Fire Lynn Meskell, 2002-01-04 The Middle East and Eastern Mediterranean are some of the most politically charged regions in which archaeology is implicated Historically they played a formative role in the birth of archaeology as a discipline Archaeology Under Fire addresses archaeology s role in current political issues including the ethnic cleansing in the Balkans the division of Cyprus and the continued destruction of Beirut The contributors consider the positive role of the past as a means of reconciliation whether it be in Turkey Israel and the Gulf They advocate a responsible global archaeology and an awareness of contemporary issues can only enhance this aim

Mycenaean Greece (Routledge Revivals) John T Hooker, 2014-03-18 Mycenaean Greece first published in 1976 investigates from an historical point of view some of the crucial periods in the Greek Bronze Age. The principal subject is the so called Mycenaean culture which arose during the sixteenth century BC as assimilation of the previous Helladic culture of mainland Greece with some of the developments of Minoan Crete. Many of the material aspects of the Mycenaean civilisation are examined as are the extent of Mycenaean expansion overseas and the eventual destruction of Mycenaean sites which marked the end of their civilisation. The author also considers the evidence relating to the religious beliefs of the Mycenaeans and their social, political and economic organisations and he relates the Mycenaean culture to the later civilisation of Archaic and Classical Greece. There is an Appendix containing a list of Mycenaean sites with reference to excavation reports and a full bibliography.

State and Society John Gledhill, Barbara Bender, Mogens Trolle Larsen, 1995. The traditional Eurocentric view of state formation and the rise of civilization is challenged in this broad ranging book. Bringing archaeological research into contact with the work of ethno-historians and anthropologists, it generates a discussion of fundamental concepts rather than a search for modern analogies for processes that occurred in the past.

PoCA (Postgraduate Cypriot Archaeology) 2012 Hartmut Matthäus, Bärbel Morstadt, Christian Vonhoffm, 2015-09-18. This volume brings together papers presented at the 12th edition of Postgraduate Cypriot Archaeology PoCA, an annual conference concerning the material culture of ancient, medieval and modern Cyprus, taking into account various aspects from different research projects conducted by researchers specialized in many fields of expertise. The contributions to this book cover multiple branches of study including prehistory, archaeology, history, art history, religious history, architecture and modern textiles studies, offering an interdisciplinary approach. Within this wide ranging academic setting, a chronological span from the Early Cypriot period that is to say from the 3rd millennium B.C. onwards to modern times is covered. Despite the great variety of archaeological and historical subjects, there is a special focus on Bronze Age Cypriot culture that helps to highlight a number of significant aspects of this important and formative period on the island of Aphrodite.
