**Alien Thirteen** O'Clock Press, 2014-05-06 Sci-fi fan or not, aliens hold a fascination for humans. The mystery of UFOs, the thought they may walk among us without us knowing, the thought they may be watching us all the time, these things ensure that we as a race are absorbed with thoughts of aliens. However, they might show themselves. In giving Thirteen's talented writers a theme like that, it was guaranteed that the stories which came in would cover every possible interpretation of the alien theme that you can imagine, and then some. Walk some strange pathways, read some strange stories, discover some strange aliens.

The entry for each individual work includes title, publisher, date, and place published, number of pages, hardbound or paperback format, and type of book (novel, anthology, etc.). Where appropriate, entries also provide translation notes, series information, pseudonyms, and remarks on special features such as celebrity introductions. The time is 2183 Fifty six year old Saunders Maxwell is a stubborn old space farer who has spent his entire life in space He has captained the Moon Mars shuttle and led exploration missions beyond Mars When he came to Mars in his forties he helped discover the water source that made the first American Mars colony possible Later he turned to asteroid mining captaining a small ship and crew of about a half dozen on repeated trips to the asteroid belt bringing back minerals or even small asteroids so that the Mars colony could harvest them for the needed resources Having just returned from one such four year mission he and his pilot Harry Nickerson are heading back to Mars when as they fly over the vast slopes of the giant volcano Olympus Mons Maxwell spots this strange glint below a glint that is not natural and should not be there When they land they discover something entirely unexpected and impossible the body of man who had disappeared on a distant asteroid almost a half century before Sanford Addiono had been on one of the first manned missions to the asteroid belt when he and a partner had vanished Nothing was ever heard from them again Even more baffling two later missions to the asteroid from which they had been lost found that it was gone as well no longer in orbit where it was supposed to be Now 46 years later Maxwell finds Addiono s body on the surface of Mars How Addiono had gotten to Mars from a distant now lost asteroid orbiting beyond Mars without a spaceship was a riddle that almost defied an answer That riddle was magnified exponentially by what Addiono had brought back with him Among his effects was a six fingered robot hand that had clearly been made by some alien civilization along with a recorder and memo book describing what Addiono had seen Here was a mystery that would rock humanity the first alien contact And at that moment Saunders Maxwell decides that he is going to be the person to solve that mystery even if it takes him through hell and back Unfortunately that is exactly where that journey takes him Not that it matters Saunders Maxwell is a typical human and for humanity the journey itself is really all that matters So now I stand on earthside shore And wonder what I am I must go out and find my home The journey s what I am Chorus O Pioneer O Pioneer Where do you go from here O Pioneer O Pioneer The stars are far too near A folksong of Mars and the Moon
