Smith, 2018-02-20 Going beyond even the expertise of archaeologists and historians world class engineer Craig B Smith explores the planning and engineering behind the incredible Great Pyramid of Giza How would the ancient Egyptians have developed their building plans devised work schedules managed laborers solved specific design and engineering problems or even improvised on the job The answers are here along with dazzling one of a kind color photographs and beautiful hand drawn illustrations of tools materials and building techniques the ancient masters used In his foreword to the book Egypt's Undersecretary of State for the Giza

Monuments Zahi Hawass explains the importance of understanding the Great Pyramid as a straightforward construction project *Sticks, Stones, and Shadows* Martin Isler,2001 What do the pyramids of Egypt really represent What could have driven so many to so great and often so dangerous an effort Was the motivation religious or practical Illustrated with more than 300 photographs and drawings this book presents an original approach to the subject of pyramid building It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses It examines Egyptian technologies and techniques from the origins of pyramid development to the step by step details of how the ground was leveled how the site was oriented and how the stone was raised and placed to meet at a distant point in the sky Here the author also asks and answers questions virtually ignored for the last century He discloses for example the ancient use of shadows now denigrated to the ornamental back yard sundial but once an important tool for telling the height of an object geographical directions the seasons of the year and the time of day He also reinterprets the ancient stretching of the cord ceremony which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid *Treasure Trackers* Tim Tuck,2002 **Precalculus with Trigonometry** Paul A.
