Race Between Population And Food Supply In Latin America:

The Race Between Population and Food Supply in Latin America Thomas Lynn Smith, 1976 *Sociology in Latin America* Man Singh Das, 1994 The book *Sociology in Latin America* deals with three areas rural sociology demography and the study of Latin American Societies The purpose of this book is to introduce the reader to the study of population rural and urban societies and gerontology in various less developed and developing countries of Latin America This book is a valuable source indicatin the influence of history cultural conflict and the dynamics of modernization and industrialization on various social institution **Scarcity and Survival in Central America** William H. Durham, 1979-06-01 Looking at both population and land tenure dynamics in their historical context this study challenges the view that the 1969 conflict between El Salvador and Honduras was primarily a response to population pressure The author demonstrates that land scarcity a principal cause of the war was largely a product of the concentration of landholdings The analysis focuses on the emigration of 300 000 Salvadoreans to Honduras in the years before the war inquiring into the reasons for the emigration its impact on local agricultural economies and its relation to the conflict Answers to these questions are based on a new interpretation of national statistics and on original survey research in peasant communities The author has used an interdisciplinary approach drawing on the perspectives of anthropology ecology history demography and geography In addition to its value as a case study in human ecology this book gives a clear account of the nature and origins of ecological pressures in rural Central America The book is illustrated with 21 photographs and 7 maps **Gender, Sexuality, and the Cold War** Philip E. Muehlenbeck, 2021-04-30 As Marko Duman i writes in his introduction to *Gender Sexuality and the Cold War* despite the centrality of gender and sexuality in human relations their scholarly study has played a secondary role in the history of the Cold War It is not an exaggeration to say that few were left unaffected by Cold War gender politics even those who were in charge of producing disseminating and enforcing cultural norms were called on to live by the gender and sexuality models into which they breathed life This underscores the importance of this volume as here scholars tackle issues ranging from depictions of masculinity during the all consuming space race to the vibrant activism of Indian peasant women during this period to the policing of sexuality inside the militaries of the world *Gender Sexuality and the Cold War* brings together a diverse group of scholars whose combined research spans fifteen countries across five continents claiming a place as the first volume to examine how issues of gender and sexuality impacted both the domestic and foreign policies of states far beyond the borders of the United States during the tumult of the Cold War Table of Contents Preface Introduction Hidden in Plain Sight The Histories of Gender and Sexuality during the Cold War Marko Duman i Part I Sexuality Faceless and Stateless French Occupation Policy toward Women and Children in Postwar Germany 1945 1949 Katherine Rossy Patriarchy and Segregation Policing Sexuality in US Icelandic Military Relations Valur Ingimundarson Queering Subversives in Cold War Canada Patrizia Gentile Nonreligious Activities Sex Anticommunism and Progressive Christianity in Late Cold War Brazil

Hall,Patrick Van Laake,Carlos Leon Perez,Gregoire Leclerc,2000-07-12 Until recently the phenomenal economic development of the Asian tigers Chile and Malaysia as well as the sustained economic growth of the United States painted a very desirable and optimistic picture of free markets fiscal responsibility and more generally the entire dogma of neoclassical economics As of the fall of 1998 however the economies of many tropical countries have contracted severely and the enthusiasm of the developing tropics for the free market and all of its ancillary policies is decidedly cooler Have our traditional approaches to economics been failing the developing world This interdisciplinary book covers the conditions of the developing tropics the resistance of some of their problems to earlier attempts at solutions and the use of new tools to develop a much more comprehensive and empirical framework for analysis and decision making It also presents the development of cutting edge technology that links GIS and modeling approaches with extensive databases on meteorology soils agricultural production and land use The book discusses whether development is sustainable through a synthesis of demographic economic and resource specific considerations Costa Rica is uniquely suited to this study because of its size stage of development democratic institutions and national databases A CD ROM containing all data and programs color images animated models large data tables and references accompanies the book Links economic and biophysical analyses of sustainability Presents new tools and approaches for analysis and decision making Includes a CD ROM containing data and programs color images animated models and references [Agriculture and the Environment](#) C.A. Edwards,M.K. Wali,D.J. Horn,F. Miller,2012-12-02 Until the 1980s global increases in food production exceeded the concomitant growth of human populations However progressively agriculture is becoming unable to meet the world wide per capita needs for food Unless there is major international cooperation in addressing the problems associated with population control it is predicted

that the global human population will reach more than 14 billion by the year 2050 with provision of adequate food fuel and space for such an increased population unachievable These problems are accentuated by factors such as world wide reductions in soil fertility the accelerating degradation of land that is suitable for food production through soil erosion the world wide trend for migration of human populations from rural habitats to cities and extremely rapid rates of global deforestation Possible solutions to global sustainability in agriculture and natural resources must involve an integration of ecological sociological cultural and economic considerations as well as mandated international and national policies This publication outlines these problems and attempts to seek solutions
