

Thérèse Raquin

- Zola's first play to explore these ideas was *Thérèse Raquin* (1873), an adaptation of his 1867 novel.
- This play examined its characters as 'human organisms' – as Zola put it in his Preface, 'a study in physiology':
 - Surroundings were described in detail and realistically depicted, emphasising the physiological effects of environment upon characters;
 - Characters are driven primarily by natural urges and instincts – the sexual urge, the instinct of self preservation, the parental instinct ('Therese and Laurent are human beasts, nothing more.')
 - The culmination of the play was to be 'the mathematical solution of the problem posed.'
- In contriving a 'comeuppance' for Therese and Laurent, however, Zola turns the play into something of a moral fable.
