Race Matters, Animal Matters Lindgren Johnson, 2017-11-08 *Race Matters Animal Matters* challenges one of the grand narratives of African American studies that African Americans rejected racist associations of blackness and animality through a disassociation from animality Analyzing canonical texts written by Frederick Douglass Charles Chesnutt Ida B Wells and James Weldon Johnson alongside slaughterhouse lithographs hunting photography and sheep husbandry manuals Lindgren Johnson argues instead for a critical African American tradition that at pivotal moments reconsiders and recuperates discourses of animality weaponized against both African Americans and animals Johnson articulates a theory of fugitive humanism in which these texts flee both white and human exceptionalism even as they move within and seek out a revised humanist space The focus for example is not on how African Americans shake off animal associations in demanding recognition of their humanity but on how they hold fast to animality and animals in making such a move revising the human itself as they go and undermining the binaries that helped to produce racial and animal injustices Fugitive humanism reveals how an interspecies ethics develops in these African American responses to violent dehumanization Illuminating those moments in which the African American canon exceeds human exceptionalism *Race Matters Animal Matters* ultimately shows how these black engagements with animals and animality are not subsequent to efforts for racial justice a mere extension of the abolitionist or antilynching movements but to the contrary are integral to those efforts This black authored temporality challenges widely accepted humanist approaches to the relationship between racial and animal justice as it anticipates and even critiques the valuable insights that animal studies and posthumanism have to offer in our current moment

White Writers, Race Matters Gregory S. Jay, 2018 Jay shows that this tradition of white authored protest fiction about racism in America remains vital because every generation must relearn the lessons of antiracism and formulate effective cultural narratives for transmitting intellectual and affective tools useful in fighting injustice

Should Race Matter? David Boonin, 2011-11-14 In this book philosopher David Boonin attempts to answer the moral questions raised by five important and widely contested racial practices slave reparations affirmative action hate speech restrictions hate crime laws and racial profiling Arguing from premises that virtually everyone on both sides of the debates over these issues already accepts Boonin arrives at an unusual and unorthodox set of conclusions one that is neither liberal nor conservative color conscious nor color blind Defended with the rigor that has characterized his previous work but written in a more widely accessible style this provocative and important new book is sure to spark controversy and should be of interest to philosophers legal theorists and anyone interested in trying to resolve the debate over these important and divisive issues

Black Men from behind the

Veil George Yancy, 2022-01-14 The Black male scholars within this important book are painfully aware that the brutal murder of George Floyd was not due to a few bad apples They understand that they are perceived as threats and criminals within a distorted white imaginary that is embedded with processes of mythopoetic construction racial capitalism and a deep anti Black male social ontology Edited by prominent philosopher George Yancy *Black Men from behind the Veil* Ontological Interrogations emphasizes the importance of Black male epistemic agency and the courage to speak the truth regarding an America that values Black male life on the cheap and that attempts to control the movement of Black men their capacity to breathe and their being through anti Black technologies of surveillance confinement policing and white nation building There is no single monolithic Black male voice that dominates this crucial and necessary text Each voice speaks of pain behind the Veil revealing narrative specificity and an important recursive truth Black men within the white American psyche are both necessary and yet disposable The existential and sociohistorical weight of this truth is made painfully clear through the voices of these Black men

Why Race Matters in South Africa Michael MacDonald, 2006 This book tells the story of how the transition to democracy in South Africa enfranchised blacks politically but without raising most of them from poverty Although democratic South Africa is officially non racial the book shows that racial solidarities continue to play a role in the country's political economy

Race on the Brain Jonathan Kahn, 2017-11-07 Of the many obstacles to racial justice in America none has received more recent attention than the one that lurks in our subconscious As social movements and policing scandals have shown how far from being postracial we are the concept of implicit bias has taken center stage in the national conversation about race Millions of Americans have taken online tests purporting to show the deep invisible roots of their own prejudice A recent Oxford study that claims to have found a drug that reduces implicit bias is only the starkest example of a pervasive trend But what do we risk when we seek the simplicity of a technological diagnosis and solution for racism What do we miss when we locate racism in our biology and our brains rather than in our history and our social practices In *Race on the Brain* Jonathan Kahn argues that implicit bias has grown into a master narrative of race relations one with profound if unintended negative consequences for law science and society He emphasizes its limitations arguing that while useful as a tool to understand particular types of behavior it is only one among several tools available to policy makers An uncritical embrace of implicit bias to the exclusion of power relations and structural racism undermines wider civic responsibility for addressing the problem by turning it over to experts Technological interventions including many tests for implicit bias are premised on a color blind ideal and run the risk of erasing history denying present reality and obscuring accountability Kahn recognizes the significance of implicit social cognition but cautions against seeing it as a panacea for addressing America's longstanding racial problems A bracing corrective to what has become a common sense understanding of the power of prejudice *Race on the Brain* challenges us all to engage more thoughtfully and more democratically in the difficult task of promoting racial justice

Race in American Sports James L. Conyers, Jr., 2014-06-10 These essays critically

examine the issue of race in college and professional sports beginning with the effects of stereotypes on black female college athletes and the self handicapping of black male college athletes Also discussed is the movement of colleges between NCAA designated conferences and the economic impact and effects on academics for blacks An essay on baseball focuses on changes in Brooklyn during the Jackie Robinson years and another essay on how the Leland Giants became a symbol of racial pride Other essayists discuss the use of American Indian mascots the Jeremy Lin spectacle surrounding Asians in pro sports the need to hire more NFL coaches of color and ideals of black male masculinity in boxing Instructors considering this book for use in a course may request an examination copy here

Prophetic Leadership and Visionary Hope Barbara Will, 2023-05-09 Thirty years have passed since Cornel West's book *Race Matters* rose to the top of the bestseller lists in 1993 Yet his book remains as relevant as ever to American culture even more so if one considers its influence on contemporary racial justice movements such as Black Lives Matter prison justice and the fight for police reform *Prophetic Leadership and Visionary Hope* an edited volume of essays by leading scholars in Black studies religious studies and social justice history looks back to the original 1993 text and forward into the future of racial understanding and healing in our current century responding to Dr West's own repeated insistence that we can only understand our present and future by looking back By reengaging with West's book at this seminal moment *Prophetic Leadership and Visionary Hope* offers new points of entry into the thorny issues that the 1993 text addressed the challenge of leadership in a culture marked by the legacy of white supremacy the limited value of liberal affirmative action programs in promoting the affirmation of Black humanity the dangerous seductions of African American conservatism and the question of Black self regard what West called black nihilism the necessity and difficulty of cross race solidarity and cross religious affinity the need to channel legitimate Black rage over untenable conditions of existence into productive opportunities and viewpoints All of these issues are even more marked in American society today The voices collected in this volume are the legitimate intellectual heirs of the original *Race Matters* With essays that span the topics of history politics philosophy religion cultural studies music and aesthetics *Prophetic Leadership and Visionary Hope* is as wide ranging as the thinker whose ideas it engages interrogates and celebrates Contributors Nkosi Du Bois Anderson Paul A Bov Matthew M Briones Farah Jasmine Griffin Susannah Heschel Lucius T Outlaw Jr Andrew Prevot Brandon M Terry Cornel West Barbara Will
