Secret Science María M. Portuondo, 2013-04-18 The discovery of the New World raised many questions for early modern scientists What did these lands contain Where did they lie in relation to Europe Who lived there and what were their inhabitants like Imperial expansion necessitated changes in the way scientific knowledge was gathered and Spanish cosmographers in particular were charged with turning their observations of the New World into a body of knowledge that could be used for governing the largest empire the world had ever known As Mar a M Portuondo here shows this cosmographic knowledge had considerable strategic defensive and monetary value that royal scientists were charged with safeguarding from foreign and internal enemies Cosmography was thus a secret science but despite the limited dissemination of this body of knowledge royal cosmographers applied alternative epistemologies and new methodologies that changed the discipline and in the process how Europeans understood the natural world Tables from American Practical Navigator Nathaniel Bowditch, 1962 **The American Practical Navigator** Nathaniel Bowditch, 1995 Useful Tables from the Practical Navigator Nathaniel Bowditch, 1927 **Key to the Questions for Exercise in the System of Practical Navigation and Astronomy** William TURNBULL (Author of "A Treatise on Cast-Iron Beams and Columns."), 1852

Hobbs, 2012-12-06 Throughout the history of warfare at sea navigation has been an important basic determinant of victory Occasionally new members of the fraternity of the sea will look upon navigation as a chore to be tolerated only as long as it takes to find someone else to assume the responsibility In my experience such individuals never make good naval officers Commander Hobbs has succeeded in bringing together the information and practical skills required for that individual who would take the first step down the road toward becoming a competent marine navigator At the outset of this book the author stresses the necessity for safe navigation but there is another basic tenet of sea warfare that this book serves The best weapons system man has ever devised cannot function effectively unless it knows where it is in relation to the real world

where it is in relation to the enemy and where the enemy is in relation to the real world Not all defeats can be attributed to this lack of information but no victories have been won by those who did not know where they were Useful Tables from the American Practical Navigator (Bowditch.) ,1911 **Useful Tables from the American Practical Navigator** Nathaniel Bowditch,1911 *Publication* ,1964
