Services Trade In The Western Hemisphere Liberalization Integration And Reform:

Services Trade in the Western Hemisphere Sherry M. Stephenson, 2010-12-01 A Brookings Institution Press and the Organization of American States publication The services sector including financial services telecommunications transportation tourism and professional services has become critical to the continued economic dynamism in the Americas And the quality and competitiveness of this sector are essential to economic growth and development On average services increasingly traded in more numerous and far reaching ways than goods account for nearly two thirds of the gross domestic product of the Western Hemisphere The importance of the sector however is disproportionately large in Central America and the Caribbean where it often is the major source of employment and of foreign exchange This timely volume is the first to review and analyze trade agreements covering the services sector in the Western Hemisphere and their relationship to the General Agreement on Trade in Services GATS in force since 1995 as an integral part of the World Trade Organization WTO Negotiations on liberalizing services trade are continuing at the multilateral the regional or hemispheric and the subregional levels It is imperative to understand what is being discussed and implemented at these different levels and to articulate the linkages and relationships among the various agreements and the disciplines and obligations they contain Services Trade in the Western Hemisphere informs the reader about these issues and more Part 1 deals with the main issues relevant to the liberalization of services trade at the multilateral and regional levels including improvements to the GATS architecture the scope of regulatory reform the relationship between the treatment of services and investment WTO requirements that must be fulfilled by parties to an economic integration agreement and disagreements brought to the multilateral dispute settlement process Part 2 examines the scope content and liberalizing approach of subregional agreements in the Western Hemisphere such as the North American Free Trade Agreement and those p Services Trade in the Western Hemisphere Sherry Stephenson, 2000 Deals with the main issues relevant to the liberalization of services trade at the multilateral and regional levels Examines the scope content and liberalizing approach of subregional agreements in the Western Hemisphere such as the North American Free Trade Agreement and those promulgated by the Andean Community Evaluates the extent of liberalization of services trade achieved to date at the multilateral and subregional levels Discusses options for improvements in the context of the ongoing Free Trade Area of the American negotiations *A Handbook of International Trade in Services* Aaditya Mattoo, Robert M. Transport Services Benjamin Parameswaran, 2012-12-06 Despite multiple efforts on the bilateral regional and multilateral level to create uniform or at least harmonized rules for commercial operations and practices in the maritime transport sector and to liberalize maritime transport services by tearing down the barriers that exist in that sector there is until today no global regime regulating or rather deregulating the supply of maritime transport services and ensuring open markets In this situation private economic actors are confronted with substantial legal uncertainty This book provides a detailed analysis of the history of maritime transport services in the Uruguay and post Uruguay Round negotiations and the role of the sector in the ongoing Doha Round talks where Member States have the opportunity to work towards a global regime ensuring the progressive liberalization of the sector The reader will be confronted with an extensive overview of the role of maritime transport services in the WTO GATS framework a topic basically uncovered in the literature so far *Preferential Trade Agreement Policies for Development* Jean-Pierre Chauffour, Jean-Christophe Maur, 2011-06-22 The Handbook offers an introduction to the key elements of Preferential Trade Agreements PTAs addressing the practical economic and legal aspects of the regulatory policies in PTAs **The Oxford Handbook of International Trade Law** Daniel Bethlehem, Donald McRae, Rodney Neufeld, Isabelle Van Damme, 2009-01-08 Over the past 10 years the content and application of international trade law has grown dramatically The WTO created a binding dispute settlement process and in resolving disputes the judicial organs of the WTO have built up a substantial amount of new international trade law Emerging from this new WTO process is an international trade law system that is in some respects self contained and in other respects overlapping and linked to other international legal economic and political regimes The boundaries of trade law are now generating enormous interest and controversy which at a broader level is subsumed within the debate over globalisation The detailed development of the rules of international trade is being examined with increasing frequency by scholars government officials and trade law practitioners But how does it fit with existing systems How it is modified by them How does the international trade law system affect and modify other regimes This Handbook places international trade law within its broader context providing comment and critique on contemporary thinking on a range of questions both related specifically to the discipline of international trade law itself and to the outside face of international trade law and its intersection with States and other aspects of the international system It examines the economic and institutional context of the world trading system its substantive law including regional trade regimes and the settlement of disputes The final part of the book explores the wider framework of the world trading system considering issues including the relationship of the WTO to civil society the use of economic sanctions state responsibility and the regulation of multinational corporations Oxford Handbooks offer authoritative and up to date surveys of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social

Rugman, Gavin Boyd, 2004-01-01 This book examines the Free Trade Area of the Americas FTAA an ambitious venture in regional market integration which builds on the principles of the North American Free Trade Agreement It assesses the long term corporate and public policy measures to cope with the increased monetary fiscal and structural interdependence that will be required if the benefits of the FTAA are to be realized The contributors suggest that with enlightened US leadership and the cooperation of Brazil Mexico and Argentina the FTAA could eventually match the EU in the world economy and as a multilateral leader Initiatives to promote a culture of relational cooperation in a system of liberalized global commerce are stressed In Latin America there is an urgent need for such cooperation in order to enhance the region s lackluster growth rate and reduce the occurrences and severity of financial crises The United States Canada and Mexico will also benefit from the development of dynamic structural links with their regional neighbours The
