W H Bates started his career as an orthodox ophthalmologist following the old long time rules of the practice prescribing
eyeglasses During his practice working with different patients eye conditions he realized that unclear close distant vision
astigmatism and other conditions often cured itself reversed back to clear vision especially when his patients stopped
wearing their eyeglasses and relaxed He noticed that wearing glasses tensed the eyes eye muscles lowered the vision and
resulted in stronger and stronger eyeglass lens prescriptions being needed in order to see clear through the glasses He
began his own studies on the eye and its function This led him to discover that many of the old ophthalmology optometry
supposed facts about the eye lens and its function and cause of unclear vision are incorrect Dr Bates began teaching his
patients to stop wearing their glasses He taught them natural methods including relaxation correct use of the eyes vision
shifting to produce clear vision Dr Bates cured his own eyesight close vision presbyopia Distant vision also clear He wrote an
article in his book magazine describing how he did it with Memory Imagination Relaxation He controlled changed the focus
of light rays in his eyes with his mind Dr Bates performed experiments on the eyes of animals and observed the function of
animal patient s eyes under different conditions He used the retinoscope to see the refraction of light rays in the eye under
various conditions He proved that the refraction clarity of vision changes often And when the eyes are left alone eyeglasses
avoided the refraction clarity returns to normal clear vision He proved that the state of the mind thoughts emotions body
change the refraction of the eye clarity of vision Example when the mind body is relaxed positive happy thoughts emotions
the refraction is normal and vision is clear When the mind body is under stress strain the refraction is abnormal and vision is
unclear Dr Bates discovered that the main cause of unclear vision and other eye problems is Wearing Eyeglasses Mental
Strain Mental Visual Effort to See Poor Vision Habits incorrect use of the eyes vision squinting staring not shifting lack of
normal relaxed eye movements lack of central fixation poor memory and imagination Perfect Sight occurs with Perfect
Relaxation deep or active dynamic relaxation Relaxation occurs first and then the eyesight becomes clear Practicing normal

relaxed eye vision function induces relaxation of the mind eyes and perfect clarity Dr Bates experiments on the outer eye muscles proved that tension in these muscles mainly caused by eyeglasses strain in the mind incorrect vision habits disrupts their function the eyes movement accommodation convergence un accommodation divergence causes pressure tension pulling on in the eye alters the eyes shape and lens retina disrupts refraction focus of light rays in the eye on the retina and the clarity of vision When the mind is strained tense the brain and retina do not communicate function together at optimum level Function of the retina is lowered Relaxing the mind returning normal eye movement relaxes the outer inner eye muscles returns the eyes lens retina to normal shape with clear vision Website <https://cleareyesight.com/batesmethod/info> <https://cleareyesight.com/batesmethod/info/naturalvisionimprovementoriginalandmodernbatesmethod/default.htm> *Better Eyesight Magazine - Original Antique Pages By Ophthalmologist William H.
