American Law Derrick Bell, 1980 **Race, Racism, and Science** John P. Jackson, Nadine M. Weidman, 2006 Since the eighteenth century when natural historians created the idea of distinct racial categories scientific findings on race have been a double edged sword For some antiracists science holds the promise of one day providing indisputable evidence to help eradicate racism On the other hand science has been enlisted to promote racist beliefs ranging from a justification of slavery in the eighteenth century to the infamous twentieth century book *The Bell Curve* whose authors argued that racial differences in intelligence resulted in lower test scores for African Americans This well organized readable textbook takes the reader through a chronological account of how and why racial categories were created and how the study of race evolved in multiple academic disciplines including genetics psychology sociology and anthropology In a bibliographic essay at the conclusion of each of the book's seven sections the authors recommend primary texts that will further the reader's understanding of each topic Heavily illustrated and enlivened with sidebar biographies this text is ideal for classroom use

Race and Racism Ruth Benedict, 1942 *Race, Racism, and Reparations* J. Angelo Corlett, 2018-08-06 If affirmative action and other ethnicity based social programs are justified then J Angelo Corlett believes it is important to come to an adequate understanding of the nature of ethnicity in general and ethnic group membership in particular In *Race Racism and Reparations* Corlett reconceptualizes traditional ideas of race in terms of ethnicity As he makes clear the answers to the questions What is a Native American or What is a Latino have important implications for public policy especially for those programs designed to address historic injustices and economic and social imbalances among different groups in our society Having supplanted race with a well defined concept of ethnicity the author then analyzes the nature and function of racism Corlett argues for a notion of racism that must encompass not only racist beliefs but also racist actions omissions and attempted actions His aim is to craft a definition of racism that will prove useful in legal and public policy contexts Corlett places special emphasis on the broad questions of whether reparations for ethnic groups are desirable and what forms those reparations should take land money social programs He addresses the need for differential affirmative action programs and reparations policies the experiences and oppressors of different ethnic groups vary greatly Arguments for reparations to Native and African Americans are considered in light of a variety of objections that are or might be raised against them

Corlett articulates and critically analyzes a number of possible proposals for reparations Race and Racism in Theory and Practice Berel Lang, 2000 This collection of original essays by scholars from a diverse range of fields examines issues of race in a variety of historical and geographical settings ranging from classical Greece to the contemporary Americas Europe and Asia The authors provide an important perspective on race both in its theoretical origins and in its actual appearances while paying close attention to the ways in which the study of race itself has been carried on or ignored by various disciplines

The Problem of Race in the 21st Century Thomas C. Holt, 2009-06-30 An analysis of how the conditions of race and racism in our culture have changed in our time and what this means for our future The problem of the twentieth century is the problem of the color line W E B Du Bois wrote in 1903 and his words have proven sadly prophetic As we enter the twenty first century the problem remains and yet it and the line that defines it have shifted in subtle but significant ways This brief book speaks powerfully to the question of how the circumstances of race and racism have changed in our time and how these changes will affect our future Foremost among the book s concerns are the contradictions and incoherence of a system that idealizes black celebrities in politics popular culture and sports even as it diminishes the average African American citizen The world of the assembly line boxer Jack Johnson s career and *The Birth of a Nation* come under Thomas Holt s scrutiny as he relates the malign progress of race and racism to the loss of industrial jobs and the rise of our modern consumer society Understanding race as ideology he describes the processes of consumerism and commodification that have transformed but not necessarily improved the place of black citizens in our society As disturbing as it is enlightening this timely work reveals the radical nature of change as it relates to race and its cultural phenomena It offers conceptual tools and a new way to think and talk about racism as social reality Praise for *The Problem of Race in the Twenty first Century* Debates about race often take the form of a mind game designed to establish whether or not a particular word or act is racially motivated This book provides a compelling argument for rethinking our ideas about race Frank Furedi *New Statesman* Holt rightly asserts that our racial legacy should be a point of departure not a destination in examining the enduring nature of racial enmity As a nation and as individuals we must imagine ourselves beyond while remaining aware of those forces that are at the root of the enmity Vernon Ford *Booklist* Readers will benefit from Holt s expert and careful examination of these narratives of contradiction and incoherence as he attempts to forecast the reigning racial ethos for the next millennium Holt writes in clear precise prose and makes an important contribution to both public

The Edge of Race Kalervo N. Gulson, Zeus Leonardo, David Gillborn, 2017-10-02 The phrase the edge of race can be used both as a description and as a response to two key concerns The first of these is that while race is increasingly on the periphery of education policy with a growing disregard shown for racist inequities as education systems become dominated by market driven concerns it is important that we map the shifting relations of race in neoliberal politics and policies The second concern is that at this time within and outside the spaces of the academy even to mention race equity is to risk condemnation marginalization and ridicule The authors in this collection use the edge of race as a provocation in order to examine the concepts methodologies policies politics processes and practices associated with race and racism in education The chapters offer empirical examples of the perpetuation and perniciousness of racism that point to the continued salience of research about race Additionally the chapters make contributions to conceptual and methodological understandings of race and racism The contributors illustrate the contingency productivity and fragility of race as a concept and point to how educational research continues to be a contested site in and from which to study race and education This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education*

Racial Power Elias Jefferson, 2020-10-24 The concept of race as a rough division of anatomically modern humans *Homo sapiens* has a long and complicated history The word race itself is modern and was used in the sense of nation ethnic group during the 16th to 19th centuries and acquired its modern meaning in the field of physical anthropology only from the mid 19th century Several social and political developments that occurred at the end of the 19th century and into the 20th century led to the transformation in the discourse of race Political theorists have collectively failed to arrive at a coherent and consistent definition of the term race Terms such as negro white African Asian black are often provided without an accompanying explanation or justification for their usage Typical histories of racism tend to betray a general incapacity to visualize or bring to life the non racist or pre racist character of societies in the Old World Moreover political psychologists that do address racism tend to contextualize this phenomenon using passively constructed language that presents scenarios of an unfortunate racist political behavior motivated by antipathy In response this book advances the following claims a before the advent of modern racism around the globe and in the geographic spaces of western Eurasia the range of morphological characteristics was heterogeneous and reflected the cyclical explorations invasions and colonization from peoples who were home to what is now known as Africa the Near East and Asia into those spaces b the term race has undergone specific and radically transformative phases in which its meanings have been re constituted from mere kinship to meta ancestry morphology anthropology and bio genetics c the contemporary meaning of race is best conceptualized as a mosaic of constructed micro differences e g social relations cognitive linguistic framework appearance ancestry and self identification reified as the markers of intrinsic racial distinction which the subject measures according to a weighted scale that she uses to ultimately assign self group and other membership in one or more racial group s d racial power entails a nexus of power knowledge whereby authority is enabled to exercise political power to confer greater enabled agency to the social agent by discourses developed by credentialed experts working within a field of authoritative knowledge that objectifies that social agent as occupying a subject position that is imbued with empowerment
