Photodisintegration of the Deuteron H. Arenhövel,M. Sanzone,2012-12-06 More than 50 years ago in 1934 Chadwick and Goldhaber ChG 34 published a paper entitled A Nuclear Photo effect Disintegration of the Diplon by γ Rays I in the introduction They noted By analogy with the excitation and ionisation of atoms by light one might expect that any complex nucleus should be excited or ionised that is disintegrated by γ rays of suitable energy and furthermore Heavy hydrogen was chosen as the element first to be examined because the diplon has a small mass defect and also because it is the simplest of all nuclear systems and its properties are as important in nuclear theory as the hydrogen is in atomic theory Almost at the same time in 1935 the first theoretical paper on the photodisinte gration of the deuteron entitled Quantum theory of the diplon by Bethe and Peierls BeP 35 appeared It is not without significance that these two papers mark the be ginning of photonuclear physics in general and emphasize in particular the special role the two body system has played in nuclear physics since then and still plays A steady flow of experimental and theoretical papers on deuteron photo disintegration and its inverse reaction n p capture shows the continuing interest in this fundamental process see fig 1 1

The Physics of Stars Second Edition is a concise introduction to the properties of stellar interiors and consequently the structure and evolution of stars Strongly emphasising the basic physics simple and uncomplicated theoretical models are used to illustrate clearly the connections between fundamental physics and stellar properties This text does not intend to be encyclopaedic rather it tends to focus on the most interesting and important aspects of stellar structure evolution and nucleosynthesis In the Second Edition a new chapter on Helioseismology has been added along with a list of physical constants and extra student problems There is also new material on the Hertzsprung Russell diagram as well as a general updating of the entire text It includes numerous problems at the end of each chapter aimed at both testing and extending student s knowledge **Delta Excitation In Nuclei - Proceedings Of The 3rd Tamura Symposium On Riken International Workshop** Hiroshi Toki,Masakatsu Ichimura,Masayasu Ishihara,1994-03-29 *Pion Exchange Currents in Deuteron Photodisintegration* Malcolm Harris Skolnick,1963 *Nuclear Theory Index* ,1963 **Bibliography of Photo- and Electronuclear Disintegrations** M.
