Powaski, 2003-02-20 Return to Armageddon covers the extraordinary years spanning the Reagan Bush and Clinton administrations a period when the United States through its victory in the Cold War led the world away from the brink of nuclear annihilation and then slowly became aware of the increased threat of nuclear confrontation in a world more splintered than ever before and more at the mercy of fanatics and zealots *A Global History of the Nuclear Arms Race* Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime *Nuclear Proliferation, the Military-Industrial Complex, and the Arms Race* Kaitlyn Duling, 2017-07-15 The Cold War introduced new military arsenal weapons of mass destruction The United States and the Soviet Union invested billions of dollars into the development of sophisticated and destructive weapons Creating a dangerous military arsenal became another objective After the Soviet Union detonated its first atomic bomb the United States tested the first hydrogen bomb This book examines how nuclear proliferation and the arms race influenced the trajectory of the Cold War *Nuclear Arms Race* Sebastian Farnham, AI, 2025-03-04 Nuclear Arms Race explores the complex history of nuclear weapons from their creation to their lasting impact on global politics It argues that the nuclear arms race was more than just a military buildup it was a product of political ideologies scientific breakthroughs and human error shaping international relations even today The book uniquely examines the psychological factors influencing decision making during high tension periods offering a human centered perspective The book progresses by first introducing the science behind nuclear weapons and the ethical dilemmas faced by their creators It then analyzes the Cold War arms race including events like the Cuban Missile Crisis and the SALT talks Finally it addresses post Cold War challenges like nuclear proliferation and terrorism drawing on declassified documents archival materials and interviews with key figures This

approach provides a comprehensive understanding of nuclear weapons and their impact on the world *The Dynamics of the Arms Race* David Carlton, Carlo Schaerf, 2020-12-01 The nuclear arms race had dominated international politics for the two decades prior to publication Originally published in 1975 this symposium examines the dynamics of change within the arms race and the attempts at controlling and limiting it At the time the nuclear arms race was strongly technologically determined as Herbert York demonstrates in discussing the impact of MIRV Such progress as has been made in nuclear disarmament has been far outdistanced by the technological developments so that as Jack Ruina argues SALT is only important when seen as part of a process of negotiating arms limitations The most significant result of this technological advance has been the emergence of a qualitatively new system of international politics which Hans Morgenthau analyses This system is essentially bipolar in nuclear terms and the history of the disarmament negotiations as reviewed by William Epstein is an exercise in freezing this structure The negotiations themselves particularly SALT and the prospects for further progress are discussed extensively by Thomas Schelling Kosta Tsipis George Rathjens and others The book also surveys developments in chemical and biological warfare and includes an important paper on chemical warfare agents by the Soviet chemist O A Ruetov The final section looks at recent developments in the theory of conflict and its applications in the Middle East South Africa and a number of developing countries Understanding Doomsday Thomas Gordon Plate, 1971 SCOTT copy 1 from the John Holmes Library collection **Nuclear Arms and the Human Race** Rikhi Jaipal, 1986 **The Soviet Union, the West, and the Nuclear Arms Race** Robbin Frederick Laird, 1986 **The Day Before Doomsday** Sidney Lens, 1977 SCOTT copy 1 from the John Holmes Library collection Arms in the '80s John Turner, Stockholm International Peace Research Institute, 2020-11-19 In the 1980s the world spent an enormous amount on preparations for war Year by year more and more resources went into the military sector More and more complex weapon systems were devised At the time of all research scientists and engineers in the world more than one in four was working for the military Throughout the 40 years since the end of World War II the technological arms race continued Then began moving faster The United States lead the way followed by the Soviet Union Between them they possessed some 50 000 nuclear warheads more than enough to destroy the world They planned to increase the number to make the weapons more accurate and to base them on new weapon platforms closer to the borders of the other side Some people preferred not to think about these things Many however were becoming increasingly concerned wondering about the future for themselves and for their children Originally published in 1985 this book was for those who wanted to know what was happening What new missiles were being built What was happening in outer space What are the facts about chemical weapons What progress was being made if any in Geneva Vienna and Stockholm where the powers were negotiating on these matters *The Nuclear Arms Race* Jennifer Mason, 2017-07-15 The nuclear arms race was a competition for supremacy in nuclear weaponry between the United States the Soviet Union and their allies during the Cold War This significant volume outlines how dangerous this race really was detailing its

historical origins as well as the science behind nuclear technology and stresses the consequences of a nuclear war reflected in the devastation of Hiroshima and Nagasaki Japan at the end of World War II Though the Soviet Union is no more readers will find out how nuclear power is still being used and misused around the world
