The New Psychology of Leadership

S. Alexander Haslam,Stephen D. Reicher,Michael J. Platow,2010-09-13 Winner of the University of San Diego Outstanding Leadership Book Award 2012 Shortlisted for the British Psychological Society Book Award 2011 Shortlisted for the CMI Chartered Management Institute Management Book of the Year Award 2011 2012 According to John Adair the most important word in the leader s vocabulary is we and the least important word is I But if this is true it raises one important question why do psychological analyses of leadership always focus on the leader as an individual as the great I One answer is that theorists and practitioners have never properly understood the psychology of we ness This book fills this gap by presenting a new psychology of leadership that is the result of two decades of research inspired by social identity and self categorization theories The book argues that to succeed leaders need to create champion and embed a group identity in order to cultivate an understanding of us of which they themselves are representative It also shows how by doing this they can make a material difference to the groups

organizations and societies that they lead Written in an accessible and engaging style the book examines a range of central theoretical and practical issues including the nature of group identity the basis of authority and legitimacy the dynamics of justice and fairness the determinants of followership and charisma and the practice and politics of leadership The book will appeal to academics practitioners and students in social and organizational psychology sociology political science and anyone interested in leadership influence and power

Psychology as the Science of Human Being Jaan Valsiner, Giuseppina Marsico, Nandita Chaudhary, Tatsuya Sato, Virginia Dazzani, 2015-09-09 This book brings together a group of scholars from around the world who view psychology as the science of human ways of being Being refers to the process of existing through construction of the human world here rather than to an ontological state This collection includes work that has the goal to establish the newly developed area of cultural psychology as the science of specifically human ways of existence It comes as a next step after the behaviorist turn that has dominated psychology over most of the 20th century and like its successor in the form of cognitivism kept psychology away from addressing issues of specifically human ways of relating with their worlds Such linking takes place through intentional human actions through the creation of complex tools for living entertainment and work Human beings construct tools to make other tools Human beings invent religious systems notions of economic rationality and legal systems they enter into aesthetic enjoyment of various aspects of life in art music and literature they have the capability of inventing national identities that can be summoned to legitimate one's killing of one's neighbors or being killed oneself The contributions to this volume focus on the central goal of demonstrating that psychology as a science needs to start from the phenomena of higher psychological functions and then look at how their lower counterparts are reorganized from above That kind of investigation is inevitably interdisciplinary it links psychology with anthropology philosophy sociology history and developmental biology Various contributions to this volume are based on the work of Lev Vygotsky George Herbert Mead Henri Bergson and on traditions of *Ganzheitspsychologie* and Gestalt psychology *Psychology as the Science of Human Being* is a valuable resource to psychologists sociologists philosophers biologists and anthropologists alike

Deconstructing Social Psychology Ian Parker, John Shotter, 2015-06-19 Since the early 1970s social psychology has been in crisis At the time *Reconstructing Social Psychology* Armistead provided a critical review of theories and assumptions in the discipline Originally published in 1990 this title not only updates that review but illustrates the ways in which assumptions had changed at the time The crisis is no longer seen as one which can be resolved within social psychology itself but rather as one more deeply rooted in modern society The contributors look at the issues raised by deconstruction in the other human sciences as well as investigating the claims made by social psychology as a discipline They examine the rhetoric and texts of social psychology analysing how the texts which hold the discipline together obtain their power The arguments include the political implications of deconstructive ideas focusing on particular issues such as research therapy and feminism *Deconstructing Social Psychology* presents a strong selection of new critical writing in social

psychology It will still be a useful text for students of psychology social science and sociology and for those working in the area of language **The Psychology of Drawing** Fred Carleton Ayer,1916 **New Trends in Psychobiography**
