Services And Space Key Aspects Of Urban And Regional Development:

Services and Space J. N. Marshall, Peter Anthony Wood, 1995 Services and Economic Development in the Asia-Pacific P.W. Daniels, J.W. Harrington, 2016-04-01 Until the 1990s industrialization was the dominant development paradigm for the Asia Pacific region. Since then, advanced services, finance, business, or producer services, information, and creative services have become deeply embedded in the processes of economic growth and change in the region. This rapid tertiary expansion is fundamentally restructuring national and regional economies and urban form in line with the introduction of advanced production systems, national modernization programmes, and the globalization strategies of governments. Services are being actively deployed as instruments of metropolitan reconfiguration and land use change. This book explores various aspects of the relationship between service industries and economic development in Japan, South Korea, China, Taiwan, Singapore, India, Australia, and New Zealand. It provides new sector-oriented and regional and national perspectives on services and development.

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue. For localities and regions, the challenge of enhancing prosperity, improving wellbeing, and increasing living standards has become acute. For localities and regions formerly considered discrete parts of the developed and developing worlds, amid concern over the definitions and sustainability of development, a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories. Local and Regional Development engages and addresses the key questions: what are the principles and values that shape definitions and strategies of local and regional development? What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development? What are the main policy interventions and instruments? How do localities and regions attempt to effect development in practice? What kinds of local and regional development should we be pursuing? This book addresses the fundamental issues of what kind of local and regional development and for whom, frameworks of understanding and instruments, and policies. It outlines what a holistic, progressive, and sustainable local and regional development might constitute before reflecting on its limits and political renewal. With the growing international importance of local and regional development, this book is an essential student purchase, illustrated throughout with maps, figures, and case studies from Asia, Europe, and Central and North America.

Understanding Contemporary Ireland Brendan Bartley, Rob Kitchin, 2006-12-20 This is an account of Ireland in the twenty-first century and the remarkable economic and social transformations that have occurred since the late 1980s. The Celtic Tiger phenomenon made Ireland the focus of much attention in recent years. Other countries have openly declared that they want to follow the Irish economic and social model. Yet there is no book that gives a comprehensive, spatially informed analysis of the Irish experience. This book fills that gap. Divided into four parts: planning and development, the economy, the political landscape, and population and social issues, the book explains a particular aspect of Ireland and

Irish life The authors reveal how the transformations that have occurred are uneven and unequal in their effects across the country and highlight the challenges now facing Irish society and policy makers *Urban Growth and Innovation* Frank G. van Oort, 2017-11-22 Knowledge externalities i.e. intellectual gains made by exchange of information for which no direct compensation is given to the producer of the knowledge result in higher economic growth rates across urban areas as well as higher degrees of innovation intensity in those locations where economic activity is dense By combining theories and methodologies on localised growth and innovation density from the fields of geography and economics he puts forward an innovative spatial econometric model which contributes to a clearer understanding of actual processes of growth and innovation and their linkages to industry and spatially determined agglomeration factors In doing so the book acknowledges the increasing importance of geographical composition and distance for the transmission of knowledge and skills in a society in which information becomes easier to access **Consumer Services and Economic Development** Colin C.

Williams, 1997-04-17 Consumer Services have been viewed as parasitic activities dependent on other sectors of the economy for their viability and vitality Yet local economic policy is now looking towards consumer services to solve severe economic problems The rapid expansion of the service sector is now a principal feature of contemporary global economic restructuring

Producer Services in China Anthony Yeh, Fiona Yang, 2013-02-11 In the past three decades China has experienced an unprecedented pace of economic and urban development Its economy is now transforming from one based on manufacturing industries towards the producer services with the importance of these services in the national and regional economy being recognized by economists and policy makers alike With growing demand and policy support producer services are expected to expand rapidly leading to a new wave of economic and urban development in China This groundbreaking volume is one of the first to address questions related to the development of these services in China The contributions explore a wide range of associated topics including the characteristics of the growth of producer services and how this is related to China's economic and urban transition the distribution of these services amongst Chinese cities as well as drawing comparison between producer service development in China and Western counterparts This volume also discusses the dynamics of the development of these services in China and how the political economic embeddedness of China has shaped the development of producer services Finally the consequences of this growth and how the economy and urban space have changed in response is explored as well as the challenges Chinese cities face in moving towards a service economy and how this can inform future public policies This volume addresses the pressing need to understand the economic and urban changes in post industrial China to allow appropriate strategies and policies to be formulated to facilitate future development in China The text is rich with statistical data and diagrams providing original contributions and a cutting edge overview This timely publication will be of interest to upper level undergraduates postgraduates and researchers interested in China Urban Studies and Economic Development Economic Geography Sharmistha Bagchi-Sen, Helen Lawton-Smith, 2006-09-27 The impact of economic

geography both within and beyond the wider field of geography has been constrained in the past by its own limitations Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future direction In doing so the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy Offering a discussion of theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial inter dependencies contributors also demonstrate the need to engage with multiple audiences and within this context they proceed to examine how geographers have interfaced with businesses and policy This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy With excellent breadth of coverage it provides an outstanding introduction to research topics and approaches
