Quietest Singing:

The Quietest Singing Darrell H. Y. Lum, Joseph Stanton, Estelle Enoki, 2000-01-01 In this collection Hawai i Award for Literature recipients depict island life as complex multivoiced and multi layered **Silence, Music, Silent Music** Nicky Losseff, 2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage s idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy

Humans are remarkably adept at identifying individuals on the basis of their facial features or other traits such as gait or vocal timbre Besides voice another auditory medium capable of carrying identity information is music Indeed certain famous musicians such as John Coltrane or Sonny Rollins need only to play a few notes to be unequivocally recognized Along with emotion and structural cues artistic individuality seems to be a key element communicated in music performance Yet the means by which individuality is expressed in performance as well as the cognitive processes employed by listeners to perceive identity cues remain poorly elucidated Other pertinent issues including the connection between a performer's technical competence and ability to convey a specific musical identity as well as potential links between individuality and career defining outcomes such as critical recognition and aesthetic appraisal warrant further exploration Quantitative approaches to the study of music performance have benefited greatly from MIDI technology and the application of computational methods leading to the flourishing of empirical music performance research over the last few decades More recently neuroimaging techniques have provided valuable insights into the neural mechanisms involved in the cognitive processes of performing music Nevertheless this field continues to benefit greatly from qualitative approaches given that the communication of affect and identity cues in music performance leads to a rich subjectivity of impressions that must be accounted for in order to lead to a greater understanding of this multifaceted phenomenon The aim of this Research Topic is to provide a forum for interdisciplinary research broadly related to the expression and perception of individuality in music performance Research methodology includes behavioral psychophysiological and neuroimaging techniques Both quantitative

and qualitative approaches are presented The scope of this Research Topic includes laboratory studies as well as studies in real life performance settings and longitudinal studies on performers Eastern School Music Herald ,1917 *The Columbia Guide to Asian American Literature Since 1945* Guiyou Huang,2006-08-08 The Columbia Guide to Asian American Literature Since 1945 **Quiet in the Land** Anne Chislett,1996-11 Jacob Yock Bauman a young member of an Amish community near Kitchener Ontario chafes at the strict and he believes outmoded beliefs of his elders particularly those of his father Christy World War I is raging in Europe and most of Canada s young men have gone off to fight with the British forces but the Amish because of their pacifist convictions have refused to join the war effort By deciding to enlist Yock alienates himself not only from family and community but also from the lovely Katie Brubacher with whom he has fallen in love When Yock returns from the war Katie has wed someone else and ironically the very acts of bravery which have made him a hero to the rest of Canada have made Yock a bloody handed villain to his own people Although the compassionate Katie offers to leave her husband and go off with him Yock accepts his status as an outcast and departs alone but not before admitting that while standing over the body of a slain German soldier the meaning of pacifism was at last powerfully revealed to him In the end Yock s stern father now a bishop is vindicated but at the loss of the one he sought to save his beloved and only son Playdatabase com **Silent Singing** Suzanne Keener,1945 **Revival: Music and Its Lovers (1932)** Vernon Lee,2018-04-20 An empirical study of imaginative responses to music **Sing the Harmony of Moons** Mukesh Kumar,2025-10-24 In Sing the Harmony of Moons Strengthen Your Connections and Build Bonds That Truly Last acclaimed author Mukesh Kumar delves into the profound art of human connection offering a transformative guide to fostering meaningful relationships in every facet of life Drawing on timeless wisdom modern psychology and personal insights Kumar illuminates the intricate dance of emotional intellectual and spiritual bonds that define our existence This book is not just about understanding connection but mastering it whether with family friends colleagues or oneself Through practical exercises heartfelt anecdotes and actionable strategies readers will learn to navigate the complexities of communication empathy and trust uncovering the secrets to building relationships that endure the test of time Kumar emphasizes the importance of vulnerability authenticity and presence encouraging readers to embrace their true selves as the foundation for genuine connection Sing the Harmony of Moons is a call to align with the rhythms of the universe recognizing that every relationship is a reflection of our inner world Perfect for anyone seeking deeper more fulfilling connections this book is a roadmap to creating harmony in a disconnected world reminding us that the bonds we nurture are the essence of a life well lived **Musical Pathways in Recovery** Gary Ansdell,Tia DeNora,2016-09-17 Music triggered a healing process from within me I started singing for the joy of singing myself and it helped me carry my recovery beyond the state I was in before I fell ill nine years ago to a level of well being that I haven t had perhaps for thirty years This book explores the experiences of people who took part in a vibrant musical community for people experiencing mental health difficulties SMART St Mary

Drawing Music, Marking Time David Griffin, 2025-01-23 Marking down the complexities of musical pieces on paper allows them to become portable shareable and eminently teachable but how are the simple geometries of a music notation unfolded into space and time A music notation is an almost impossibly complicated bit of drawing Calling it a map or a diagram does not quite do the trick Its tracery supplies mechanisms for planning composition analysis annotation and performance of music But how is it that we read that simple strategic two dimensional geometry and make such complex four dimensional performances In this book David Griffin guides readers to a comprehensive understanding of the structural properties of music notations with a particular focus on the standard Western staff notation system looking at composers such as Bach John Cage Earle Brown and Stockhausen Developed over a thousand years ago the staff notation is a geometrical drawing method using dots and lines on a horizontal timeline for explaining the structure of a musical piece The system behaves a bit like a picture but it is also like a diagram and a bit like writing in its structure In the hands of an experienced user the notation s complex of marks and phatic elements allows us to leave behind the mere denotation of diagrams or pictures to become a connotative drawing system This book will attempt to de code music drawings untangling their strange knots of graphic and linguistic elements Using a series of visual examples Griffin presents background information on how the staff notation developed as an inter linguistic inscription a drawing that slips through the mere denotation of pictorial or diagrammatic graphics to become a connotative system with which we may craft subtle and

powerful elements of musical poetry Planning for Learning through Opposites Judith Harries, 2013-02-28 Plan for six weeks of learning covering all six areas of learning and development of the EYFS through the topic of opposites The Planning for Learning series is a series of topic books written around the Early Years Foundation Stage designed to make planning easy This book takes you through six weeks of activities on the theme of opposites Each activity is linked to a specific Early Learning Goal and the book contains a skills overview so that practitioners can keep track of which areas of learning and development they are promoting This book also includes a photocopiable page to give to parents with ideas for them to get involved with their children's topic as well as ideas for bringing the six weeks of learning together The weekly themes in this book include words and concepts happy sad big small old new hot cold loud quiet up down It all ends with a pyjama party with children enjoying night time things during the day **The Renaissance Ethics of Music** Hyun-Ah Kim, 2015-10-06 In early modern Europe music particularly singing was the arena where body and soul came together embodied in the notion of *musica humana* Kim uses this concept to examine the framework within which music and song were used to promote moral education and addresses Renaissance ideas of religion education and music Teaching Approaches in Music Theory Michael R.
