Congress. Senate. Committee on Environment and Public Works. Subcommittee on Clean Air, Climate Change, and Nuclear Safety,2007 **No End in Sight** Nathan E. Busch,2014-10-17 The global threat of nuclear weapons is one of today's key policy issues Using a wide variety of sources including recently declassified information Nathan E Busch offers detailed examinations of the nuclear programs in the United States Russia China Iraq India and Pakistan as well as the emerging programs in Iran and North Korea He also assesses the current debates in international relations over the risks associated with the proliferation of nuclear weapons in the post Cold War world Busch explores how our understanding of nuclear proliferation centers on theoretical disagreements about how best to explain and predict the behavior of states His study bridges the gap between theory and empirical evidence by determining whether countries with nuclear weapons have adequate controls over their nuclear arsenals and fissile material stockpiles such as highly enriched uranium and plutonium Analyzing the strengths and weaknesses of various systems of nuclear weapons regulation Busch projects what types of controls proliferating states are likely to employ and assesses the threat posed by the possible theft of fissile materials by aspiring nuclear states or by terrorists No End in Sight provides the most comprehensive and up to date analysis of issues at the forefront of contemporary international affairs With the resurgence of the threat of nuclear terrorism Busch's insights and conclusions will prove critical to understanding the implications of nuclear proliferation *Who Needs Nuclear Power* Chris Anastasi,2020-10-13 Who Needs Nuclear Power challenges conventional thinking about the role of civil nuclear power in a rapidly changing energy context where new energy carriers are penetrating markets around the world Against the backdrop of a global energy transition and the defining issue of Climate Change Chris Anastasi assesses new nuclear build in a fast moving sector in which new technologies and practices are rapidly emerging He considers various countries at different stages of nuclear industry development and discusses their political legal and technical institutions that provide the framework for both existing nuclear facilities and new build as well as a country's technical capability He also highlights the critical issue of nuclear safety culture exploring how organisations go about instilling it and maintaining it in their operations and encouraging it in their supply chains the critical role played by independent regulators and international institutions in

ensuring the integrity of the industry is also highlighted This book provides a balanced and holistic view of nuclear power for both an expert and non expert audience and a realistic assessment of the potential for this technology over the critical period to 2050 and beyond

South Asia's Nuclear Security Dilemma Lowell Dittmer,2015-04-08 The nuclear test explosions in India and Pakistan in 1998 followed by the outbreak of hostilities over Kashmir in 1999 marked a frightening new turn in the ancient bitter enmity between the two nations Although the tension was eclipsed by the events of 9 11 and the subsequent American attacks on Afghanistan and Iraq it has not disappeared as evidenced by the 2001 attack in the Indian Parliament by Islamic fundamentalists out of Kashmir By 2002 these two nuclear armed neighbors seemed to be once again on the brink of war This book outlines the strategic structure of the rivalry and the dynamic forces driving it and investigates various possible solutions The expert contributors focus on the India Pakistan rivalry but also consider the China factor in South Asia s nuclear security dilemma Although essentially political strategic in its approach the book includes coverage of opposing military arsenals and the impact of local terrorism on the delicate balance of power

Calculated Risks Kenneth A. Rogers,Marvin G. Kingsley,2016-04-15 This well documented study examines one of the increasingly pressing problems for US homeland security the storage and management of radioactive waste Despite pressing homeland security and energy security concerns associated with highly radioactive waste political considerations have prevented policy makers from adopting adequate long term solutions to the problem This book explores nuclear waste problems through the broader lens of federal state and local government and the resultant constraints on policy that emerge within the American political system Presenting specific case studies to highlight the deficiencies in current policy and planning as well as the possibility of terrorist activity it is highly suited to courses on security studies and environmental politics

Russian Energy and Security up to 2030 Susanne Oxenstierna, Veli-Pekka Tynkkynen, 2014-01-03 The challenges in Russia s energy sector are changing On the demand side Europe is seeking to limit its dependence on Russian oil and gas with the result that China and other Asian countries are likely to eventually become growing export markets for Russian energy On the supply side oil and gas fields in West Siberia are diminishing and in future Russia s energy will have to come more from East Siberia and the Arctic which will necessitate new infrastructure development and the employment of advanced technologies which may increase Russia s dependence on commercial partners from outside Russia This book explores the challenges facing Russia s energy sector and the resulting security implications It includes a discussion of how far the Russian state is likely to continue to monopolise the energy sector and how far competition from private and foreign companies might be allowed
