Nuclear Proliferation Islam The Bomb And South Asia:

Nuclear Proliferation Rodney W. Jones, 1981 Nuclear Proliferation in South Africa Lucky E. Asuelime, Raquel A. Adekoye, 2016-06-06 This book investigates drivers and trends in nuclear proliferation in the Global South Based on an in depth analysis of South Africa s nuclear history it examines general causes of proliferation such as technical capabilities and constraints a country s motivation to build a nuclear bomb and particular domestic and international situations It also highlights Britain s role in the development of technological capability in South Africa and explains how nuclear weapons influence international relations Finally the study offers effective solutions to the problem of nuclear proliferation in developing countries Nuclear Weapons Proliferation in the Indian Subcontinent Ziba Moshaver, 1991-06-18 There is concern about the proliferation of nuclear arms in the sub continent This book examines what influences arms policies there and argues that although both India and Pakistan are determined to retain their nuclear option both would welcome a situation which allowed them to de militarize *America, Britain and Pakistan's Nuclear Weapons Programme, 1974-1980* Malcolm M. Craig, 2017-06-26 This book analyses US and UK efforts to shut down Pakistan s nuclear programme in the 1970s between the catalytic Indian nuclear test of May 1974 and the decline of sustained non proliferation activity from mid 1979 onwards It is a tale of cooperation between Washington and London but also a story of divisions and disputes The brutal economic realities of the decade globalisation and wider geopolitical challenges all complicated this relationship Policy and action were also affected by changes elsewhere in the world Iran s 1979 revolution brought a new form of political Islamic radicalism to prominence The fears engendered by the Ayatollah and his followers coupled to the blustering rhetoric of Pakistani leaders gave rise to the Islamic bomb a nuclear weapon supposedly created by Pakistan to be shared amongst the Muslim ummah This study thus combines cultural diplomatic economic and political history to offer a rigorous deeply researched account of a critical moment in nuclear history Pakistan's Nuclear Policy Zafar Khan, 2014-07-17 In May 1998 in reaction to India s nuclear weapons tests Pakistan tested six nuclear weapons Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence This book looks at how this seemingly innocuous shift seriously impacted on Pakistan s nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region s changed changing strategic environment After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan s nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale

was for selecting minimum deterrence The book not only highlights Pakistan deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research

Libya and Nuclear Proliferation Wyn Q. Bowen, 2017-10-03 This Adelphi Paper examines the motives behind Libya's pursuit of a nuclear weapons capability from Gadhafi's rise to power in 1969 through to the end of 2003 It also assesses the proliferation pathways that the regime followed during this period including early dependence on Soviet technology and assistance subsequently relying on technological infusions from the A Q Khan network Wyn Q Bowen clearly analyzes the decision to give up the quest for nuclear weapons focusing on the main factors that influenced the Gadhafi regime's calculations including the perceived need to re-engage both politically and economically with the international community particularly the United States It explores the process of dismantling the nuclear programme and the question of whether Libya constitutes a model for addressing the challenges posed by other proliferators

The Proliferation Puzzle Zachary S. Davis, Benjamin Frankel, 2020-12-01 Originally published in 1993 this volume was unique in its scope and approach Unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation The proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now Among the topics discussed in The Proliferation Puzzle are The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations Nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military They may be sought for defensive purposes or to support hegemonic aspirations Nuclear weapons also raise questions about civilian command and control especially in crisis situations During the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally Nuclear weapons were introduced at the time bipolarity became the international order As the world moves away from bipolarity there is a need to answer questions such as What would be the effect of nuclear weapons in a multipolar order How will the spread of nuclear weapons affect the distribution of capabilities among states If nuclear weapons spread to additional countries will they enhance stability or exacerbate instability Can the

spread of these weapons be managed or controlled This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread A disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations
