Manifesto of Evolutionary Humanism Michael Schmidt-Salomon, 2014-09-10 We are living in a time of asynchrony While technologically we are firmly in the 21st century our world views are still characterized by ancient legends which are thousands of years old This combination of high level technical ability and highly naive child like beliefs could have disastrous consequences in the long run We are behaving like five year olds who have been given responsibility for a jumbo jet One of the most depressing problems of our time lies in religious fundamentalists of all stripes casually making use of the fruits of the Enlightenment freedom of expression constitutionality science technology in order to prevent its principles being applied to the domain of their own belief For example to further their beliefs the 9 11 terrorists used airplanes constructed on the basis of scientific principles principles to which their beliefs could never stand up In return the fundamentalist with other means George W Bush led the world into a devastating crusade against terror and the axis of evil making use of a technology which could never have been developed if scientists had contented themselves with the American President's child like faith that the Bible's creation account is true In the face of the dangers arising from the renaissance of unenlightened thinking in a technologically highly developed era it is a matter of intellectual integrity to speak out clearly especially where religion is concerned Anyone who is capable of splitting the atom and communicating via satellites must possess intellectual and emotional maturity That certain people or groups of persons avoid exposure to criticism by establishing holy i e untouchable rules and uphold their fallacies as mandatory for all time may and can no longer be accepted practice in a modern society

Rist's account of Epicurus mediates between the extremes of approval and opposition traditionally accorded to him and he emerges as an ideologist a pragmatic philosopher whose most notable achievement was to reject the prevailing social ethos of Hellenism and assert the rights of the individual against those of the community or state *Historico-genetic Theory of Culture* Günter Dux, 2014-03-15 The book focuses on the modern understanding of human life forms as constructs that followed an evolutionary history The author thus finds science confronted with two questions firstly how the transgression of the virtual threshold between natural and cultural history was possible secondly how the socio cultural constructs were able to develop in the course of history the way they did The discussion concentrates on the problem of determining a processual logic in the development of societal structures as well as in the development of cognition The focus of attention is the historico genetic reconstruction of cognition The book was originally published in German as *Historisch genetische Theorie der Kultur* Weilerswist 2000 Velbrück *Meinongian Issues in Contemporary Italian Philosophy* Alfred Schramm, 2013-04-30 No detailed description available for Meinongian Issues in Contemporary Italian Philosophy
