**Nuclear Fictions** Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick

Serious Comedy Patrick Downey,2001-01-01 Patrick Downey finds comedy at the heart of the Western philosophical and theological tradition In Serious Comedy Downey tracks tragedy and comedy from the beginning of Western thought to the twentieth century beginning with an in depth examination of Aristotle and three Platonic

dialogues the Republic the Phaedrus and the Symposium In the book's second section Downey argues that the Bible is at heart a comedic narrative and analyzes the philosophical and theological implications of this comedy In the third section Downey traces comedy and tragedy in classic and modern philosophers such as Machiavelli Dante Hegel Nietzsche and Kierkegaard Readers with an interest in classical philosophy and theology political philosophy and narrative theory will be particularly interested in this insightful and thoughtful perspective on the Western tradition The Routledge Companion to Literature and Science Bruce Clarke, Manuela Rossini, 2010-09-13 With forty four newly commissioned articles from an international cast of leading scholars The Routledge Companion to Literature and Science traces the network of connections among literature science technology mathematics and medicine Divided into three main sections this volume links diverse literatures to scientific disciplines from Artificial Intelligence to Thermodynamics surveys current theoretical and disciplinary approaches from Animal Studies to Semiotics traces the history and culture of literature and science from Greece and Rome to Postmodernism Ranging from classical origins and modern revolutions to current developments in cultural science studies and the posthumanities this indispensable volume offers a comprehensive resource for undergraduates postgraduates and researchers With authoritative accessible and succinct treatments of the sciences in their literary dimensions and cultural frameworks here is the essential guide to this vibrant area of study **The United States and Terrorism** Ron Hirschbein, 2015-04-21 What is terrorism Academics search in vain for the unholy grail the definition of terrorism that will exonerate or condemn American officials There are many vying definitions and no tribunal to resolve the contest In this unique essay Ron Hirschbein analyzes conflicts in which officials themselves called their actions terrorist He reveals that terrorism didn't always get bad press In fact terror bombing was indispensable to winning World War II Not only did the Allied Forces bombed German cities but they also used the nuclear bomb in Japan killing many noncombatant civilians During the Cold War the threat of nuclear annihilation became the strategy to deter war between the superpowers Many ironies are brought to light in revisiting these conflicts such as the fact that it was accepted that safety depended upon the willingness to detonate weapons of mass destruction Not even American citizens enjoyed noncombatant immunity during the Cold War as they were held hostage to mutually assured destruction and marked for sacrifice in various strategic scenarios Indeed their lives were risked in confronting crises in Berlin and Cuba Subsequent conflicts in Korea Vietnam and Iraq as well as the War on Terror itself are also examined Like World War II all involved killing noncombatants by accident or design Casting these conflicts in an ironic light reveals incongruities in language and situations in which triumphant dreams become self-defeating realities as with the second Iraq war The War on Terror now rebranded as an Overseas Contingency Plan seems to be the answer to a Jihadist's prayer Further U.S. led covert attacks and assassinations by drones raise many discussions of legalities And today the curse of terrorism is fodder for captivating primetime entertainment enjoyed even by the president of the United States Communication Yearbook 29 Pamela J. **The Atomic Bomb and American Society** Rosemary B. Mariner, G. Kurt Piehler, 2009. Drawing on the latest research on the atomic bomb and its history, the contributors to this provocative collection of eighteen essays set out to answer two key questions: First, how did the atomic bomb, a product of unprecedented technological innovation, rapid industrial scale manufacturing, and unparalleled military deployment, shape U.S. foreign policy, the communities of workers who produced it, and society as a whole? And second, how has American society's perception that the bomb is a means of military deterrence in the Cold War era evolved under the influence of mass media, scientists, public intellectuals, and even the entertainment industry? In answering these questions, *The Atomic Bomb and American Society* sheds light on the collaboration of science and the military in creating the bomb, the role of women working at Los Alamos, the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness, the revolutionary change in military strategy following the invention of the bomb, and the development of Cold War ideology, the image of the bomb that was conveyed in the popular media, and the connection of the bomb to the commemoration of World War II. As it illuminates the cultural, social, political, environmental, and historical effects of the creation of the atomic bomb, this volume contributes to our understanding of how democratic institutions can coexist with a technology that affects everyone, even if only a few are empowered to manage it. Rosemary B. Mariner is formerly Joint Chiefs of Staff Chair and Professor of Military Studies for the National War College. She is currently a lecturer in history at the University of Tennessee, Knoxville. G. Kurt Piehler is associate professor of history and former director of the Center for the Study of War and Society at the University of Tennessee, Knoxville, which hosted the conference that formed the basis of this volume. He is the author of *Remembering War: The American Way and World War II* in the *American Soldiers' Lives Series*, as well as the coeditor with John Whiteclay Chambers II of *Major Problems in American Military History*.
