**Inadvertent Escalation** Barry R. Posen, 2014-01-13 In this sobering book Barry R Posen demonstrates how the interplay between conventional military operations and nuclear forces could in conflicts among states armed with both conventional and nuclear weaponry inadvertently produce pressures for nuclear escalation Knowledge of these hidden pressures he believes may help some future decision maker avoid catastrophe Building a formidable argument that moves with cumulative force he details the way in which escalation could occur not by mindless accident or by deliberate preference for nuclear escalation but rather as a natural accompaniment of land naval or air warfare at the conventional level Posen bases his analysis on an empirical study of the east west military competition in Europe during the 1980s using a conceptual framework drawn from international relations theory organization theory and strategic theory The lessons of his book however go well beyond the east west competition Since his observations are relevant to all military competitions between states armed with both conventional and nuclear weaponry his book speaks to some of the problems that attend the proliferation of nuclear weapons

in longstanding regional conflicts Optimism that small and medium nuclear powers can easily achieve stable nuclear balances is he believes unwarranted     Cold War Analytical Structures and the Post Post-War World Cori E.

Dauber,1993-02-22 This volume takes a perspective on the debate over deterrence theory that has never been used before Other books either address the differences between the two competing schools of thought those who support Mutual Assured Destruction MAD and those who support nuclear warfighting or examine particular policies from within the perspective of one or the other school of thought Cori Dauber examines deterrence theory at a structural level which allows a focus on the similarities between the major perspectives on nuclear strategic doctrine By examining such issues as validity standards and the evaluation of evidence Dauber is able to assess deterrence as a theory of persuasion and to examine the way deterrence discourse so shapes the thinking of policy makers and analysts that it still drives our analysis of alternatives even in the post Soviet era Dauber concludes that deterrence is a system designed to use weapons capabilities as a form of non verbal communication with an Other for the last forty years the Soviet Other Understanding these rhetorical structures and the way they function is essential in predicting the restrictions that deterrence places on the way the United States responds to foreign nations Cold War Analytical Structures and the Post Post War World serves as a model for how scholars in argument and persuasion can apply their methods to real world situations     New Technologies and the Arms Race Carlo

Schaerf,Brian Holden Reid,David Carlton,2016-01-07 This volume contains the proceedings of the International Conference on Technology Arms Race and Disarmament which took place at Castiglioncello Italy in September 1987 The papers examine strategic defence policies nuclear weapons proliferation and arms control among many other topics     **Learning to Love**

**the Bomb** Sean M. Maloney,2007 In Learning to Love the Bomb Sean M Maloney explores the controversial subject of Canada s acquisition of nuclear weapons during the Cold War Based on newly declassified Canadian and U S documents it examines policy strategy operational and technical matters and weaves these seemingly disparate elements into a compelling story that finally unlocks several Cold War mysteries For example while U S military forces during the 1962 Cuban Missile Crisis were focused on the Caribbean Sea and the southeastern United States Canadian forces assumed responsibility for defending the northern United States with aircraft armed with nuclear depth charges flying patrols and guarding against missile attack by Soviet submarines This defensive strategy was a closely guarded secret because it conflicted with Canada s image as a peacekeeper and therefore a more passive member of NATO than its ally to the south It is revealed here for the first time The place of nuclear weapons in Canadian history has until now been a highly secret and misunderstood field subject to rumor rhetoric half truths and propaganda Learning to Love the Bomb reveals the truth about Canada s role as a nuclear power     **Quarterly Review of Military Literature** ,1982     *Eagle in a New World* Kenneth A. Oye,Robert J.

Lieber,Donald S. Rothchild,1992 Examines American foreign policy in the post Cold War and post Gulf War era Page ix

**Weapons of Mass Destruction** Eric A. Croddy,James J. Wirtz,Jeffrey A. Larsen,2004-12-22 The first accessible

reference to cover the history context current issues and key concepts surrounding biological chemical and nuclear weapons A collection of information on everything from aerosols to zones of peace these two volumes cover historical background technology and strategic implications of biological chemical and nuclear weapons thus providing facts terms and context needed to participate in contemporary policy debate This encyclopedia is the only comprehensive reference dedicated to the three types of weapons of mass destruction With over 500 entries arranged alphabetically volume one covers biological and chemical weapons while volume two focuses on nuclear weapons Experts from eight countries cover issues related to these weapons policies strategies technologies delivery vehicles arms control concepts treaties and key historical figures and locations Entries are written to make difficult concepts easy to understand by cutting through military and scientific jargon Students lay readers scientists and government policy makers are provided with the broad range of information needed to place today s policy discussions in proper strategic or historical context
