Nuclear Designs Bruce Larkin, 2018-04-17 Global politics has changed with unaccustomed swiftness since the end of the Cold War Eastern Europe is free the Soviet Union has broken up China presses free market economic reform and the United States and Russia have declared a joint commitment to end nuclear war The force of these changes has created a new agenda for global politics and security policy This does not mean that nuclear weapons have lost their centrality Nuclear development programs continue in the major holders of advanced weapons In Israel Pakistan India North Korea Iraq and Iran nuclear intentions are subject to widespread speculation and scrutiny Negotiations for renewal of the Nuclear Non Proliferation Treaty remind us that the treaty requires serious efforts to abolish nuclear weapons Nuclear Choices points out that the Cold War s end has not banished mistrust Instead it has opened the door to frank conversation about the usefulness of force and the need to address common fears States now face a global choice among alternative nuclear futures If they desire to avoid runaway nuclear development the choices come down to three the status quo disengagement or abolition Larkin argues that if they chose the status quo they elect a world in which only terror and self restraint keep devastation at bay a world in which instant destruction is possible This study focuses on the nuclear weapons programs of Great Britain China and France because they may be less familiar to students of international affairs Each of these countries has developed a substantial nuclear capability that could decisively shape the result of coming global nuclear decisions Larkin concludes that these three minipowers could conclude that nuclearism serves their interests refuse disengagement and encourage proliferation If they are prepared to abandon nuclearism they have tremendous political leverage on Russia the United States and also on undeclared and aspiring nuclear weapons states For now only the United Kingdom France and China maintain sufficient warhead inventories and production capabilities to have strong effects on how the United States and Russia view their own strategic capabilities Nuclear Choices asserts that governments polities and parties today do not know how to guarantee themselves against weapons of mass destruction They

must either acquire the political and social means to achieve such guarantees or accept a world in which nuclearism will continue to cast its shadow over all aspects of nation building It will be of interest to political scientists policymakers military analysts and those interested in the nuclear issue

Hearing Before the Subcommittee on Energy Committee on Science House of Representatives , A Profile of the Electric Power Industry Charles E. Clark,2012-09-18 The electric power industry was traditionally a utility to which people gave little thought It has stable prices low business risk and predictable emerging issues But great change has shaken the industry mergers have resulted in large and powerful companies Natural gas prices have plummeted and gas is replacing coal as the basis for both electricity production and new capacity Environmental regulation is in flux And new technologies are transforming all parts of the

industry's value chain. The high cost and new skills demanded by these technologies give rise to unprecedented financial risk. Addressing these new challenges and changes is the perfect book. A Profile of the Electric Power Industry Facing the Challenges of the 21st Century. This book describes how the industry is organized, how it functions, with several unique aspects addressed in depth. These aspects include electricity demand, production capacity, expansion, generating technologies, fuels, regulation of both prices and environmental impacts, and retail products. Global climate change, energy efficiency, and the Smart Grid also receive extended coverage to help you understand the industry's future. Sustainability in the Mineral and Energy Sectors. Sheila Devasahayam, Kim Dowling, Manoj K. Mahapatra, 2016-09-15.
