Seven Voices One Dream:

Lactivism Courtney Jung, 2015-11-24 Social scientist and mother Courtney Jung explores the ever expanding world of breastfeeding advocacy shining a new light on the diverse communities who compose it the dubious science behind it and the pernicious public policies to which it has given rise Is breast really best Breastfeeding is widely assumed to be the healthiest choice yet growing evidence suggests that its benefits have been greatly exaggerated New moms are pressured by doctors health officials and friends to avoid the bottle at all costs often at the expense of their jobs their pocketbooks and their well being In Lactivism political scientist Courtney Jung offers the most deeply researched and far reaching critique of breastfeeding advocacy to date Drawing on her own experience as a devoted mother who breastfed her two children and her expertise as a social scientist Jung investigates the benefits of breastfeeding and asks why so many people across the political spectrum are passionately invested in promoting it even as its health benefits have been persuasively challenged What emerges is an eye opening story about class and race in America the big business of breastfeeding and the fraught politics of contemporary motherhood Mother's Milk Bernice L. Hausman, 2014-02-04 Mother's Milk examines why nursing a baby is an ideologically charged experience in contemporary culture Drawing upon medical studies feminist scholarship anthropological literature and an intimate knowledge of breastfeeding itself Bernice Hausman demonstrates what is at stake in mothers infant feeding choices economically socially and in terms of women's rights Breastfeeding controversies she argues reveal social tensions around the meaning of women s bodies the authority of science and the value of maternity in American culture A provocative and multi faceted work Mother's Milk will be of interest to anyone concerned with the politics of women s embodiment Militant Lactivism? Charlotte Faircloth, 2013-03-01 Following networks of mothers in London and Paris the author profiles the narratives of women who breastfeed their children to full term typically a period of several years as part of an attachment parenting philosophy These mothers talk about their decision to continue breastfeeding as the natural thing to do evolutionarily appropriate scientifically best and what feels right in their hearts Through a theoretical focus on knowledge claims and accountability the author frames these accounts within a wider context of intensive parenting arguing that parenting practices infant feeding in particular have become a highly moralized affair for mothers practices which they feel are a critical aspect of their identity work. The book investigates why how and with what implications some of these mothers describe themselves as militant lactivists and reflects on wider parenting culture in the UK and France Discussing gender feminism and activism this study contributes to kinship and family studies by exploring how relatedness is enacted in conjunction to constructions of the self Back to the Breast Jessica Martucci, 2015-11-20 After decades of decline during the twentieth century breastfeeding rates began to rise again in the 1970s a rebound that has continued to the present While it would be easy to see this reemergence as simply part of the naturalism movement of the 70s Jessica Martucci reveals here that the true story is more complicated Despite the widespread acceptance and even

advocacy of formula feeding by many in the medical establishment throughout the 1940s 50s and 60s a small but vocal minority of mothers drawing upon emerging scientific and cultural ideas about maternal instinct infant development and connections between the body and mind pushed back against both hospital policies and cultural norms by breastfeeding their children As Martucci shows their choices helped ideologically root a back to the breast movement within segments of the middle class college educated population as early as the 1950s That movement in which the personal and political were inextricably linked effectively challenged midcentury norms of sexuality gender and consumption and articulated early environmental concerns about chemical and nuclear contamination of foods bodies and breast milk In its groundbreaking chronicle of the breastfeeding movement Back to the Breast provides a welcome and vital account of what it has meant and what it means today to breastfeed in modern America The Womanly Art of Breastfeeding La Leche League International, 2010-07-13 The revised go to resource on breastfeeding that mothers have relied on for generations La Leche League has for many years set the standard for supporting families in the art of breastfeeding This new edition brings that support to today s parents with up to date information new illustrations and stories from mothers fathers and grandparents around the world sharing their own experiences What's inside Why breastfeeding matters Getting started feeding cues and nursing positions Life with your breastfed baby Managing common challenges new research Going back to work expressing and storing your milk Sleep and how to get more of it starting family foods and weaning La Leche League is here to help you meet your breastfeeding goals whether you re planning to breastfeed for a few weeks or a few years This book puts information at your fingertips ready to help you when you need support at any point on your breastfeeding journey

Beyond Health, Beyond Choice Paige Hall Smith, Bernice Hausman, Miriam Labbok, 2012-08-15 Current public health promotion of breastfeeding relies heavily on health messaging and individual behavior change Women are told that breast is best but too little serious attention is given to addressing the many social economic and political factors that combine to limit women s real choice to breastfeed beyond a few days or weeks The result women s infants and public health interests are undermined Beyond Health Beyond Choice examines how feminist perspectives can inform public health support for breastfeeding Written by authors from diverse disciplines perspectives and countries this collection of essays is arranged thematically and considers breastfeeding in relation to public health and health care work and family embodiment specifically breastfeeding in public economic and ethnic factors guilt violence and commercialization By examining women s experiences and bringing feminist insights to bear on a public issue the editors attempt to reframe the discussion to better inform public health approaches and political action Doing so can help us recognize the value of breastfeeding for the public shealth and the important productive and reproductive contributions women make to the world
