## **Nuclear Predicament:**

*The Nuclear Dilemma In American Strategic Thought* Robert E. Osgood, 2019-06-18 Since the end of World War II the United States has faced moral and strategic issues in its management of force that are unique in the history of international politics At the heart of these issues is the heavy reliance of the United States and its allies on the deterrent effect of nuclear weapons and the fact that their use would very likely lead to nuclear war

**The Nuclear Predicament** Peter R. Beckman, 1992 Updated to reflect how the end of the Cold War gives us an opportunity to redefine the way the nuclear world operates this text shows how nuclear weapons have changed the world militarily politically socially and ethically

**The Nuclear Predicament** Stephen Shenfield, 2020-11-19 Ideological debate is one component of the intellectual background to Soviet policy making Originally published in 1987 this paper explores how Soviet writers wrestle with the challenge to their ideology that is posed by the threat of nuclear war What for example is the relationship between the values of peace and of socialism What drives the arms race Is capitalism inherently militaristic or is a demilitarized capitalism conceivable Is the outcome of history predetermined or open It is shown that the range of permissible views is wider than often assumed and that the constraints of Soviet ideology do not exclude evolution towards a more cooperative approach to international security

*Nuclear Weapons and the Future of Humanity* Avner Cohen, Steven Lee, Steven P. Lee, 1986

[The Nuclear Predicament](#) Donna Uthus Gregory, 1986

**Air University Review**, 1983-05

**Transformations of Post-Communist States** W. Kostecki, K. Zukrowska, B. Goralczyk, 2000-04-07 Post communist transformation differs from any previous experience of societies in transition by its scope speed international framework and complicity It contains elements of democratization marketization nation building and the creation of a new international environment in the framework of globalization The contributors give an internal perspective of these highly complicated processes in a comparative form and using a multidisciplinary approach

*The Fate of the Earth and The Abolition* Jonathan Schell, 2000 These two books which helped focus national attention on the movement for a nuclear freeze are published in one volume

**Love Your Enemies** Lisa Sowle Cahill, 1994 The author examines the theological bases of just war theory and pacifism especially in the light of the concept of God as that motif illuminates Christian discipleship Differences between the theory of just war and the practice of pacifism are highlighted in the overview of the history of Christian thought on the subject and the inclusiveness of the ideal of the kingdom for pacifism is emphasized

**Tokens of Power** Ann Hironaka, 2017-03-06 What motivates going to war This book reexamines how leaders make decisions based on appearances of power over military reality

**War Stars** Howard Bruce Franklin, 2008 In this new and expanded edition of an already classic work H Bruce Franklin brings the epic story of the superweapon and the American imagination into the ominous twenty first century demonstrating its continuing importance both to comprehending our current predicament and to finding ways to escape from it Sweeping through two centuries of American culture and military history Franklin traces the evolution of superweapons from Robert Fulton s eighteenth century submarine through

the strategic bomber atomic bomb and Star Wars to a twenty first century dominated by weapons of mass destruction real and imagined Interweaving culture science technology and history he shows how and why the American pursuit of the ultimate defensive weapon guaranteed to end all war and bring universal triumph to American ideals has led our nation and the world into an epoch of terror and endless war World Politics, Human Rights, and International Law Francis A.

Boyle,2021-02-04 World Politics Human Rights and International Law examines the functional dynamics between these concepts based upon the author s professional experiences dealing with real world situations problems and crises from the Bush Obama and Trump administrations Iraq Iran Palestine Israel and Syria Bosnia and Herzegovina successfully litigating genocide at the World Court indicting Slobodan Milosevic at the International Criminal Tribunal for the Former Yugoslavia prosecuting American torture and enforced disappearances at the International Criminal Court opposing nuclear chemical and biological weapons citizen civil resistance against state crimes protecting Indigenous Peoples etc The reader can see how the author defined these predicaments from the perspective of international law and human rights and then proceeded to grapple with them and to rectify them This book demonstrates the power of international law and human rights to make a positive difference for international peace and justice as well as for the good of humanity in the real world of international power politics By reading this book the citizen will be empowered and inspired to do the same Deterrence in the 1980s R.

B. Byers,2020-11-19 Originally published in 1985 Deterrence in the 1980s offers analyses by leading American and Canadian scholars and decision makers in the field of strategic studies of the current problems and dilemmas of contemporary international security with deterrence nuclear and conventional as the unifying conceptual theme Deterrence as theory as history as psychology as politics as ethics and as policy is addressed The authors outline the complexities of deterrence in theory and in practice and offer proposals regarding the future operationalization of deterrence in order both to reassure Western publics and to enhance Western and international security Soviet American strategic relations along with the problems posed for the Western Alliance are analysed Within the context of NATO the dilemmas for both Europe and North America of extended deterrence are raised Despite the current crisis of deterrence no other security strategy appears viable as long as nuclear weapons are retained for purposes of national security However current trends in the operationalization of deterrence nuclear war fighting capabilities have raised concerns about the future of deterrence **The Apocalyptic**

**Premise** Ernest W. Lefever (red.),E. Stephen Hunt,1982 This document contains 31 position papers that reflect a wide range of views on nuclear arms policy held by political leaders religious authorities scholars policy experts journalists and political activists Since no judgments are made the reader is left to decide which arguments are most compelling Each position paper is arranged into one of five sections Arms Control Issues The Peace Movement The Apocalyptic Premise The Churches and Nuclear Arms and Official Views Each essay is preceded by a brief introduction pointing out main themes and relating both complementary and opposing contributors to one another Also included is a chart showing the comparative strengths of

NATO and Warsaw Pact forces in Europe a five part bibliography corresponding to the five divisions of the text and an index of names APG      **The Unconquerable World** Jonathan Schell, 2004-07-07 Argues for an end to the belief that military domination is the best path to global peace offering the tradition of nonviolent political action and passive resistance in its stead      *Circle of Peace* Anthony A. Lee, 1985      **Routledge Library Editions: Discourse Analysis** Various, 2021-06-23

Discourse analysis is a wide ranging area of study that examines the features of language beyond the limits of a sentence including vocal written and sign language along with any significant semiotic events It has been employed from a number of interdisciplinary perspectives in an attempt to reveal a person's socio psychological characteristics through the practical analysis of naturally occurring language rather than artificially created examples Routledge Library Editions Discourse Analysis brings together an extensive collection of scholarship that reflects the broad scope of the subject area examining the relationship of discourse to a number of closely related fields including stylistics pragmatics speech conversation context anaphora grammar and psychology This set published between 1979 and 1993 provides a thorough grounding in this key discipline for students of linguistics and psychology and social sciences in general      Globalization, 3rd edition Eleonore Kofman, Gillian Youngs, 2008-04-28 This fully revised and updated textbook focuses on the major topics of globalization today These include the impact of migration relations between the northern and southern hemispheres how gender and power plays into the globalization process and the politics and economics of freedom of movement in the world Two new chapters on the impact of technology on global communications and the effect of the emerging economies of India and China bring the book fully up to date Further current issues such as the debate concerning environmental security natural disasters the broad spectrum between women's empowering impact in the marketplace and the continued exploitation of women in the sex and service trade are also examined Eleanor Kofman and Gillian Youngs have edited an excellent and comprehensive collection essential for both undergraduate and graduate students trying to gain an understanding of theories and practices driving globalization as we enter into the twenty first century      *Post-communist Studies And Political Science* Jr. Fleron, Erik P Hoffmann, 2019-08-15 Serious stock taking is in progress now among practitioners of what has been called Sovietology meaning studies of the Union of Soviet Socialist Republics The reason is that the field for the most part had not been expecting what happened in 1991 The USSR collapsed and went out of existence as a unified state system governing a sixth of the world's territory having allowed its East European empire to free itself from Soviet dominance somewhat earlier It might be said in defense of Sovietology that by the beginning of the 1980s it understood that economic and political crises were brewing in the Soviet Union and its outer empire But the field as a whole failed to grasp the full depth of the systemic crisis in Soviet Russia and the destructive or self destructive potentialities inherent in it As the editors of this valuable volume write in the Introduction Sovietology was not prepared for perestroika and postcommunism      Global Horizons Hendrik Spruyt, 2009-03-01 In the current era we have the ability to wage global war interact economically and culturally with any

part of the world and communicate with each other in real time Our horizons are now global Time and space have contracted This text takes the change in our horizons as a key feature of modern international relations examining how international politics and the relations between nations and states have become global politics Rather than survey a large array of issues and theories Spruyt provides students with particular tools of the trade and with different perspectives to understand given empirical puzzles Each section of the book discusses key theories which may be useful in understanding the issues in question and then applies them to empirical cases in order to demonstrate how theory relates to practice Case studies allow for both an historical and comparative approach
