A History of the Atomic Space Age and Its Implications for the Future Willis L. Shirk, 2018-02-12 The Atomic Space Age has been and continues to be an engine for future wealth creation Humanity stands on the verge of becoming an interplanetary species We know we are made of star stuff precisely because many of the isotopes in our bodies originated in the death throes of dying suns With the discovery of nuclear fission in 1938 mankind was for the first time able to glimpse both our distant past and our possible future As with the discovery of fire and agriculture thousands of years ago wind power hundreds of years ago and steam power and electricity in the nineteenth century we must now learn to tame this powerful new force locked within the heart of the atom Buckminster Fuller once observed that wealth is nothing more than energy compounded by ingenuity Since mass energy can never decrease and ingenuity will only increase there is no limit to the quantity of wealth that our species can and will create using nuclear space propulsion

[Lincoln's Spies](#) Douglas Waller, 2020-08-18 This major addition to the history of the Civil War is a fast paced fact rich account The Wall Street Journal offering a detailed look at President Abraham Lincoln's use of clandestine services and the secret battles waged by Union spies and agents to save the nation filled with espionage sabotage and intrigue Veteran CIA correspondent Douglas Waller delivers a riveting account of the heroes and misfits who carried out a shadow war of espionage and covert operations behind the Confederate battlefields Lincoln's Spies follows four agents from the North three men and one woman who informed Lincoln's generals on the enemy positions for crucial battles and busted up clandestine Rebel networks Famed detective Allan Pinkerton mounted a successful covert operation to slip Lincoln through Baltimore before his inauguration after he learns of an assassination attempt from his agents working undercover as Confederate soldiers But he proved less than competent as General George McClellan's spymaster delivering faulty intelligence reports that overestimated Confederate strength George Sharpe an erudite New York lawyer succeeded Pinkerton as spymaster for the Union's Army of the Potomac Sharpe deployed secret agents throughout the South planted misinformation with Robert E Lee's army and outpaced anything the enemy could field Elizabeth Van Lew a Virginia heiress who hated slavery and disapproved of secession was one of Sharpe's most successful agents She ran a Union spy ring in Richmond out of her mansion with dozens of agents feeding her military and political secrets that she funneled to General

Ulysses S Grant as his army closed in on the Confederate capital. Van Lew became one of the unsung heroes of history. Lafayette Baker was a handsome Union officer with a controversial past whose agents clashed with Pinkerton's operatives. He assembled a retinue of disreputable spies, thieves and prostitutes to root out traitors in Washington DC. But he failed at his most important mission: uncovering the threat to Lincoln from John Wilkes Booth and his gang. Behind these operatives was Abraham Lincoln, one of our greatest presidents who was an avid consumer of intelligence and a ruthless aficionado of clandestine warfare, willing to take whatever chances necessary to win the war. Lincoln's Spies is a meticulous chronicle of all facets of Lincoln's war effort. Kirkus Reviews and an excellent choice for those wanting a cracking good tale. Publishers Weekly of espionage in the Civil War.

Indian Naval Strategy in the Twenty-first Century James R. Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions. By a quirk of historical fate, Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea, ushering in centuries of Western dominance. In the 21st century, however, Asian states are once again resuming a naval focus, with both China and India dedicating some of their new-found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces. The United States, like the British Empire before it, is attempting to manage these rising sea powers while preserving its maritime primacy. This book probes how India looks at the sea, what kind of strategy and seagoing forces New Delhi may craft in the coming years, and how Indian leaders may use these forces. It examines the material dimension, but its major premise is that navies represent a physical expression of a society's history, philosophical traditions and culture. This book then ventures a comprehensive appraisal of Indian maritime strategy. This book will be of interest to students of sea power, strategic studies, Indian politics and Asian Studies in general. James R. Holmes is an Associate Professor of Strategy at the U.S. Naval War College and a former U.S. Navy surface warfare officer. Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College. Andrew C. Winner is Professor in the Strategic Research Department at the U.S. Naval War College.

Disciples Douglas Waller, 2015-10-06 They are the most famous and controversial directors the CIA has ever had: Allen Dulles, Richard Helms, William Colby and William Casey. *Disciples* is the story of these dynamic agents and their daring espionage and sabotage in wartime Europe under OSS Director Bill Donovan.

The Silent Service John Parker, 2013-02-28 One of the great untold stories of the British services is that of the Royal Navy Submarine Service, which entered the fray in World War I with 100 underwater craft. Through World War II, where submariners' prospects of returning safely from a mission were only 50/50, the Falklands conflict and the sinking of the *Belgrano* to present-day elite machines, the Silent Service has played an enormous part in British defence. John Parker's in-depth investigation is very much personality-led, with diaries from the early part of the century to substantial first-person testimony from survivors of wartime heroics when many VCs were won.

The Complete Idiot's Guide to Submarines

Michael DiMercurio, Michael Benson, 2002-12-23 Presents information about submarines from providing a room by room tour of a typical vessel to analyzing the history of submarines during wars and on maneuvers **Submarine Admiral I. J. Galantin**, 1997-05 Offers an insider's account of the development of the ballistic missile submarine and a lifelong love affair with submarines [The Cold War 1949-2016](#) Martin McCauley, 2017-05-18 Covering the development of the Cold War from the mid twentieth century to the present day [The Cold War 1949-2016](#) explores the struggle for world domination that took place between the United States and the Soviet Union following the Second World War The conflict between these two superpowers shaped global history for decades and this book examines how this conflict developed into a nuclear arms race spurred much of the wider world towards war and eventually resulted in the collapse of the Soviet empire In this accessible yet comprehensive volume Martin McCauley examines not only the actions of the United States and the Soviet Union but also the effects upon and involvement of other regions such as Africa Central America Asia Europe and the Middle East Key themes include the Sino Soviet relationship and the global ambitions of the newly formed People's Republic of China the rise and fall of communism in countries such as Cuba Angola and Ethiopia the US defeat in Vietnam the gradual unravelling of the Soviet Union and the changing shape of the post Cold War world Providing a wide ranging overview of the main turning points of the conflict and illustrated throughout with photographs and maps this is essential reading for all students of the Cold War and its lasting global impact [The International Politics of the Asia Pacific](#) Michael B. Yahuda, 2011 **Bulletin of the Atomic Scientists**, 1989-07 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **From Insight to Innovation** David P. Billington, Jr., 2020-11-17 The engineering ideas behind key twentieth century technical innovations from great dams and highways to the jet engine the transistor the microchip and the computer Technology is essential to modern life yet few of us are technology literate enough to know much about the engineering that underpins it In this book David P Billington Jr offers accessible accounts of the key twentieth century engineering innovations that brought us into the twenty first century Billington examines a series of engineering advances from Hoover Dam and jet engines to the transistor the microchip the computer and the internet and explains how they came about and how they work Each of these innovations tells a unique story The great dams of the New Deal brought huge rivers under control and a national highway system interconnected the nation as did jet air travel The transistor and the microchip originated in the private sector and found a mass market after early government support The computer and the internet began as government projects and found a mass market later in the private sector Billington finds that engineers with unconventional insights could succeed in a bureaucratic age what mattered were independent vision and a society that welcomed innovation This book completes the story of American engineering begun with the earlier volumes *The Innovators* by the author's father and *Power Speed and Form* by the author and his father *British Naval Intelligence*

through the Twentieth Century Andrew Boyd, 2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid nineteenth century when the Admiralty first created a dedicated intelligence department through to the end of the Cold War It brings a critical new dimension to our understanding of British naval history in this period while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains why and how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations

The New Face of War Bruce D. Berkowitz, 2010-05-11 As American and coalition troops fight the first battles of this new century from Afghanistan to Yemen to the Philippines to Iraq they do so in ways never before seen Until recently information war was but one piece of a puzzle more than a sideshow in war but far less than the sum total of the game Today however we find information war revolutionizing combat from top to bottom Gone are the advantages of fortified positions nothing is impregnable any longer Gone is the reason to create an overwhelming mass of troops now troop concentrations merely present easier targets Instead stealth swarming and zapping precision strikes on individuals or equipment are the order of the day based on superior information and lightning fast decision making In many ways modern warfare is information warfare Bruce Berkowitz's explanation of how information war revolutionized combat and what it means for our soldiers could not be better timed As Western forces wage war against terrorists and their supporters in actions large and small on several continents *The New Face of War* explains how they fight and how they will win or lose There are four key dynamics to the new warfare asymmetric threats in which even the strongest armies may suffer from at least one Achilles heel information technology competition in which advantages in computers and communications are crucial the race of decision cycles in which the first opponent to process and react to information effectively is almost certain to win and network organization in which fluid arrays of combat forces can spontaneously organize in multiple ways to fight any given opponent at any time America's use of networked elite ground forces in combination with precision guided bombing from manned and unmanned flyers turned Afghanistan from a Soviet

graveyard into a lopsided field of American victory Yet we are not invulnerable and the same technology that we used in Kuwait in 1991 is now available to anyone with a credit card and access to the Internet Al Qaeda is adept in the new model of war and has searched long and hard for weaknesses in our defenses Will we be able to stay ahead of its thinking In Iraq Saddam's army is in no position to defeat its enemies but could it defend Baghdad As the world anxiously considers these and other questions of modern war Bruce Berkowitz offers many answers and a framework for understanding combat that will never again resemble the days of massive marches on fortress like positions The New Face of War is a crucial guidebook for reading the headlines from across our troubled planet Intelligence and the Cuban Missile Crisis James G. Blight, David A. Welch, 2013-11-05 This is the first study to examine thoroughly the role of US Soviet and Cuban Intelligence in the nuclear crisis of 1962 the closest the world has come to Armageddon **The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual** Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal
