Nuclear Ambitions The Spread Of Nuclear Weapons 1989 199:

Nuclear Ambitions Leonard S. Spector, 2019-03-04 This is the fifth in a series on the spread of nuclear weapons Through these reports the Endowment seeks to increase public awareness of the fact and the danger of nuclear proliferation and to stimulate greater attention to this vital issue by policy makers the media and the scholarly community The series was initiated with the publication of *N The Twilight of the Bombs* Richard Rhodes, 2010-08-24 The culminating volume in Richard Rhodes s monumental and prizewinning history of nuclear weapons offering the first comprehensive narrative of the challenges faced in a post Cold War age The past twenty years have transformed our relationship with nuclear weapons drastically With extraordinary depth of knowledge and understanding Rhodes makes clear how the five original nuclear powers Russia Great Britain France China and especially the United States have struggled with new realities He shows us how the stage was set for a second tragic war when Iraq secretly destroyed its nuclear infrastructure and reveals the real reasons George W Bush chose to fight a second war in Iraq We see how the efforts of U S weapons labs laid the groundwork for nuclear consolidation in the former Soviet Union how and why South Africa secretly built and then destroyed a small nuclear arsenal and how Jimmy Carter s private diplomacy prevented another Korean War We also see how the present day represents a nuclear turning point and what hope exists for our future Rhodes assesses the emerging threat of nuclear terrorism and offers advice on how our complicated relationships with North Korea and South Asia should evolve Finally he imagines what a post nuclear world might look like suggesting what might make it possible Powerful and persuasive *The Twilight of the Bombs* is an essential work of contemporary history [Nuclear Safeguards and the International Atomic Energy Agency](#) , 1995 **Disarming Strangers** Leon V. Sigal, 1999-07-21 In June 1994 the USA went to the brink of war with North Korea Few Americans know the full details or realise the impact such an event could have had on the US s post Cold War foreign policy This book offers an inside look at the crisis **How South Africa Built Six Atom Bombs and Then Abandoned Its Nuclear Weapons Program** Al J. Venter, 2008 **Ballistic Missile Defense In The Post-cold War Era** David B H Denoon, 2021-11-28 With the end of the Cold War and the visibility of U S Patriot missile defenses during the 1991 Gulf War the cost and benefits of ballistic missile defense systems BMD need to be re evaluated In this detailed and balanced study David Denoon assesses new types of short range and intercontinental missile defenses In the post Cold War era two fundamental changes have made missile defense for the United States and its military forces more compelling The United States and Russia no longer see each other as direct threats and there has been a dramatic proliferation of ballistic missile capability in the Third World Consequently U S forces deployed overseas are more likely to be at risk and eventually the United States itself could become vulnerable to missile threats With these changes in mind David Denoon analyzes the current BMD dilemma arguing that active defenses against missiles should be seen as a form of insurance against catastrophe He assesses the likelihood of missile attacks and the appropriate level of investment for the United States to

defend against such attacks The book provides an assessment of deterrence and the performance of the Patriot missiles during the 1991 Gulf War critiques the Strategic Defense Initiative and analyzes the prospects for new types of short range and intercontinental missile defenses *Nuclear Weapons and American Grand Strategy* Francis J. Gavin, 2020-01-21

Exploring what we know and don't know about how nuclear weapons shape American grand strategy and international relations A 2020 CHOICE Outstanding Academic Title The world first confronted the power of nuclear weapons when the United States dropped atomic bombs on Hiroshima and Nagasaki in August 1945 The global threat of these weapons deepened in the following decades as more advanced weapons aggressive strategies and new nuclear powers emerged Ever since countless books reports and articles and even a new field of academic inquiry called security studies have tried to explain the so called nuclear revolution Francis J Gavin argues that scholarly and popular understanding of many key issues about nuclear weapons is incomplete at best and wrong at worst Among these important misunderstood issues are how nuclear deterrence works whether nuclear coercion is effective how and why the United States chose its nuclear strategies why countries develop their own nuclear weapons or choose not to do so and most fundamentally whether nuclear weapons make the world safer or more dangerous These and similar questions still matter because nuclear danger is returning as a genuine threat Emerging technologies and shifting great power rivalries seem to herald a new type of cold war just three decades after the end of the U S Soviet conflict that was characterized by periodic prospects of global Armageddon *Nuclear Weapons and American Grand Strategy* helps policymakers wrestle with the latest challenges Written in a clear accessible and jargon free manner the book also offers insights for students scholars and others interested in both the history and future of nuclear danger *Achieving Nuclear Ambitions* Jacques E. C. Hymans, 2012-02-16 From Iraq to Iran and from Libya to North Korea recent attempts to join the club of nuclear powers have tended to lose their momentum or even to fail outright This book shows how developing country rulers unintentionally thwart their own nuclear ambitions by undermining their scientific and technical workers The State of the United Nations, 1993 Gerald E. Dirks, 1993 **The Politics of**

Nuclear Non-Proliferation Ursula Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism *The Politics of Nuclear Non Proliferation* provides a theoretically innovative and practically useful framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political

contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory

Iran's Nuclear Ambitions Shahram Chubin, 2010-03-01 Iran is aggressively seeking nuclear technology that could be used for making weapons and its quest has set off alarms throughout the world This widespread concern stems in part from Iran's uncertain intentions and recent history Will it remain a revolutionary power determined to subvert its Sunni Arab neighbors destroy Israel and spread theocratic government to other lands Or would an Iran with nuclear weapons merely defend its territory from foreign aggression and live in peace with its neighbors Are the country's leaders and society willing to negotiate limits on nuclear capability and normalize relations with the West or will they resist accommodation Iran's Nuclear Ambitions provides a rare balanced look into the motivations perceptions and domestic politics swirling around Iran Shahram Chubin an Iranian born security expert details the recent history of Iran's nuclear program and diplomacy He argues that the central problem is not nuclear technology but rather Iran's behavior as a revolutionary state with ambitions that collide with the interests of its neighbors and the West Topics include The view from Tehran Iran's nuclear energy rationale domestic politics and decisionmaking Sources of concern including the nature of Iran's regime its nuclear infrastructure missile development and terrorism Iran's negotiating strategy The international response Iran and regional security including the U S as a threat and rival Iran's regional ambitions and Israel Policy options

Pakistan's Pathway to the Bomb Mansoor Ahmed, 2022 In Pakistan's Pathway to the Bomb author Mansoor Ahmed provides a groundbreaking account of Pakistan's rise as a nuclear power By drawing on elite interviews and previously untapped primary sources Ahmed reveals how bureaucratic politics shaped the nuclear program's development and where it stands today

Negotiating the Nuclear Non-Proliferation Treaty Roland Popp, Livia Horowitz, Andreas Wenger, 2016-10-04 This volume offers a critical historical assessment of the negotiation of the Treaty on the Non Proliferation of Nuclear Weapons NPT and of the origins of the nonproliferation regime The NPT has been signed by 190 states and was indefinitely extended in 1995 rendering it the most successful arms control treaty in history Nevertheless little is known about the motivations and strategic calculi of the various middle and small powers in regard to their ultimate decision to join the treaty despite its discriminatory nature While the NPT continues to be central to current nonproliferation efforts its underlying mechanisms remain under researched Based on newly declassified archival sources and using previously inaccessible evidence the contributions in this volume examine the underlying rationales of the specific positions taken by various states during the NPT negotiations Starting from a critical appraisal of our current knowledge of the genesis of the nonproliferation regime contributors from diverse national and disciplinary backgrounds focus on both European and non European states in order to enrich our understanding of how the global nuclear order came into being This book will be of much interest to students of nuclear proliferation Cold War

history security studies and IR **Asia, Southern** ,1995 **Nuclear Ambitions** Leonard S. Spector, Jacqueline R. Smith, 1990 **The International Political Economy and International Institutions** Oran R. Young, 1996 *The Making of the Global Nuclear Order in the 1970s* David Holloway, Leopoldo Nuti, 2020-12-17 This collection of essays offers a fresh look at the 1970s the crucial decade when the nuclear non proliferation regime took shape Exploring a broad array of newly declassified archival sources from different countries across the globe and moving freely across methodological and national barriers historians from Europe North and South America Asia and Africa discuss the making of the global nuclear order from truly international and transnational perspectives The result is a fascinating and innovative volume which will remain an essential reference for historians of the nuclear age of the cold war and more generally of the evolution of the international system in the second half of the twentieth century The chapters in this book were originally published as a special issue of The International History Review *Nuclear Apartheid* Shane J. Maddock, 2010 Nuclear Apartheid The Quest for American Atomic Supremacy from World War II to the Present Rethinking China, the Middle East and Asia in a 'Multiplex World' Mojtaba Mahdavi, Tugrul Keskin, 2022-03-07 This edited volume critically examines the changing dynamics of multidimensional relations between China Middle East and North Africa MENA and Asia in an emerging multiplex world It challenges both extremes of Sinophobia and Sinophilia by studying the real pragmatist China This book in a foreword introduction and thirteen chapters problematises what MENA and Asia means to China in the age of neoliberalism explores what are the real or perceived pillars of Sino MENA Asia relations and sheds light on how MENA can benefit from its relations with China while keeping a clear distance from the harms of neoliberal authoritarianism Contributors are Mojtaba Mahdavi Tugrul Keskin Manochehr Dorraj Sari Hanafi Habibul Haque Khondker Dara Conduit Rigas Arvanitis Saeed Shafqat Jordi Quero Arias Mahesh Ranjan Debata Andrea Ghiselli Mher Sahakyan Michael McCall Yossra M Taha and Xiaoyue Li

Defending Frenemies Jeffrey W. Taliaferro, 2019 The United States maintains defense ties with as many as 60 countries which not only enables its armed forces to maintain command globally and to project its force widely but also enables its government to exert leverage over allies foreign policies and military strategies In *Defending Frenemies* Jeffrey W Taliaferro presents a historical and comparative analysis of how successive US presidential administrations have employed inducements and coercive diplomacy toward Israel Pakistan South Korea and Taiwan over nuclear proliferation Taliaferro shows that the ultimate goals in each administration from John F Kennedy to George H W Bush have been to contain the Soviet Union s influence in the Middle East and South Asia and to enlist China as an ally of convenience against the Soviets in East Asia Policymakers inclinations to pursue either accommodative strategies or coercive nonproliferation strategies toward allies have therefore been directly linked to these primary objectives *Defending Frenemies* is sharp examination of how regional power dynamics and US domestic politics have shaped the nonproliferation strategies the US has pursued toward vulnerable and often obstreperous allies
